Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13 and E1527-21, Section 8.1.8 Sources of Standard Source Information:

"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."

Standard Environmental Record Sources

Federal

National Priority List: NPL

The U.S. Environmental Protection Agency (EPA)'s National Priorities List (NPL) includes the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program, based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action. This data includes NPL sites represented as polygons, where available, that can be sourced from the EPA NPL Superfund Site Boundaries dataset, refreshed by the Shared Enterprise Geodata and Services (SEGS). These site boundaries represent the footprint of a whole site, the sum of all the Operable Units (OUs) and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. As site investigation and remediation progress, OUs may be added, modified or refined. Data provided by external parties is not independently verified by EPA. This boundary data is made available to the public strictly for informational purposes. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Mar 8, 2025

National Priority List - Proposed: PROPOSED NPL

Sites proposed by the U.S. Environmental Protection Agency (EPA), the state agency, or concerned citizens for addition to the National Priorities List (NPL) due to contamination by hazardous waste and identified by the EPA as a candidate for cleanup because it poses a risk to human health and/or the environment. Sites represented as polygons, where available, can be sourced from the EPA NPL Superfund Site Boundaries dataset, refreshed by the Shared Enterprise Geodata and Services (SEGS). These site boundaries represent the footprint of a whole site, the sum of all the Operable Units (OUs) and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Data provided by external parties is not independently verified by EPA. This boundary data is made available to the public strictly for informational purposes. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Mar 8, 2025

Deleted NPL: DELETED NPL

Sites deleted from the U.S. Environmental Protection Agency (EPA)'s National Priorities List (NPL). The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate. Sites represented as polygons, where available, can be sourced from the EPA NPL Superfund Site Boundaries dataset, refreshed by the Shared Enterprise Geodata and Services (SEGS). These site boundaries represent the footprint of a whole site, the sum of all the Operable Units (OUs) and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Data provided by external parties is not independently verified by EPA. This boundary data is made available to the public strictly for informational purposes. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Mar 8, 2025

SEMS List 8R Active Site Inventory: SEMS

The U.S. Environmental Protection Agency's (EPA) Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted. This data includes SEMS sites from the List 8R Active file as well as applicable sites from the EPA's Facility Registry Service map tool.

Government Publication Date: Apr 25, 2025

Inventory of Open Dumps, June 1985: ODI

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

Government Publication Date: Jun 1985

SEMS List 8R Archive Sites: SEMS ARCHIVE

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. This data includes sites from the List 8R Archived site file.

Government Publication Date: Apr 25, 2025

Comprehensive Environmental Response, Compensation and Liability Information System - CERCLIS: CERCLIS

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

Government Publication Date: Oct 25, 2013

EPA Report on the Status of Open Dumps on Indian Lands: IODI

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

Government Publication Date: Dec 31, 1998

CERCLIS - No Further Remedial Action Planned: CERCLIS NFRAP

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Government Publication Date: Oct 25, 2013

CERCLIS Liens: CERCLIS LIENS

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA). This database was provided by the United States Environmental Protection Agency (EPA). Refer to SEMS LIEN as the current data source for Superfund Liens.

Government Publication Date: Jan 30, 2014

RCRA CORRACTS-Corrective Action: RCRA CORRACTS

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

Government Publication Date: Jan 6, 2025

RCRA non-CORRACTS TSD Facilities: RCRA TSD

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites that have indicated engagement in the treatment, storage, or disposal of hazardous waste which requires a RCRA hazardous waste permit.

Government Publication Date: Jan 6, 2025

RCRA Generator List: RCRA LQG

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.

Government Publication Date: Jan 6, 2025

RCRA Small Quantity Generators List: RCRA SQG

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

Government Publication Date: Jan 6, 2025

RCRA Very Small Quantity Generators List: RCRA VSQG

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Very Small Quantity Generators (VSQG) generate 100 kilograms or less per month of hazardous waste, or one kilogram or less per month of acutely hazardous waste. Additionally, VSQG may not accumulate more than 1,000 kilograms of hazardous waste at any time.

Government Publication Date: Jan 6, 2025

RCRA Non-Generators: RCRA NON GEN

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

Government Publication Date: Jan 6, 2025

RCRA Sites with Controls: RCRA CONTROLS

List of Resource Conservation and Recovery Act (RCRA) facilities with institutional controls in place. RCRA gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances.

Government Publication Date: Jan 6, 2025

Federal Engineering Controls-ECs: FED ENG

List of Engineering controls (ECs) made availabe by the United States Environmental Protection Agency (EPA). ECs encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. The EC listing includes remedy component data from Superfund decision documents for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: May 30, 2025

Federal Institutional Controls- ICs: FED INST

List of Institutional controls (ICs) made available by the United States Environmental Protection Agency (EPA). ICs are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site. The IC listing includes remedy component data from Superfund decision documents for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: May 30, 2025

Land Use Controls Information System: LUCIS

The Land Use Controls Information System (LUCIS) database is sourced from the U.S. Department of the Navy (DON). This data contains information for former Base Realignment and Closure (BRAC) properties across the United States. DON's BRAC office was tasked with tracking certain base closures while requiring the prevention of risks to human health and the environment of those properties with LUCs in place. Regarding currently available LUC Sites data, the sites listing is limited to centroid point locations for the overall installation property boundaries. Formerly obtained LUC Sites data may reflect site details that applied previously for a BRAC property.

Government Publication Date: Jun 13, 2024

Institutional Control Boundaries at NPL sites: NPL IC

These boundaries of Institutional Control areas at sites on the U.S. Environmental Protection Agency's (EPA) National Priorities List (NPL), or as Proposed or Deleted, are sourced from the EPA NPL Superfund Site Boundaries dataset, refreshed by the Shared Enterprise Geodata and Services (SEGS). The EPA's NPL includes the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. Institutional controls are non-engineered instruments such as administrative and legal controls that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Data provided by external parties is not independently verified by EPA. This boundary data is made available to the public strictly for informational purposes.

Government Publication Date: Mar 8, 2025

Emergency Response Notification System: ERNS 1982 TO 1986

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1982-1986

Emergency Response Notification System: ERNS 1987 TO 1989

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1987-1989

Emergency Response Notification System: ERNS

Database of oil and hazardous substances spill reports made available by the United States Coast Guard National Response Center (NRC). The NRC fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. These data contain initial incident data that has not been validated or investigated by a federal/state response agency.

Government Publication Date: Apr 6, 2025

The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database: FED BROWNFIELDS

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This data is provided by the United States Environmental Protection Agency (EPA) and includes Brownfield sites from the Cleanups in My Community (CIMC) web application.

Government Publication Date: Feb 19, 2025

FEMA Underground Storage Tank Listing: FEMA UST

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

Government Publication Date: Dec 31, 2017

Facility Response Plan: FRP

This listing contains facilities that have submitted Facility Response Plans (FRPs) to the U.S. Environmental Protection Agency (EPA). Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit FRPs. Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments. This listing includes FRP facilities from an applicable EPA FOIA file and Homeland Infrastructure Foundation-Level Data (HIFLD) data file.

Government Publication Date: Jan 9, 2024

Delisted Facility Response Plans: DELISTED FRP

Facilities that once appeared in - and have since been removed from - the list of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

Government Publication Date: Jan 9, 2024

Historical Gas Stations: HIST GAS STATIONS

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

Government Publication Date: Jul 1, 1930

Petroleum Refineries: REFN

This list of petroleum refineries is sourced from the U.S. Energy Information Administration (EIA), Refinery Capacity Report. The listing includes operating and idle petroleum refineries (including new refineries under construction) and refineries shut down during the previous year. The geographic area the report covers is the 50 States, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, Guam, and other U.S. possessions. Per the EIA, the facility location data represents the approximate location based on research of publicly available information from sources such as Federal agencies, company websites, and satellite images on public websites.

Government Publication Date: Oct 31, 2024

Petroleum Product and Crude Oil Rail Terminals: BULK TERMINAL

A list of petroleum product and crude oil rail terminals from the U.S. Energy Information Administration (EIA), as well as petroleum terminals sourced from Oak Ridge National Laboratory hosted by the Homeland Infrastructure Foundation-Level Database. Data includes operable bulk petroleum product terminals with a total bulk shell storage capacity of 50,000 barrels or more, and/or the ability to receive volumes from tanker, barge, or pipeline; also rail terminals handling the loading and unloading of crude oil with activity between 2017 and 2018. EIA petroleum product terminal data comes from the EIA-815 Bulk Terminal and Blender Report, which includes working, shell in operation, and shell idle for several major product groupings.

Government Publication Date: Oct 31, 2024

LIEN on Property: SEMS LIEN

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) provides Lien details on applicable properties, such as the Superfund lien on property activity, the lien property information, and the parties associated with the lien.

Government Publication Date: Apr 25, 2025

Superfund Decision Documents: SUPERFUND ROD

This database contains a list of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include completed Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD) for active and archived sites stored in the Superfund Enterprise Management System (SEMS), along with other associated memos and files. This information is maintained and made available by the U.S. Environmental Protection Agency.

Government Publication Date: May 30, 2025

State

Air Permit Storage Vessels: TANK AIR PERMIT

List of air permitted storage vessels provided by the New Jersey Department of Environmental Protection (DEP) Division of Air Quality Bureau of Stationary Sources (BOSS). Includes aboveground storage tanks, underground storage tanks, and other miscellaneous types of storage vessels with General (GEN), Preconstruction (PCP), and Title V Operating Permits (BOP).

Government Publication Date: Mar 25, 2025

Site Remediation Program Delisted Sites List: DELISTED SRP

A list of sites that once appeared on the Site Remediation Program site list from the New Jersey Department of Environmental Protection (NJDEP) Data Miner but are no longer on the list.

Government Publication Date: Mar 17, 2025

Historical Fill Areas: HIST FILL

Areas of historic fill covering more than approximately 5 acres, where historic fill is described as non-indigenous material placed on a site in order to raise the topographic elevation of the site. The Brownfield Contaminated Site Remediation Act (N.J.S.A. 58:10B-1 et seq.) requires the Department of Environmental Protection to map regions of the state where large areas of historic fill exist. No representation is made as to the composition of the fill or presence of contamination in the fill. Some areas mapped as fill may contain chemical-production waste or ore-processing waste that exclude them from the legislative definition of historic fill. Data made available by the New Jersey Department of Environmental Protection, Division of Water Supply and Geoscience.

Government Publication Date: Mar 26, 2018

Known Contaminated Sites in New Jersey: SHWS

The Known Contaminated Sites List (KCSNJ) for New Jersey are those sites and properties where contamination of soil or ground water has been confirmed at levels equal to or greater than applicable standards. This list of Known Contaminated Sites may include sites where remediation is either currently under way, required but not yet initiated, or has been completed. Record details from GIS Open Data KCSNJ and New Jersey Department of Environmental Protection (NJDEP) Site Remediation Program KCSNJ Active, Pending, and Closed Sites reports. This database serves a purpose similar to that of the federal Superfund Enterprise Management System (SEMS), functioning as a state-level counterpart for tracking potential hazardous substance release sites.

Government Publication Date: Apr 24, 2025

Delisted Known Contaminated Sites: DSHW

The listing of sites that once appeared on - and have since been removed from - the list of Known Contaminated Sites in New Jersey (KCSNJ). KCSNJ is an inventory that includes all sites in New Jersey with confirmed contamination. Sites are classified as either 'Active Sites with Confirmed Contamination', 'Pending Sites with Confirmed Contamination', or 'Closed Sites with Remediated Contamination'. Active Sites are those sites having one or more active cases (with any number of pending and/or closed cases). Pending Sites are those sites having one or more pending cases, no active cases, and any number of closed cases. Closed sites are those sites having only closed cases (sites in this category have no active or pending cases).

Government Publication Date: Apr 24, 2025

Site Remediation Program: SITE REMEDIATION

List of Site Remediation Program sites from the New Jersey Department of Environmental Protection (NJDEP) Data Miner. Includes: cases where contamination is suspected, but not yet confirmed (including potential LUST cases); publicly funded as well as privately funded sites; sites with Underground Storage Tank (UST) contamination and remediation (LUST); Superfund sites, Brownfields, Licensed Site Remediation Professional (LSRP) sites; and sites under the Industrial Site Recovery Act (ISRA).

Government Publication Date: Mar 17, 2025

Site Re-Evaluation: RE EVAL

The sites listed were removed from the Department of Environmental Protection (DEP) Known Contaminated Sites in New Jersey (KCSNJ) report for reevaluation by the Site Remediation Program. These pending sites were a group of contaminated sites awaiting the execution of an oversight document, such as a Memorandum of Agreement or Administrative Consent Order, or the availability of resources for a publicly funded action prior to assignment to a specific remedial bureau. Due to the longevity that some of these sites had in this status and the possibility that some of the pending environmental concerns may have been addressed through subsequent remedial activities, the Department started reevaluating the pending environmental issues against the site's remedial history and current conditions. This database serves a purpose similar to that of the federal Superfund Enterprise Management System (SEMS), functioning as a state-level counterpart for tracking potential hazardous substance release sites.

Government Publication Date: Sept 2007

Solid Waste Facilities and Landfills: SWF/LF

The New Jersey Department of Environmental Protection (DEP) Solid and Hazardous Waste Management Program maintains the New Jersey Landfill database. The information has been compiled from several data sources and includes not only registered landfills, but also suspected illegal and preregulatory sites. The DEP describes the list as a work in progress.

Government Publication Date: Feb 1, 2024

Non-Operating Landfills List: NON OLF

List of Non-Operating Landfills, including those having suspected or known contamination. The landfills included in this list are non-operating and historic landfills identified by, or reported to, the Department of Environmental Protection. The Site Remediation Program developed this inventory, through collaboration with local and regional environmental agencies, community representatives, and through review of historic materials, to prevent injury to human and ecological resources.

Government Publication Date: Jul 2007

Authorized New Jersey Incinerators: INCINERATORS

List of Authorized New Jersey Incinerators made available by the New Jersey Department of Environmental Protection.

Government Publication Date: Feb 16, 2024

LUST- Leaking Underground Storage Tanks: LUST

A listing of the regulated Underground Storage Tank (UST) contamination cases recorded by the New Jersey Department of Environmental Protection (NJDEP) Site Remediation and Waste Management (SRWM) program. Contains remedial and non-remedial information on sites subject to the Underground Storage of Hazardous Substances Act.

Government Publication Date: Apr 4, 2025

UST Active Remediation: UST REM

List of regulated Underground Storage Tanks (USTs) that have a cleanup underway, made available by the New Jersey Department of Environmental Protection (DEP) DataMiner.

Government Publication Date: Jun 11, 2025

Historic LUST- Leaking Underground Storage Tanks: HIST LUST

Historic Leaking Underground Storage Tanks. Spill records taken from Pre-2002 Incidents database (historic). This is no longer maintained or updated by the New Jersey Department of Environmental Protection (DEP).

Government Publication Date: Dec 1, 2002

Delisted Leaking or Remediation Storage Tanks: DELISTED LST

Sites removed from the Site Remediation and Waste Management (SRWM) program's Underground Storage Tank (UST) contamination cases or the Department of Environmental Protection (DEP)'s list of Underground Storage Tank (UST) Active Remediation.

Government Publication Date: Jun 11, 2025

Delisted Storage Tank Remediation: DELIST STR

This database contains a list of the inactive tanks removed from the New Jersey Department of Environmental Protection (DEP)'s UST Active Remediation database.

Government Publication Date: Jul 07, 2016

Underground Storage Tanks: UST

This list of Underground Storage Tank (UST) facilities is provided by the New Jersey Department of Environmental Protection (NJDEP) through fulfilled public record request files and the NJDEP's Bureau of GIS data layer files.

Government Publication Date: Jun 12, 2025

Delisted Storage Tanks: DELISTED TNK

This database contains a list of storage tank sites that were removed from the New Jersey Department of Environmental Protection (DEP) under their Underground Storage Tank Program.

Government Publication Date: Jun 12, 2025

Major Facilities: MAJOR FAC

List of Discharge Prevention Program Petroleum and Other Hazardous Substances major & minor facilities maintained by the New Jersey Department of Environmental Protection (DEP) Bureau of Release Prevention. The Spill Compensation and Control Act (the Spill Act, N.J.S.A. 58:10-23.11), establishes storage capacity as the basis for determining if a facility is major and thus subject to the Spill Act's planning requirements. A major facility is defined as a facility with a total, aggregate storage capacity of 20,000 gallons or more of hazardous substances other than petroleum products; 200,000 gallons or more of all hazardous substances including petroleum products; or an equivalent measure for substances not commonly measured by volume. This list also includes the status of minor facilities.

Government Publication Date: May 28, 2025

Declaration of Environmental Restrictions / Deed Notices: DEED

List of all Declaration of Environmental Restrictions / Deed Notices (DER/DN) issued within the New Jersey Department of Environmental Protection (DEP) Site Remediation and Waste Management (SRWM) program. "DER/DN" refers to a document that provides notice of specific real property contamination issues in accordance with N.J.A.C. 7:26 E, Appendix E.

Government Publication Date: May 21, 2025

Sites with a Classification Exception Area: CEA

Sites with a Classification Exception Area (CEA) issued within the New Jersey Department of Environmental Protection (DEP) Site Remediation and Waste Management (SRWM) program. A CEA is an area where one or more constituent standards and designated uses are suspended in accordance with N.J.A.C. 7:9 C-1.6.

Government Publication Date: May 21, 2025

Publicly Funded Cleanups Site Status Report 2003: PUB FUNDED

The Publicly Funded Cleanup Site Status Report (2003) details efforts by the New Jersey Department of Environmental Protection's (NJDEP) Site Remediation and Waste Management Program (SRWM) to investigate and clean up contaminated properties using public funds.

Government Publication Date: Dec 1, 2003

Brownfields: BROWNFIELDS

List of brownfields provided by the New Jersey's Online Searchable Database for Brownfield Properies, in addition to the NJ Deparment of Environemental Protection's Brownfield Development Areas (Block and Lots) of New Jersey map application.

Government Publication Date: Nov 24, 2022

Brownfield Development Areas Polygons: BFLD DEV

A list of Brownfield Development Areas (BDAs) in New Jersey. Includes BDA boundaries as well as brownfield applicable properties within the BDA boundaries. A brownfield is any former or current commercial or industrial site that is currently vacant or underutilized and on which there has been, or there is suspected to have been, a discharge of contamination. Under the BDA approach, New Jersey Department of Environmental Protection (NJDEP) works with selected communities affected by multiple brownfields to design and implement remediation and reuse plans for these properties simultaneously. This data set is made available by the New Jersey Department of Environmental Protection Bureau of GIS.

Government Publication Date: Jan 31, 2024

Voluntary Cleanup Program Sites: VCP

The New Jersey Department of Environmental Protection (NJDEP)'s Voluntary Cleanup Program (VCP) was eliminated when the Site Remediation Reform Act was signed into law on May 7, 2009.

Government Publication Date: May 7, 2009

Tribal

Leaking Underground Storage Tanks on Indian Lands: INDIAN LUST

This list of leaking underground storage tanks (LUSTs) on Tribal/Indian Lands in Region 2, which includes New Jersey, is made available by the United States Environmental Protection Agency (EPA). There are no federally recognized Tribes in New Jersey, according to the U.S. Department of Interior, Bureau of Indian Affairs.

Government Publication Date: Jan 28, 2016

Underground Storage Tanks (USTs) on Indian Lands: INDIAN UST

This list of underground storage tanks (USTs) on Tribal/Indian Lands in Region 2, which includes New Jersey, is made available by the United States Environmental Protection Agency (EPA). There are no federally recognized Tribes in New Jersey, according to the U.S. Department of Interior, Bureau of Indian Affairs.

Government Publication Date: Apr 4, 2016

Delisted Tribal Leaking Storage Tanks: DELISTED INDIAN LST

Leaking Underground Storage Tank (LUST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian LUST lists made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Apr 1, 2025

Delisted Tribal Underground Storage Tanks: DELISTED INDIAN UST

Underground Storage Tank (UST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian UST lists made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Apr 1, 2025

County

No County standard environmental record sources available for this State.

Additional Environmental Record Sources

Federal

PFAS Greenhouse Gas Emissions Data: PFAS GHG

The U.S. Environmental Protection Agency's Greenhouse Gas Reporting Program (GHGRP) collects Greenhouse Gas (GHG) data from large emitting facilities (25,000 metric tons of carbon dioxide equivalent (CO2e) per year), and suppliers of fossil fuels and industrial gases that results in GHG emissions when used. Includes GHG emissions data for facilities that emit or have emitted since 2010 chemicals identified in EPA's CompTox Chemicals Dashboard list of PFAS without explicit structures and list of PFAS structures in DSSTox. PFAS emissions data has been identified for facilities engaged in the following industrial processes: Aluminum Production (GHGRP Subpart F), HCFC-22 Production and HFC-23 Destruction (Subpart O), Electronics Manufacturing (Subpart I), Fluorinated Gas Production (Subpart L), Magnesium Production (Subpart T), Electrical Transmission and Distribution Equipment Use (Subpart DD), and Manufacture of Electric Transmission and Distribution Equipment (Subpart SS). Over time, other industrial processes with required GHGRP reporting may include PFAS emissions data and the list of reportable gases may change over time. Note that some regulatory programs have specified chemical structure requirements that define PFAS differently than the lists in EPA's CompTox Chemicals Dashboard.

Government Publication Date: May 9, 2025

On-Scene Coordinator Response Sites: OSC RESPONSE

This list of On-Scene Coordinator (OSC) Response Sites is provided by the U.S. Environmental Protection Agency (EPA). OSCs are the federal officials responsible for monitoring or directing responses to all oil spills and hazardous substance releases reported to the federal government. OSCs coordinate all federal efforts with, and provide support and information to local, state, and regional response communities. An OSC is an agent of either EPA or the U.S. Coast Guard (USCG), depending on where the incident occurs. EPA's OSCs have primary responsibility for spills and releases to inland areas and waters. USCG OSCs have responsibility for coastal waters and the Great Lakes. In general, an OSC has the following key responsibilities during and after a response: Assessment, Monitoring, Response Assistance, and Evaluation.

Government Publication Date: Apr 4, 2024

Facility Registry Service/Facility Index: FINDS/FRS

The Facility Registry Service (FRS) is a centrally managed database that identifies facilities, sites, or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, and data collected from EPA's Central Data Exchange registrations and data management personnel. This list is made available by the U.S. Environmental Protection Agency (EPA).

Government Publication Date: Apr 23, 2025

Toxics Release Inventory (TRI) Program: TRIS

The U.S. Environmental Protection Agency's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of toxic chemicals from U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. There are currently 770 individually listed chemicals and 33 chemical categories covered by the TRI Program. Facilities that manufacture, process or otherwise use these chemicals in amounts above established levels must submit annual reporting forms for each chemical. Note that the TRI chemical list does not include all toxic chemicals used in the U.S. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment. This database includes TRI Reporting Data for calendar years 1987 through 2021 and Preliminary Data for 2022.

Government Publication Date: Sep 20, 2023

PFOA/PFOS Contaminated Sites: PFAS NPL

This list of Superfund Sites with Per- and Polyfluoroalkyl Substances (PFAS) detections is made available by the U.S. Environmental Protection Agency (EPA) in their PFAS Analytic Tools data, previously the list was obtained by EPA FOIA requests. EPA's Office of Land and Emergency Management and EPA Regional Offices maintain what is known about site investigations, contamination, and remedial actions under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) where PFAS is present in the environment. Limitations: Detections of PFAS at National Priorities List (NPL) sites do not mean that people are at risk from PFAS, are exposed to PFAS, or that the site is the source of the PFAS. The information in the Superfund NPL and Superfund Alternative Agreement (SAA) PFAS detection site list is years old and may not be accurate today. Site information such as site name, site ID, and location has been confirmed for accuracy; however, PFAS-related information such as media sampled, drinking water being above the health advisory, or mitigation efforts has not been verified. For Federal Facilities data, the other Federal agencies (OFA) are the lead agency for their data and provided them to EPA.

Government Publication Date: Jun 30, 2025

Federal Agency Locations with Known or Suspected PFAS Detections: PFAS FED SITES

This list of federal agency locations with known or suspected detections of Per- and Polyfluoroalkyl Substances (PFAS) is made available by the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools data. The EPA outlines that these data are gathered from several federal entities, such as the federal Superfund program, Department of Defense (DOD), National Aeronautics and Space Administration (NASA), Department of Transportation (DOT), and Department of Energy (DOE). The dates this data was extracted for the PFAS Analytic Tools range from 2022 to 2024. Sites on this list do not necessarily reflect the source/s of PFAS contamination and detections do not indicate level of risk or human exposure at the site. Agricultural notifications in this data are limited to DOD sites only. At this time, the EPA is aware that this list is not comprehensive of all Federal agencies.

Government Publication Date: Oct 24, 2024

SSEHRI PFAS Contamination Sites: PFAS SSEHRI

This PFAS Contamination Site Tracker database is compiled by the PFAS Project Lab, part of the Social Science Environmental Health Research Institute (SSEHRI) at Northeastern University. According to the SSEHRI, the database records qualitative and quantitative data from each known site of PFAS contamination, including timeline of discovery, sources, levels, health impacts, community response, and government response. The goal of this database is to compile information and support public understanding of the rapidly unfolding issue of PFAS contamination. All data presented was extracted from government websites, news articles, or publicly available documents. Locations for the Known PFAS Contamination Sites are sourced from the PFAS Sites and Community Resources Map by the PFAS-REACH team, credited to PFAS Project Lab, Silent Spring Institute, and PFAS Exchange. Disclaimer: The source conveys the data undergoes regular updates as new information becomes available, some sites may be missing and/or contain information that is incorrect or outdated, as well as their information represents all contamination sites SSEHRI is aware of, not all possible contamination sites. This data is not intended to be used for legal purposes. Access the following source link for the most current information: https://pfasproject.com/pfas-sites-and-community-resources/

Government Publication Date: Jun 27, 2024

National Response Center PFAS Spills: PFAS ERNS

This Per- and Poly-Fluoroalkyl Substances (PFAS) Spills dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. The National Response Center (NRC), operated by the U.S. Coast Guard, is the designated federal point of contact for reporting all oil, chemical, and other discharges into the environment, for the United States and its territories. This dataset contains NRC spill information from 1990 to the present that is restricted to records associated with PFAS and PFAS-containing materials. Incidents are filtered to include only records with a "Material Involved" or "Incident Description" related to Aqueous Film Forming Foam (AFFF). The keywords used to filter the data included "AFFF," "Fire Fighting Foam," "Aqueous Film Forming Foam," "Fire Suppressant Foam, "PFAS," "PERFL," "PFOA," "PFOS," and "Genx." Limitations: The data from the NRC website contains initial incident data that has not been validated or investigated by a federal/state response agency. Keyword searches may misidentify some incident reports that do not contain PFAS. This dataset should also not be considered to be exhaustive of all PFAS spills/release incidents.

Government Publication Date: Jun 16, 2025

PFAS NPDES Discharge Monitoring: PFAS NPDES

This list of National Pollutant Discharge Elimination System (NPDES) permitted facilities with required monitoring for Per- and Polyfluoroalkyl (PFAS) Substances is made available via the U.S. Environmental Protection Agency (EPA)'s PFAS Analytic Tools. Any point-source wastewater discharger to waters of the United States must have a NPDES permit, which defines a set of parameters for pollutants and monitoring to ensure that the discharge does not degrade water quality or impair human health. This list includes NPDES permitted facilities associated with permits that monitor for Per- and Polyfluoroalkyl Substances (PFAS), limited to the years 2007 - present. EPA further advises the following regarding these data: currently, fewer than half of states have required PFAS monitoring for at least one of their permittees, and fewer states have established PFAS effluent limits for permittees. For states that may have required monitoring, some reporting and data transfer issues may exist on a state-by-state basis.

Government Publication Date: Dec 16, 2024

Perfluorinated Alkyl Substances (PFAS) from Toxic Release Inventory: PFAS TRI

List of Toxics Release Inventory (TRI) facilities at which the reported chemical is a per- or polyfluoroalkyl (PFAS) substance included in the U.S. Environmental Protection Agency's (EPA) consolidated PFAS Master List of PFAS Substances. Encompasses Toxics Release Inventory records included in the EPA PFAS Analytic Tools. The EPA's TRI database currently tracks information on disposal or releases of 770 individually listed toxic chemicals and 33 chemical categories from thousands of U.S. facilities and details about how facilities manage those chemicals through recycling, energy recovery, and treatment. This listing includes TRI Reporting Data for calendar years 1987 through 2021 and Preliminary Data for 2022.

Government Publication Date: Sep 20, 2023

PFAS Water Quality Portal Sampling Data: PFAS WATER

This Per- and Poly-Fluoroalkyl Substances (PFAS) Environmental Media Sampling Data is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. The Water Quality Portal (WQP), as a cooperative service sponsored by the United States Geological Survey, the EPA, and the National Water Quality Monitoring Council, is part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations, and individuals submit project details and sampling results to this public repository. Limitations: EPA did not carry out the sampling or testing of a majority of the data in the WQP PFAS dataset. EPA can only speak to the accuracy and completeness of the data from projects like the National Aquatic Resource Surveys for which EPA is the data owner/organization. Data may exist within the file on Quality Assurance Project Plans (QAPPs) and the approving agency of the QAPP, if a QAPP is entered.

Government Publication Date: Jan 13, 2025

PFAS TSCA Manufacture and Import Facilities: PFAS TSCA

The U.S. Environmental Protection Agency (EPA) issued the Chemical Data Reporting (CDR) Rule under the Toxic Substances Control Act (TSCA) and requires chemical manufacturers and facilities that manufacture or import chemical substances to report data to EPA. This list is specific only to TSCA Manufacture and Import Facilities with reported per- and poly-fluoroalkyl (PFAS) substances. Data file is sourced from EPA's PFAS Analytic Tools TSCA dataset which includes CDR/Inventory Update Reporting data from 1998 up to 2020. Disclaimer: This data file includes production and importation data for chemicals identified in EPA's CompTox Chemicals Dashboard list of PFAS without explicit structures and list of PFAS structures in DSSTox. Note that some regulations have specific chemical structure requirements that define PFAS differently than the lists in EPA's CompTox Chemicals Dashboard. Reporting information on manufactured or imported chemical substance amounts should not be compared between facilities, as some companies claim Chemical Data Reporting Rule data fields for PFAS information as Confidential Business Information.

Government Publication Date: Jan 5, 2023

PFAS Waste Transfers from RCRA e-Manifest: PFAS E-MANIFEST

This Per- and Poly-Fluoroalkyl Substances (PFAS) Waste Transfers dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. Every shipment of hazardous waste in the U.S. must be accompanied by a shipment manifest, which is a critical component of the cradle-to-grave tracking of wastes mandated by the Resource Conservation and Recovery Act (RCRA). According to the EPA, currently no Federal Waste Code exists for any PFAS compounds. To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: • PFAS • PFOA • PFOS • PERFL • AFFF • GENX • GEN-X (plus the Vermont state-specific waste codes). Limitations: Amount or concentration of PFAS being transferred cannot be determined from the manifest information. Keyword searches may misidentify some manifest records that do not contain PFAS. This dataset should also not be considered to be exhaustive of all PFAS waste transfers.

Government Publication Date: Mar 23, 2025

PFAS Industry Sectors: PFAS IND

This Per- and Poly-Fluoroalkyl Substances (PFAS) Industry Sectors dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. The EPA developed the dataset from various sources that show which industries may be handling PFAS including: EPA's Enforcement and Compliance History Online (ECHO) records restricted to potential PFAS-handling industry sectors; ECHO records for Fire Training Sites identified where fire-fighting foam may have been used in training exercises; and 14 CFR Part 139 Airports compiled from historic and current records from the FAA Airport Data and Information Portal. Since July 2006, all certificated Part 139 Airports are required to have fire-fighting foam onsite that meet certain military specifications, which to date have been fluorinated (Aqueous Film Forming Foam). Limitations: Inclusion in this dataset does not indicate that PFAS are being manufactured, processed, used, or released by the facility. Listed facilities potentially handle PFAS based on their industrial profile, but are unconfirmed by the EPA. Keyword searches in ECHO for Fire Training sites may misidentify some facilities and should not be considered to be an exhaustive list of fire training facilities in the U.S.

Government Publication Date: Jun 2, 2025

Hazardous Materials Information Reporting System: HMIRS

The Hazardous Materials Incident Reporting System (HMIRS) database contains unintentional hazardous materials release information reported to the U.S. Department of Transportation, Pipeline and Hazardous Materials Safety Administration.

Government Publication Date: May 29, 2024

National Clandestine Drug Labs: NCDL

The U.S. Department of Justice ("the Department"), Drug Enforcement Administration (DEA), provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

Government Publication Date: Nov 30, 2023

Toxic Substances Control Act: TSCA

The U.S. Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule. The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI). EPA CDR collections occur approximately every four years and reporting requirements change per collection.

Government Publication Date: May 12, 2022

Hist TSCA: HIST TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.
The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.

Government Publication Date: Dec 31, 2006

FTTS Administrative Case Listing: FTTS ADMIN

An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

FTTS Inspection Case Listing: FTTS INSP

An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

Potentially Responsible Parties List: PRP

Early in the site cleanup process, the U.S. Environmental Protection Agency (EPA) conducts a search to find the Potentially Responsible Parties (PRPs). The EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site. This listing contains PRPs, Noticed Parties, at sites in the EPA's Superfund Enterprise Management System (SEMS).

Government Publication Date: Apr 25, 2025

State Coalition for Remediation of Drycleaners Listing: SCRD DRYCLEANER

The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin. Since 2017, the SCRD no longer maintains this data, refer to applicable state source data where available.

Government Publication Date: Nov 08, 2017

Integrated Compliance Information System (ICIS): ICIS

The Integrated Compliance Information System (ICIS) database contains integrated enforcement and compliance information across most of U.S. Environmental Protection Agency's (EPA) programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained by the EPA Headquarters and at the Regional offices. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

Government Publication Date: May 3, 2025

Drycleaner Facilities: FED DRYCLEANERS

A list of drycleaner facilities from Enforcement and Compliance History Online (ECHO) data as made available by the U.S. Environmental Protection Agency (EPA), sourced from the ECHO Exporter file. This EPA source file tracks facilities that possess NAICS and SIC codes that classify businesses as drycleaner establishments.

Government Publication Date: Apr 19, 2025

Delisted Drycleaner Facilities: DELISTED FED DRY

List of sites removed from the list of Drycleaner Facilities (sites in the EPA's Integrated Compliance Information System (ICIS) with NAIC or SIC codes identifying the business as a drycleaner establishment).

Government Publication Date: Apr 19, 2025

Formerly Used Defense Sites: FUDS

Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DOD) is responsible for an environmental restoration. The FUDS Annual Report to Congress (ARC) is published by the U.S. Army Corps of Engineers (USACE). This data is compiled from the USACE's Geospatial FUDS data layers and Homeland Infrastructure Foundation-Level Data (HIFLD) FUDS dataset which applies to the Fiscal Year 2021 FUDS Inventory.

Government Publication Date: May 15, 2023

FUDS Munitions Response Sites: FUDS MRS

Boundaries of Munitions Response Sites (MRS), published with the Formerly Used Defense Sites (FUDS) Annual Report to Congress (ARC) by the U.S. Army Corps of Engineers (USACE). An MRS is a discrete location within a Munitions response area (MRA) that is known to require a munitions response. An MRA means any area on a defense site that is known or suspected to contain unexploded ordnance (UXO), discarded military munitions (DMM), or munitions constituents (MC). This data is compiled from the USACE's Geospatial MRS data layers and Homeland Infrastructure Foundation-Level Data (HIFLD) MRS dataset.

Government Publication Date: May 15, 2023

Former Military Nike Missile Sites: FORMER NIKE

This information was taken from report DRXTH-AS-IA-83A016 (Historical Overview of the Nike Missile System, 12/1984) which was performed by Environmental Science and Engineering, Inc. for the U.S. Army Toxic and Hazardous Materials Agency Assessment Division. The Nike system was deployed between 1954 and the mid-1970's. Among the substances used or stored on Nike sites were liquid missile fuel (JP-4); starter fluids (UDKH, aniline, and furfuryl alcohol); oxidizer (IRFNA); hydrocarbons (motor oil, hydraulic fluid, diesel fuel, gasoline, heating oil); solvents (carbon tetrachloride, trichloroethylene, trichloroethane, stoddard solvent); and battery electrolyte. The quantities of material a disposed of and procedures for disposal are not documented in published reports. Virtually all information concerning the potential for contamination at Nike sites is confined to personnel who were assigned to Nike sites. During deactivation most hardware was shipped to depot-level supply points. There were reportedly instances where excess materials were disposed of on or near the site itself at closure. There was reportedly no routine site decontamination.

Government Publication Date: Dec 2, 1984

PHMSA Pipeline Safety Flagged Incidents: PIPELINE INCIDENT

This list of flagged pipeline incidents is made available by the U.S. Department of Transportation (US DOT) Pipeline and Hazardous Materials Safety Administration (PHMSA). PHMSA regulations require incident and accident reports for five different pipeline system types. Accidents reported on hazardous liquid gravity lines (§195.13) and reporting-regulated-only hazardous liquid gathering lines (§195.15) and incidents reported on Type R gas gathering (§192.8(c)) are not included in the flagged incident file data.

Government Publication Date: May 6, 2024

Material Licensing Tracking System (MLTS): MLTS

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

Government Publication Date: May 11, 2021

Historic Material Licensing Tracking System (MLTS) sites: HIST MLTS

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

Government Publication Date: Jan 31, 2010

Mines Master Index File: MINES

The Master Index File (MIF) is provided by the United States Department of Labor, Mine Safety and Health Administration (MSHA). This file, which was originally created in the 1970's, contained many Mine-IDs that were invalid. MSHA removes invalid IDs from the MIF upon discovery. MSHA applicable data includes the following: all Coal and Metal/Non-Metal mines under MSHA's jurisdiction since 1/1/1970; mine addresses for all mines in the database except for Abandoned mines prior to 1998 from MSHA's legacy system (addresses may or may not correspond with the physical location of the mine itself); violations that have been assessed penalties as a result of MSHA inspections beginning on 1/1/2000; and violations issued as a result of MSHA inspections conducted beginning on 1/1/2000.

Government Publication Date: Feb 5, 2024

Surface Mining Control and Reclamation Act Sites: SMCRA

This inventory of land and water impacted by past mining (primarily legacy coal mining operations) is maintained by the U.S. Department of the Interior's Office of Surface Mining Reclamation and Enforcement (OSMRE), as it provides information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). This inventory contains information on the type and extent of Abandoned Mine Land (AML) Problems, as well as information on the cost associated with the reclamation of those problems. The data is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed. Disclaimer: Per the OSMRE, States and tribes who enter their data into e-AMLIS (AML Inventory System) may truncate their latitude and longitude so the precise location of usually dangerous AMLs is not revealed in an effort to protect the public from searching for these AMLs, most of which are on private property. If more precise location information is needed, please contact the applicable state/tribe of interest.

Government Publication Date: May 20, 2024

Mineral Resource Data System: MRDS

The Mineral Resource Data System (MRDS) is a collection of reports describing metallic and nonmetallic mineral resources throughout the world. Included are deposit name, location, commodity, deposit description, geologic characteristics, production, reserves, resources, and references. This database contains the records previously provided in the Mineral Resource Data System (MRDS) of USGS and the Mineral Availability System/Mineral Industry Locator System (MAS/MILS) originated in the U.S. Bureau of Mines, which is now part of USGS. The USGS has ceased systematic updates of the MRDS database with their focus more recently on deposits of critical minerals while providing a well-documented baseline of historical mine locations from USGS topographic maps.

Government Publication Date: Mar 15, 2016

DOE Legacy Management Sites: LM SITES

The U.S. Department of Energy (DOE) Office of Legacy Management (LM) currently manages radioactive and chemical waste, environmental contamination, and hazardous material at over 100 sites across the U.S. The LM manages sites with diverse regulatory drivers (statutes or programs that direct cleanup and management requirements at DOE sites) or as part of internal DOE or congressionally-recognized programs, such as but not limited to: Formerly Utilized Sites Remedial Action Program (FUSRAP), Uranium Mill Tailings Radiation Control Act (UMTRCA Title I, Tile II), Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), Resource Conservation and Recovery Act (RCRA), Decontamination and Decommissioning (D&D), Nuclear Waste Policy Act (NWPA). This site listing includes data exported from the DOE Office of LM's Geospatial Environmental Mapping System (GEMS). GEMS Data disclaimer: The DOE Office of LM makes no representation or warranty, expressed or implied, regarding the use, accuracy, availability, or completeness of the data presented herein.

Government Publication Date: Dec 12, 2023

Alternative Fueling Stations: ALT FUELS

This list of alternative fueling stations is sourced from the Alternative Fuels Data Center (AFDC). The U.S. Department of Energy's Office of Energy Efficiency & Renewable Energy launched the AFDC in 1991 as a repository for alternative fuel vehicle performance data, which provides a wealth of information and data on alternative and renewable fuels, advanced vehicles, fuel-saving strategies, and emerging transportation technologies. The data includes Biodiesel (B20 and above), Compressed Natural Gas (CNG), Electric, Ethanol (E85), Hydrogen, Liquefied Natural Gas (LNG), Propane (LPG), and Renewable Diesel (R20 and above) fuel type locations.

Government Publication Date: May 12, 2025

Superfunds Consent Decrees: CONSENT DECREES

This list of Superfund consent decrees is provided by the Department of Justice, Environment & Natural Resources Division (ENRD) through a Freedom of Information Act (FOIA) applicable file. This listing includes Cases filed since 2010 limited to the following: Consent Decrees for CERCLA or Superfund Sites filed and/or as proposed within the ENRD's Case Management System (CMS); and applicable ENRD's Environmental Defense Section (EDS) CERCLA Cases with "Consent" in History Note. CMS may not reflect the latest developments in a case, nor can the agency guarantee the accuracy of the data. ENRD Disclaimer: Congress excluded three discrete categories of law enforcement and national security records from the requirements of the FOIA; response is limited to those records that are subject to the requirements of the FOIA; however, this should not be taken as an indication that excluded records do, or do not, exist.

Government Publication Date: Jun 26, 2024

Air Facility System: AFS

This EPA retired Air Facility System (AFS) dataset contains emissions, compliance, and enforcement data on stationary sources of air pollution. Regulated sources cover a wide spectrum; from large industrial facilities to relatively small operations such as dry cleaners. AFS does not contain data on facilities that are solely asbestos demolition and/or renovation contractors, or landfills. ECHO Clean Air Act data from AFS are frozen and reflect data as of October 17, 2014; the EPA retired this system for Clean Air Act stationary sources and transitioned to ICIS-Air.

Government Publication Date: Oct 17, 2014

Registered Pesticide Establishments: SSTS

This national list of active EPA-registered foreign and domestic pesticide and/or device-producing establishments is based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that each producing establishment must place its EPA establishment number on the label or immediate container of each pesticide, active ingredient or device produced. An EPA establishment number on a pesticide product label identifies the EPA registered location where the product was produced. The list of establishments is made available by the U.S. Environmental Protection Agency (EPA).

Government Publication Date: Feb 29, 2024

Polychlorinated Biphenyl (PCB) Transformers: PCBT

Locations of Transformers Containing Polychlorinated Biphenyls (PCBs) registered with the United States Environmental Protection Agency. PCB transformer owners must register their transformer(s) with EPA. Although not required, PCB transformer owners who have removed and properly disposed of a registered PCB transformer may notify EPA to have their PCB transformer de-registered. Data made available by EPA.

Government Publication Date: Oct 15, 2019

Polychlorinated Biphenyl (PCB) Notifiers: PCB

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

Government Publication Date: May 23, 2024

Power Plants: POWER PLANTS

This list of power plants is provided by the U.S. Energy Information Administration (EIA). The listing includes operable electric generating plants in the United States by energy source, originating from the EIA-860, Annual Electric Generator Report; EIA-860M, Monthly Update to the Annual Electric Generator Report; and EIA-923, Power Plant Operations Report. It includes all operable plants by energy source with a combined nameplate capacity of 1 megawatt or more that are operating, are on standby, or out of service for short- or long-term.

Government Publication Date: Apr 15, 2024

Historical Business Activity Risk: HIST RISK

Proprietary list of sites identified as potentially having engaged in business activity that poses a higher-than-normal risk of contamination. Records originate from historical city directories, and are included in this list based on broad business categories Potentially Hazardous Chemical Users and Fuel and Automotive, including but not limited to Dry Cleaners and Fuel Stations, Garages, etc. Inclusion in this listing does not indicate that there is or ever has been contamination; rather, sites are included in this list due to their potential for having engaged in a business activity presenting an elevated risk of contamination. The list was compiled from various city directories including Polks, Millers, Mullin Kille, Interstate Directory, and State Directory Co; spanning roughly 1920s through 1960 depending on information available by city.

Government Publication Date: Jan 1, 1960

State

Hazardous Material Incident database: SPILLS

A listing of reported spill incidents from the New Jersey Department of Environmental Protection's (NJDEP) Hazardous Material Incident database. This database includes incidents reported to the NJDEP's Environmental Action Line.

Government Publication Date: Apr 4, 2025

Historic Incidents: HIS SPILL

Pre-2003 Spill incident records. This is no longer maintained or updated by the New Jersey Department of Environmental Protection (DEP).

Government Publication Date: Dec 1, 2002

Data Miner Sites: ALL SITES

A list of facilities and sites of environmental interest included in the New Jersey Department of Environmental Protection (NJDEP) Data Miner database. NJ Data Miner is compilation of data from various programs, and includes Air Quality Permitting and Reporting, Compliance and Enforcement, Hazardous Waste Manifest, Incidents and Complaints, Radon, and others.

Government Publication Date: Mar 17, 2025

Chromate Waste Sites: CHROMATE

List of sites within New Jersey where chromate contamination of soil or ground water has been identified. This list of chromate waste sites includes sites where remediation is either currently under way, required but not yet initiated or has been completed. The information is obtained from data submissions produced by the various remedial programs within NJDEP using information supplied by the party responsible for the site

Government Publication Date: Jun 2013

Dry Cleaning Facilities: DRYCLEANERS

A list of registered drycleaners. This list is made available by the Department of Environmental Protection.

Government Publication Date: Mar 6, 2025

Delisted Drycleaning Facility List: DELISTED DRYCLEANERS

A list of sites which were once dry cleaning facilities registered with New Jersey Department of Environmental Protection but are no longer used as dry cleaning facilities.

Government Publication Date: Mar 6, 2025

Per- and Polyfluoroalkyl Substances (PFAS): PFAS

A list of incidents reported to the New Jersey Department of Environmental Protection (NJDEP) Environmental Action Line, where one or more of the substances are in the PFAS Structure List and/or PFAS Chemicals Without Explicit Structure List made available by the United States Environmental Protection Agency (US EPA).

Government Publication Date: Apr 4, 2025

Industrial Site Recovery Act Database: ISRA

A list of Industrial Site Recovery Act (ISRA) cases made available by the New Jersey Department of Environmental Protection. The Industrial Site Recovery Act (ISRA) requires owners of facilities with specific industrial classifications to investigate and remediate prior to property transfers when the business ceases operations or is sold.

Government Publication Date: Jun 3, 2025

Pollutant Discharge Elimination System: PDES

List of New Jersey Pollutant Discharge Elimination System (NJPDES) facilities provided by the New Jersey Department of Environmental Protection (NJDEP). Includes approximate locations of permitted NJPDES facilities regulated by the NJDEP Bureau of Nonpoint Pollution Control (BNPC) and facilities with active NJPDES permits from the NJDEP Data Miner.

Government Publication Date: Mar 24, 2025

New Jersey Environmental Management System (NJEMS) Sites: NJEMS

New Jersey Environmental Management System (NJEMS) Sites are regulated by NJ Department of Environmental Protection (NJDEP) under one or more regulatory permitting or enforcement programs, or sites that are otherwise of some interest to the NJDEP program. This database is published by NJDEP.

Government Publication Date: Jun 26, 2025

PFAS Monitoring for Discharge to Ground Water Permits: PFAS DGW

List of New Jersey Pollutant Discharge Elimination System (NJPDES) Discharge to Groundwater (DGW) Permittees who have been issued permit modifications to include Per- and Polyfluoroalkyl Substances (PFAS) monitoring and reporting requirements. The New Jersey Department of Environmental Protection (NJDEP) Division of Water Quality's (DWQ) Ground Water Permitting Unit issued an initial round of permit modifications in January 2020. Disclaimer: This map layer was developed using NJDEP Geographic Information System digital data, but this secondary product has not been verified by NJDEP and is not state-authorized or endorsed. NJDEP makes no warranty that digital data are free of Copyright or Trademark claims or other restrictions or limitations on free use or display.

Government Publication Date: May 11, 2022

PFAS Survey for Discharge to Surface Water Permittees: PFAS DSW

List of New Jersey Pollutant Discharge Elimination System (NJPDES) Discharge to Surface Water (DSW) Permittees that participated in the New Jersey Department of Environmental Protection (NJDEP) Division of Water Quality's (DWQ) PFAS Source Evaluation and Reduction Requirements Survey. On March 17, 2021, the DWQ sent a Request for Information letter to Category B Permittees (Industrial Wastewater) and Category L Permittees (Significant Indirect Users). These permittees are industrial users that discharge directly or indirectly to a surface water body. The survey was used to collect and evaluate site-specific information such as on-site use of Aqueous Film Forming Foam (AFFF), use of process materials or aids that may contain Per- and Polyfluoroalkyl Substances (PFAS), and industrial operations and processes. Disclaimer: This map layer was developed using NJDEP Geographic Information System digital data, but this secondary product has not been verified by NJDEP and is not state-authorized or endorsed. NJDEP makes no warranty that digital data are free of Copyright or Trademark claims or other restrictions or limitations on free use or display.

Government Publication Date: May 11, 2022

Tribal

No Tribal additional environmental record sources available for this State.

County

No County additional environmental record sources available for this State.

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

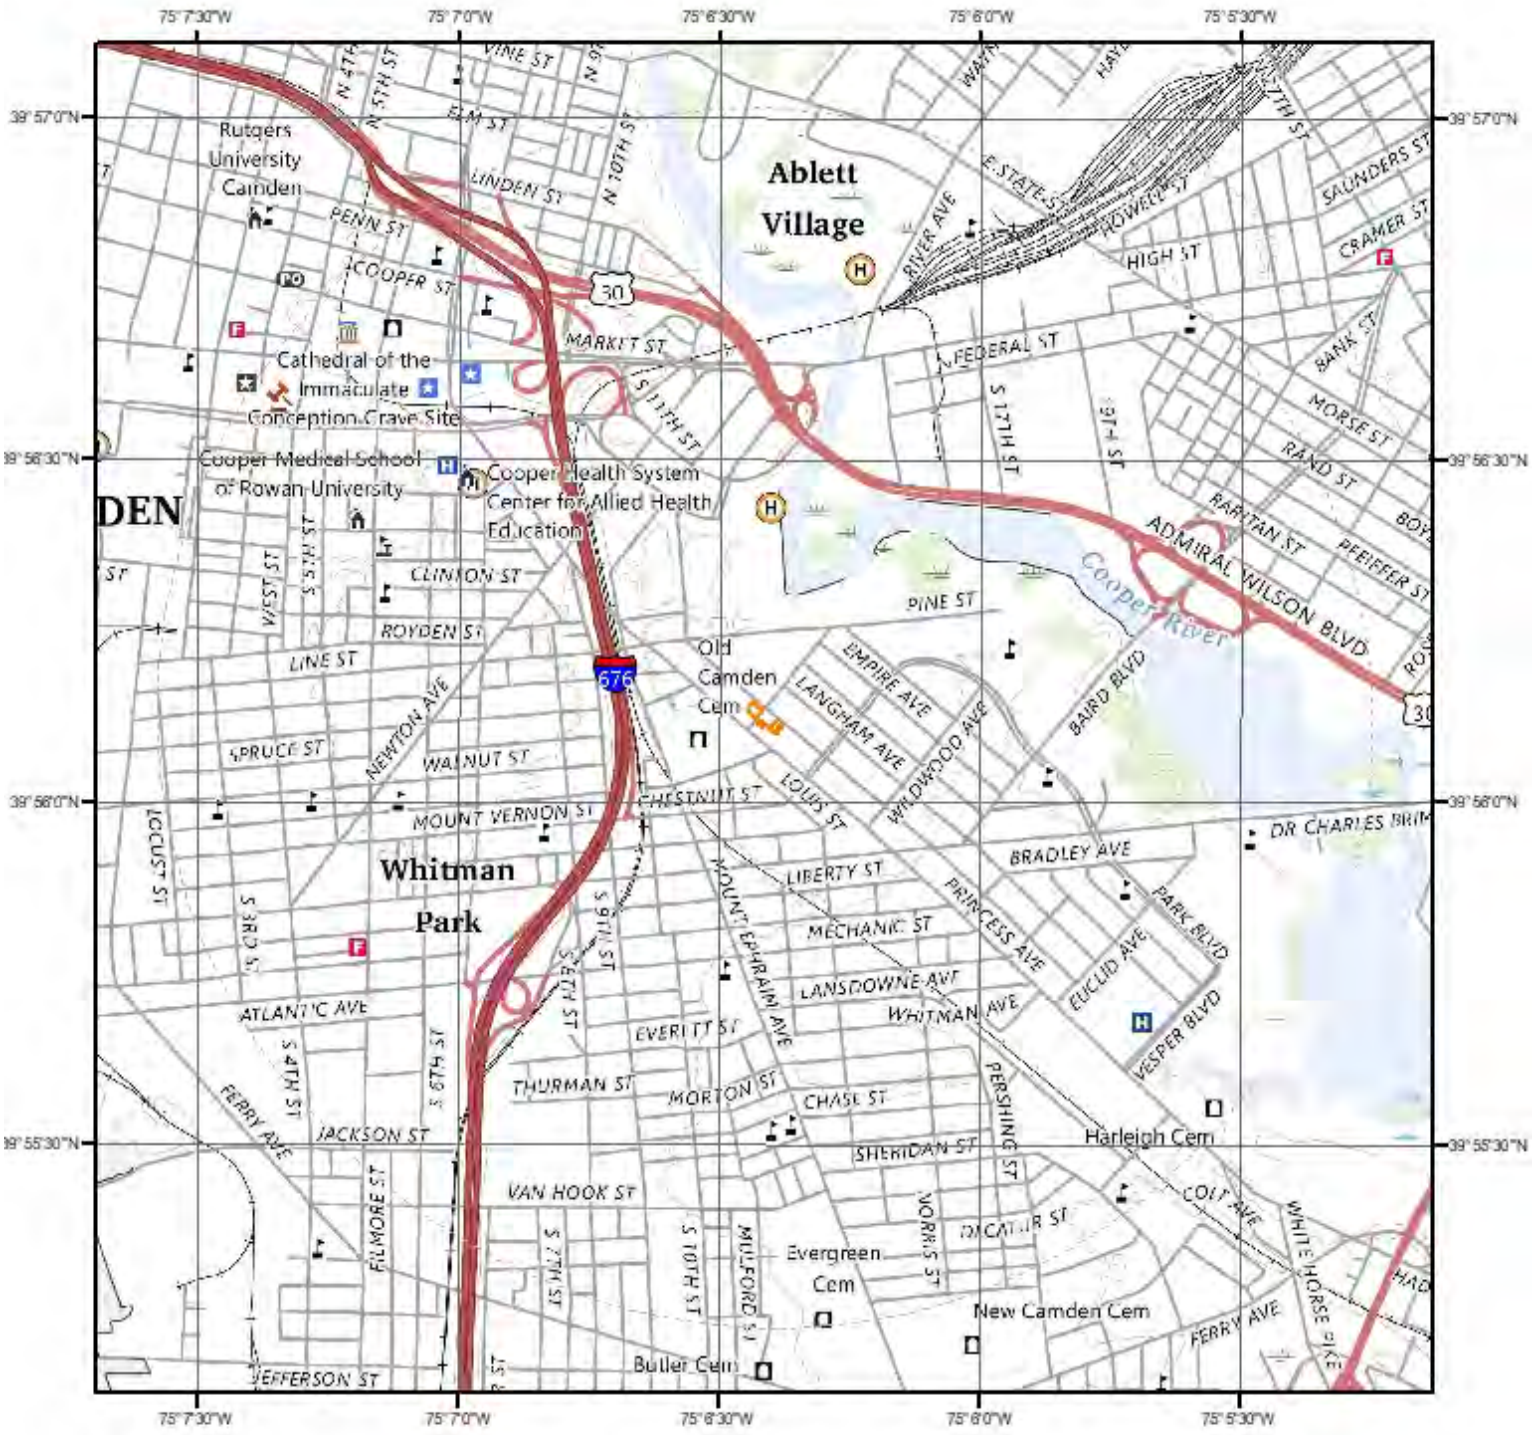
The ERIS ***Physical Setting Report - PSR*** provides comprehensive information about the physical setting around a site and includes a complete overview of topography and surface topology, in addition to hydrologic, geologic and soil characteristics. The location and detailed attributes of oil and gas wells, water wells, public water systems and radon are also included for review.

The compilation of both physical characteristics of a site and additional attribute data is useful in assessing the impact of migration of contaminants and subsequent impact on soils and groundwater.

Disclaimer

This Report does not provide a full environmental evaluation for the site or adjacent properties. Please see the terms and disclaimer at the end of the Report for greater detail.

Topographic Information



Current USGS Topo (2023)

Quadrangle(s): Philadelphia, PA; Camden, NJ

Source: USGS 7.5 Minute Topographic Map

Topographic Information

The previous topographic map(s) are created by seamlessly merging and cutting current USGS topographic data. Below are shaded relief map(s), derived from USGS elevation data to show surrounding topography in further detail.

Hydrologic Information

FEMA Flood Zone Definitions

Special Flood Hazard Areas – High Risk

Special Flood Hazard Areas represent the area subject to inundation by 1-percent-annual chance flood. Structures located within the SFHA have a 26-percent chance of flooding during the life of a standard 30-year mortgage. Federal floodplain management regulations and mandatory flood insurance purchase requirements apply in these zones.

ZONE	DESCRIPTION
A	Areas subject to inundation by the 1-percent-annual-chance flood event. Because detailed hydraulic analyses have not been performed, no Base Flood Elevations (BFEs) or flood depths are shown.
AE, A1-A30	Areas subject to inundation by the 1-percent-annual-chance flood event determined by detailed methods. BFEs are shown within these zones. (Zone AE is used on new and revised maps in place of Zones A1–A30.)
AH	Areas subject to inundation by 1-percent-annual-chance shallow flooding (usually areas of ponding) where average depths are 1–3 feet. BFEs derived from detailed hydraulic analyses are shown in this zone.
AO	Areas subject to inundation by 1-percent-annual-chance shallow flooding (usually sheet flow on sloping terrain) where average depths are 1–3 feet. Average flood depths derived from detailed hydraulic analyses are shown within this zone.
AR	Areas that result from the decertification of a previously accredited flood protection system that is determined to be in the process of being restored to provide base flood protection.
A99	Areas subject to inundation by the 1-percent-annual-chance flood event, but which will ultimately be protected upon completion of an under-construction Federal flood protection system. These are areas of special flood hazard where enough progress has been made on the construction of a protection system, such as dikes, dams, and levees, to consider it complete for insurance rating purposes. Zone A99 may be used only when the flood protection system has reached specified statutory progress toward completion. No BFEs or flood depths are shown.

Coastal High Hazard Areas – High Risk

Coastal High Hazard Areas (CHHA) represent the area subject to inundation by 1-percent-annual chance flood, extending from offshore to the inland limit of a primary front al dune along an open coast and any other area subject to high velocity wave action from storms or seismic sources. Structures located within the CHHA have a 26-percent chance of flooding during the life of a standard 30-year mortgage. Federal floodplain management regulations and mandatory purchase requirements apply in these zones.

ZONE	DESCRIPTION
V	Areas along coasts subject to inundation by the 1-percent-annual-chance flood event with additional hazards associated with storm-induced waves. Because detailed coastal analyses have not been performed, no BFEs or flood depths are shown.
VE, V1-V30	Areas along coasts subject to inundation by the 1-percent-annual-chance flood event with additional hazards due to storm-induced velocity wave action. BFEs derived from detailed hydraulic coastal analyses are shown within these zones. (Zone VE is used on new and revised maps in place of Zones V1–V30.)

Hydrologic Information

Moderate and Minimal Risk Areas

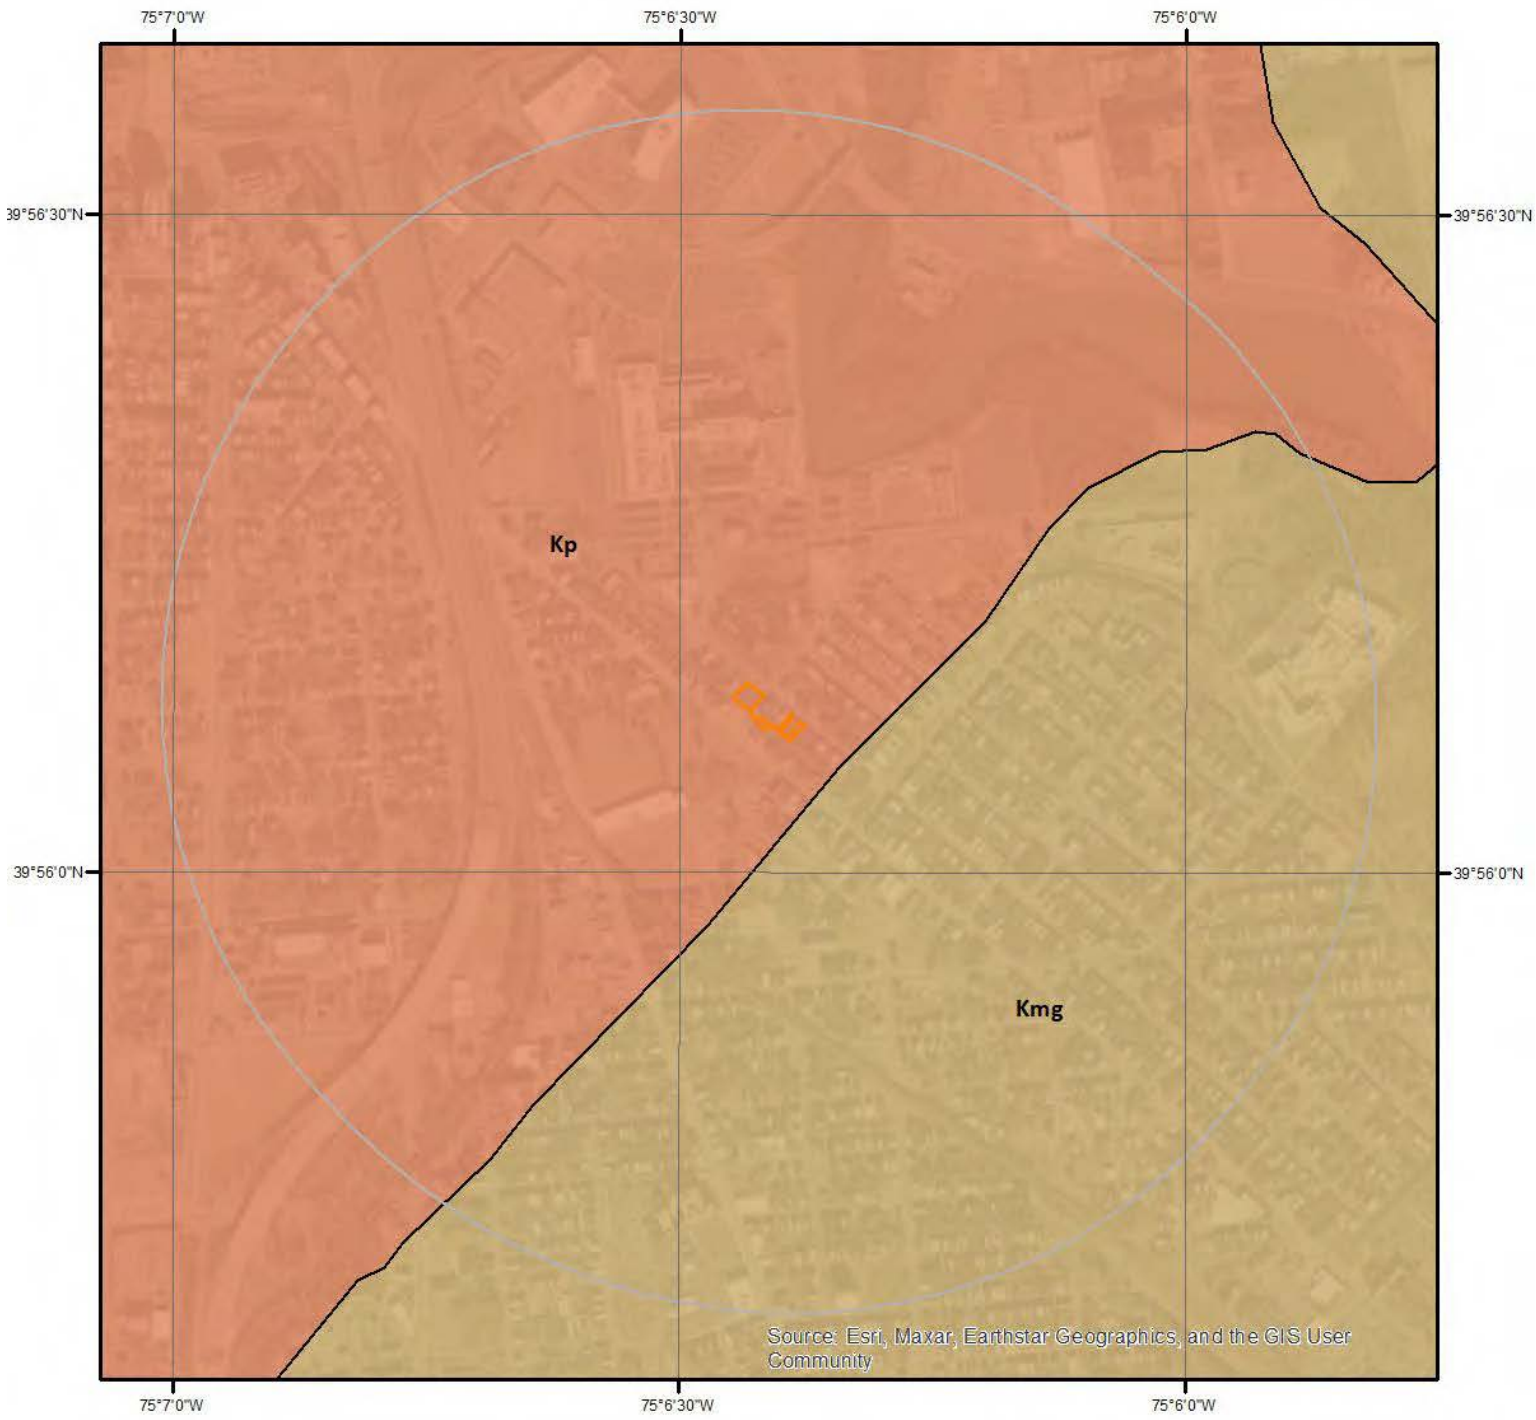
Areas of moderate or minimal hazard are studied based upon the principal source of flood in the area. However, buildings in these zones could be flooded by severe, concentrated rainfall coupled with inadequate local drainage systems. Local stormwater drainage systems are not normally considered in a community's flood insurance study. The failure of a local drainage system can create areas of high flood risk within these zones. Flood insurance is available in participating communities, but is not required by regulation in these zones. Nearly 25-percent of all flood claims filed are for structures located within these zones.

ZONE	DESCRIPTION
B, X (shaded)	Moderate risk areas within the 0.2-percent-annual-chance floodplain, areas of 1-percent-annual-chance flooding where average depths are less than 1 foot, areas of 1-percent-annual-chance flooding where the contributing drainage area is less than 1 square mile, and areas protected from the 1-percent-annual-chance flood by a levee. No BFEs or base flood depths are shown within these zones. (Zone X (shaded) is used on new and revised maps in place of Zone B.)
C, X (unshaded)	Minimal risk areas outside the 1-percent and .2-percent-annual-chance floodplains. No BFEs or base flood depths are shown within these zones. (Zone X (unshaded) is used on new and revised maps in place of Zone C.)

Undetermined Risk Areas

ZONE	DESCRIPTION
D	Unstudied areas where flood hazards are undetermined, but flooding is possible. No mandatory flood insurance purchase requirements apply, but coverage is available in participating communities.

Geologic Information



Geologic Units

This maps shows geologic units in the area. Please refer to the report for detailed descriptions.

N

0 0.125 0.25 Miles

ERIS

Geologic Information

The previous page shows USGS geology information. Detailed information about each unit is provided below.

Geologic Unit Kmg

Unit Name:	Magothy Formation
Unit Age:	Upper Cretaceous, middle and lower Santonian
Primary Rock Type:	Sand
Secondary Rock Type:	

Geologic Unit Kp

Unit Name:	Potomac Formation, unit 3
Unit Age:	Upper Cretaceous, lower Cenomanian
Primary Rock Type:	Sand
Secondary Rock Type:	Clay
Unit Description:	Sand, fine- to coarse-grained, locally gravelly, crossbedded, light-colored, interbedded with white or variegated red and yellow, massive clay, and rarely dark-gray, woody clay. The Potomac Formation crops out only in the Delaware River valley where the river and its tributaries have eroded away the overlying formations. The Potomac has been mapped in a broad belt parallel to the inner edge of the Coastal Plain. Although mapped in a broad belt, the Potomac is very poorly exposed because of the widespread cover of surficial sediments. The best exposures occur where surficial material is mined away in the Camden area. Unit is about 45 m (148 ft) thick. Contact with the overlying Magothy Formation is difficult to pick where the basal Magothy also contains variegated clays. Most of the basal Magothy has more dark-colored clay, and the contact was drawn by using this criterion. The basal contact of the Potomac with the underlying crystalline rock is not exposed in New Jersey. Biostratigraphically, the Potomac has been separated into pollen zones I, II, and III (Doyle, 1969; Doyle and Robbins, 1977). Samples from the Potomac Formation in the Camden area and along the Delaware River nearby contain pollen assemblages of early Cenomanian age (Zone III) (Les Sirkin, written commun., 1988).

Soil Information

SSURGO Soils

This maps shows SSURGO soil units around the target property. Please refer to the report for detailed soil descriptions.

ERIS

Soil Information

The previous page shows a soil map using SSURGO data from USDA Natural Resources Conservation Service. Detailed information about each unit is provided below.

Map Unit UR (81.74%)

Map Unit Name:	Urban land
Bedrock Depth - Min:	null
Watertable Depth - Annual Min:	null
Drainage Class - Dominant:	null
Hydrologic Group - Dominant:	null

Major components are printed below

Component Description:

Minor map unit components are excluded from this report.

Map Unit: UR - Urban land

Component: Urban land (95%)
Generated brief soil descriptions are created for major soil components. The Urban land is a miscellaneous area.

Component: Udorthents (5%)
Generated brief soil descriptions are created for major components. The Udorthents soil is a minor component.

Map Unit WATER (18.26%)

Map Unit Name:	Water

No more attributes available for this map unit

Component Description:

Minor map unit components are excluded from this report.

Map Unit: WATER - Water

Component: Water (100%)
Generated brief soil descriptions are created for major soil components. The Water is a miscellaneous area.

Radon Information

This section lists any relevant radon information found for the target property.

Federal EPA Radon Zone for *CAMDEN* County: **2**

Zone 1: Counties with predicted average indoor radon screening levels greater than 4 pCi/L
Zone 2: Counties with predicted average indoor radon screening levels from 2 to 4 pCi/L
Zone 3: Counties with predicted average indoor radon screening levels less than 2 pCi/L

Federal Area Radon Information for *CAMDEN* County

No Measures/Homes:	4029
Arithmetic Mean:	2.6
% >4 pCi/L:	15
Notes on Data Table:	TABLE 1. Screening indoor radon data for New Jersey compiled by the New Jersey Department of Environmental Protection and Energy. Data are compiled from vendor reports collected by NJDEP from 1986 through 1992 and represent primarily 2-7 day charcoal canister measurements, although some alpha-track and e-perm detector data are also included.

Appendix

Federal Sources

FEMA National Flood Hazard Layer — **FEMA FLOOD**

The National Flood Hazard Layer (NFHL) data incorporates Flood Insurance Rate Map (FIRM) databases published by the Federal Emergency Management Agency (FEMA), and any Letters Of Map Revision (LOMRs) that have been issued against those databases since their publication date. The FIRM Database is the digital, geospatial version of the flood hazard information shown on the published paper FIRMs. The FIRM Database depicts flood risk information and supporting data used to develop the risk data. The FIRM Database is derived from Flood Insurance Studies (FISs), previously published FIRMs, flood hazard analyses performed in support of the FISs and FIRMs, and new mapping data, where available.

Indoor Radon Data — **INDOOR RADON**

Indoor radon measurements tracked by the Environmental Protection Agency(EPA) and the State Residential Radon Survey.

Public Water Systems Violations and Enforcement Data — **PWSV**

This list of drinking water violations and enforcement actions is sourced from the U.S Environmental Protection Agency's (EPA) Enforcement and Compliance History Online (ECHO) system that incorporates Public Water Systems data from EPA's Safe Drinking Water Information System (SDWIS) database, as part of the national download of Safe Drinking Water Act (SDWA) data. SDWIS contains information on public water systems from the Public Water System Supervision (PWSS) Program, including monitoring, enforcement, and violation data related to requirements established by the SWDA. Address information provided in SWDIS may correspond either with the physical location of the water system, or with a contact address.

Radon Zone Level — **RADON ZONE**

Areas showing the level of Radon Zones (level 1, 2 or 3) by county. This data is maintained by the Environmental Protection Agency (EPA).

Safe Drinking Water Information System (SDWIS) — **SDWIS**

This national download of Safe Drinking Water Act (SDWA) data is sourced from the U.S Environmental Protection Agency's (EPA) Enforcement and Compliance History Online (ECHO) system that incorporates Public Water Systems data from EPA's Safe Drinking Water Information System (SDWIS) database. SDWIS contains information on public water systems from the Public Water System Supervision (PWSS) Program related to requirements established by the Safe Drinking Water Act (SDWA). Address information provided in SWDIS may correspond either with the physical location of the water system, or with a contact address.

Soil Survey Geographic database — **SSURGO**

The Soil Survey Geographic database (SSURGO) contains information about soil as collected by the National Cooperative Soil Survey at the Natural Resources Conservation Service (NRCS). Soil maps outline areas called map units. The map units are linked to soil properties in a database. Each map unit may contain one to three major components and some minor components.

U.S. Fish & Wildlife Service Wetland Data — **US WETLAND**

The U.S. Fish & Wildlife Service Wetland layer represents the approximate location and type of wetlands and deepwater habitats in the United States.

USGS Current Topo — **US TOPO**

US Topo topographic maps are produced by the National Geospatial Program of the U.S. Geological Survey (USGS). The project was launched in late 2009, and the term "US Topo" refers specifically to quadrangle topographic maps published in 2009 and later.

USGS Geology — **US GEOLOGY**

Seamless maps depicting geological information provided by the United States Geological Survey (USGS).

USGS National Water Information System — **FED USGS**

The U.S. Geological Survey's (USGS) National Water Information System (NWIS) is the nation's principal repository of water resources data. The data includes comprehensive information of well-construction details, time-series data for gage height, streamflow, groundwater level, and precipitation and water use data. This NWIS database information is obtained through the Water Quality Data Portal (WQP). The WQP

is a cooperative service sponsored by the USGS, the Environmental Protection Agency (EPA), and the National Water Quality Monitoring Council (NWQMC).

State Sources

Oil and Gas Wells **OGW**

As of NJ state regulatory agencies, FracTracker Alliance - state of New Jersey confirmed not to have any active (drilled but not plugged) oil and gas wells.

Public Community Water Supply Well Head Protection Areas **PCWS**

Locations of Well Head Protection Areas (WHPA) for Public Community Water Supply (PCWS) wells, created in compliance to the Safe Drinking Water Act Amendments of 1986 and 1996 as part of the Source Water Area Protection Program (SWAP). Well Head Protection Areas delineate the horizontal extent of ground water captured by a well. Data made available by New Jersey Department of Environmental Protection's (NJ DEP) Bureau of Safe Drinking Water. Point locations represent the centroids of the Well Head Protection Areas.

Well Permits **WATER WELLS**

Locations of water wells from the Well Permit Report made available by the State of New Jersey, Department of Environmental Protection. Includes approved/accepted well documents for Category 1 Potable and Category 2 Non-Potable Water Supply Wells.

Liability Notice

Reliance on information in Report: The Physical Setting Report (PSR) DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a review of environmental databases and physical characteristics for the site or adjacent properties.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS Information Inc. disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report(s) are protected by copyright owned by ERIS Information Inc. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

RE: CITY DIRECTORY RESEARCH
919, 1015, 1023, 1025 Princess Ave & 1206-1208 Walnut St
Camden,NJ 08103

Thank you for contacting ERIS for an City Directory Search for the site described above. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. We have provided the nearest addresses(s) when adjacent addresses are not listed. If we have searched a range of addresses, all addresses in that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on more highly developed areas. Newly developed areas may be covered in the more recent years, but the older directories will tend to cover only the "central" parts of the city. To complete the search, we have either utilized the ACPL, Library of Congress, State Archives, and/or a regional library or history center as well as multiple digitized directories. These do not claim to be a complete collection of all reverse listing city directories produced.

ERIS has made every effort to provide accurate and complete information but shall not be held liable for missing, incomplete or inaccurate information. To complete this search we used the general range(s) below to search for relevant findings. If you believe there are additional addresses or streets that require searching please contact us at 866-517-5204.

Search Criteria:
Beg-1075 of Princess Ave
1200-End of Walnut St
Search Notes:

Request Type: Open Records Request

Description: Request to Review County Records
Open Public Records Act (OPRA) Request Form
(Pursuant to N.J.S.A. 47:1A-1, et seq.)

In accordance with the Open Public Records Act, Camden County makes
public records through formal requests to the Office of Archives and Rec
Management.

Requests may be submitted by completing the online form below.

Supplementary attachments can also be appended at the end of this forr

Contact E-Mail: vmai@pennoni.com

Reference No: W032927-071625

Status: No Records Exist

Describe the Record(s) Requested: All properties are located in Camden City, 919 Princess Ave - Block 365,
1208 Walnut St - Block 1286, Lots 7 & 8 1015, 1023, and 1025 - Block 12
53, 54 I am conducting an environmental due diligence investigation (e.
Environmental Phase I, performing a Preliminary Assessment) and seek
notification reports, above ground or underground storage tank installa
removal records, right-to-know, environmental reports, illegal waste dis
notifications / reports, septic tank records, drinking water well records,
environmental permits, and any environmental compliance and enforce
for the subject property (i.e., environmental liens, etc.).
Please be as specific as possible in describing the records that you are requ
**Please note that records request can be submitted in the form
attachments at the bottom of this form.**

Preferred Method to Receive Records: Electronic via Records Center

Please note not all public documents are available in electronic format. If the document(s) requested are not available ele
we will make them available for inspection or by paper copy in accordance with the Public Records Law.

Starting Time Period of Requested Records: 01/01/1930

TO

Ending Time Period of Requested Records: 07/16/2025

Under penalty of N.J.S.A. 2C:28-3, I certify that

I **HAVE** or **HAVE NOT** been convicted of any indictable offense under the laws of New Jersey, or any other state, or the Uni

Convicted of an indictable offense: I Have Not

I or another person, **WILL** or **WILL NOT** use the requested government records for a commercial purpose.

Use of records for commercial purpose: I Will

I **AM** or **AM NOT** seeking records in connection with a legal proceeding.

In connection with a legal proceeding : I Am Not

Note: If you confirmed above that the records sought are in connection with a legal proceeding, including a pending discovery request, identification of that proceeding is required below.

Print Your Name in the Adjacent Field: Victor Mai

Certify this form by entering your name in the field above. If submitting anonymously, please enter ANONYMOUS in the above field.

Pursuant to New Jersey law, the requestor of a County record generally must be granted access to the requested records or the request must be denied no later than seven (7) business days after the County receives the request, provided that the record is currently available and not in use, in storage or archived. Immediate access ordinarily shall be granted for budgets, bills, vouchers, contracts and government employee's salary and overtime information. If the record is unavailable because it is in use, in storage or archived, then the requestor must be so advised within seven (7) business days after receipt of the request, and further advised as to when the record shall be made available. If the requestor has not provided a name, address, telephone number, or other means of contacting the requestor, no response is required until the requestor reappears seeking a response to the original request.

The requestor agrees to pay the fees due (total amount calculated by County as per Assembly Bill 559 and Senate Bill 1212 – legislation that passed both houses which amends N.J.S.A. 47:1A-5b -

All matters relating to the response and access of any records identified for this request should be directed to:

NJDEP – Office of Record Access
401 East State Street
PO Box 420 Mail Code 401-06Q
Trenton, New Jersey 08625-0420

Tele #: (609) 341-3121
Fax #: (609) 292-1177

Record Request Details:

I am conducting an environmental due diligence on the above referenced property and seek all identifiable remedial, permitting, compliance, and enforcement records. PI ID: 147339, PI Name: 1240 WALNUT STREET SITE. UST Site ID: 110274.000000

Disposition Notes

Based on this record request,responsive records have been identified and available for access. Requester should contact the Office of Record Access at 609-341-3121 to schedule a file review, copies, or to obtain further information.

Addendum Disposition Notes: Based on this request, responsive records have been located. Please note that the request is very broad and does not define specific records and for that reason; the NJDEP is providing all remedial, permitting, compliance and enforcement records that were able to be identified based on your request from the various NJDEP Programs that have historically provided records in response to Environmental Phase I or Due Diligence (e.g. performing a Preliminary Assessment) requests.

The New Jersey Department of Environmental Protection has responded to your submitted Open Public Records Act (OPRA) record request. The following information will help you understand the response and your next available actions.

Tracking #: This is the Department's assigned Tracking # to your OPRA record request, which should be used in all corresponding matters.

Record Request Response:

- **In Progress** – Based on the nature of the request, the records sought, and/or the manner to which the records may exists, the Department requires additional time to investigate and respond to the request.
- **Filled** – Based on the information provided in your request, the Department was able to investigate and respond to your record request.
- **Denied** – Based on the nature of the request and/or the records sought, the Department has denied your request pursuant to a specific exemption(s) cited in N.J.S.A. 47:1A-1 seq.
- **Partial** – The Department has identified both responsive government records and records being denied based on the nature of the request and/or the records sought, that do not meet the definition of a government record pursuant to a specific exemption(s) cited in N.J.S.A. 47:1A-1 seq.

Disposition Notes: Provides detailed information concerning the Department's response to your request.

Accessing Records: Dependent on the volume of records and your interest, there are five (5) methods available to access the responsive government records:

- **File Review** – Schedule a file review with the Department to directly access the records and take notes or tag records of interest for copying. Copying can be performed by either the Department's onsite Copying Unit at State duplication fee costs or by the requester employing a Copy Vendor Service. If there are records stored in archives, a five-day processing period will be included prior to scheduling a review.
- **Copy Request** – All records of interest will be copied by the Department's onsite Copying Unit at State duplication fee costs unless a Copy Vendor Service is employed.
- **Electronic Records Request** – Dependent on the size & nature of the e-records, the Department will email the records or provide a CD or DVD.
- **Fax Request** – Based on the number of pages, the Department faxes the responsive records.

Access to Government Records Under the New Jersey Open Public Records Act (N.J.S.A. 47:1A-1 et seq.)

- **Web Access** – The responsive records can be access directly through the Department's web site. Web address will be provided.

1. The fees for duplication of a government record are specified below. We will notify you of any special charges, special service charges or other additional charges authorized by State law or regulation before processing your request. Payment shall be made by check or money order payable to the State of New Jersey and mailed to the address specified below.

   Hard Copies: Letter & Legal size = $0.05 per page
   Oversized Maps (Color) = $5.00 per map
   Oversized Maps (B&W) = $3.00 per map

   Electronic Records: CDs = $0.55 per CD
   DVDs = $0.55 per DVD

2. Pursuant to OPRA (C.47:1A-5c & C47:1A-5d), the Department will apply special service charge for any extraordinary expenditure of time and effort to accommodate a request. The special service charge will be based on the actual direct cost of providing the records. The requester shall have the opportunity to review and object to the charge prior to it being incurred; however, in the event the requester objects to the special service charge, the request will be closed and access to the records will not be granted.

3. By law, the Department must notify you that it grants or denies a request for access to government records within seven business days after the custodian of the record requested receives the request, provided that the record is currently available and not in storage. If the record requested is not currently available or is in storage, the custodian will advise you within seven business days when the record can be made available and the estimated cost. You may agree with the custodian to extend the time for making records available, or granting or denying your request.

4. You may be denied access to a government record if your request would substantially disrupt agency operations and the custodian is unable to reach a reasonable solution with you.

5. If the Department was unable to comply with your request for access to a government record, the custodian will indicate the reasons for denial on the request form.

6. Except as otherwise provided by law or by agreement with the requester, if the custodian of the record requested fails to respond to you within seven business days of receiving a request form, the failure to respond will be considered a denial of your request.

7. **Resolution of Disputed Findings:**

   In the event that a requester does not agree with the Department's record response, the requester should:

   No Records - Reexamined the request details to evaluate if all of the information was provided that could aid the Department in locating records. The Department's ability to identify records of interest is in direct correlation to matching the Department information with the information provided on the request. Such important identifiers are Facility/Site Name, Address, Case #, Permit #, Block/Lot.

   Denial - If your request for access to a government record has been denied or unfilled within the time permitted by law, you have a right to challenge the decision by the Department to deny access. The Department denies access to records only when those records do not meet the definition of a government record and/or public access is not allowed pursuant to the law. At your option, you may either:

   a. Contact the Office of Record Access to re-visit the matter or provide further explanation.

   b. Institute a proceeding in the Superior Court of New Jersey

   c. File a complaint in writing with the Government Records Council (GRC). You may contact the GRC by toll-free telephone at 866-850-0511, by mail at PO Box 819, Trenton, NJ, 08625, by e-mail at *grc@dca.state.nj.us*, or at their web site at *www.state.nj.us/grc*. The Council can also respond to other questions about the law.

8. Information provided on this form may be subject to disclosure under the Open Public Records Act.

The New Jersey Department of Environmental Protection has responded to your submitted Open Public Records Act (OPRA) record request. The following information will help you understand the response and your next available actions.

Tracking #: This is the Department's assigned Tracking # to your OPRA record request, which should be used in all corresponding matters.

Record Request Response:

- **In Progress** – Based on the nature of the request, the records sought, and/or the manner to which the records may exists, the Department requires additional time to investigate and respond to the request.
- **Filled** – Based on the information provided in your request, the Department was able to investigate and respond to your record request.
- **Denied** – Based on the nature of the request and/or the records sought, the Department has denied your request pursuant to a specific exemption(s) cited in N.J.S.A. 47:1A-1 seq.
- **Partial** – The Department has identified both responsive government records and records being denied based on the nature of the request and/or the records sought, that do not meet the definition of a government record pursuant to a specific exemption(s) cited in N.J.S.A. 47:1A-1 seq.

Disposition Notes: Provides detailed information concerning the Department's response to your request.

Accessing Records: Dependent on the volume of records and your interest, there are five (5) methods available to access the responsive government records:

- **File Review** – Schedule a file review with the Department to directly access the records and take notes or tag records of interest for copying. Copying can be performed by either the Department's onsite Copying Unit at State duplication fee costs or by the requester employing a Copy Vendor Service. If there are records stored in archives, a five-day processing period will be included prior to scheduling a review.
- **Copy Request** – All records of interest will be copied by the Department's onsite Copying Unit at State duplication fee costs unless a Copy Vendor Service is employed.
- **Electronic Records Request** – Dependent on the size & nature of the e-records, the Department will email the records or provide a CD or DVD.
- **Fax Request** – Based on the number of pages, the Department faxes the responsive records.

Access to Government Records Under the New Jersey Open Public Records Act (N.J.S.A. 47:1A-1 et seq.)

- **Web Access** – The responsive records can be access directly through the Department's web site. Web address will be provided.

1. The fees for duplication of a government record are specified below. We will notify you of any special charges, special service charges or other additional charges authorized by State law or regulation before processing your request. Payment shall be made by check or money order payable to the State of New Jersey and mailed to the address specified below.

   Hard Copies: Letter & Legal size = $0.05 per page
   Oversized Maps (Color) = $5.00 per map
   Oversized Maps (B&W) = $3.00 per map

   Electronic Records: CDs = $0.55 per CD
   DVDs = $0.55 per DVD

2. Pursuant to OPRA (C.47:1A-5c & C47:1A-5d), the Department will apply special service charge for any extraordinary expenditure of time and effort to accommodate a request. The special service charge will be based on the actual direct cost of providing the records. The requester shall have the opportunity to review and object to the charge prior to it being incurred; however, in the event the requester objects to the special service charge, the request will be closed and access to the records will not be granted.

3. By law, the Department must notify you that it grants or denies a request for access to government records within seven business days after the custodian of the record requested receives the request, provided that the record is currently available and not in storage. If the record requested is not currently available or is in storage, the custodian will advise you within seven business days when the record can be made available and the estimated cost. You may agree with the custodian to extend the time for making records available, or granting or denying your request.

4. You may be denied access to a government record if your request would substantially disrupt agency operations and the custodian is unable to reach a reasonable solution with you.

5. If the Department was unable to comply with your request for access to a government record, the custodian will indicate the reasons for denial on the request form.

6. Except as otherwise provided by law or by agreement with the requester, if the custodian of the record requested fails to respond to you within seven business days of receiving a request form, the failure to respond will be considered a denial of your request.

7. **Resolution of Disputed Findings:**

   In the event that a requester does not agree with the Department's record response, the requester should:

   No Records - Reexamined the request details to evaluate if all of the information was provided that could aid the Department in locating records. The Department's ability to identify records of interest is in direct correlation to matching the Department information with the information provided on the request. Such important identifiers are Facility/Site Name, Address, Case #, Permit #, Block/Lot.

   Denial - If your request for access to a government record has been denied or unfilled within the time permitted by law, you have a right to challenge the decision by the Department to deny access. The Department denies access to records only when those records do not meet the definition of a government record and/or public access is not allowed pursuant to the law. At your option, you may either:

   a. Contact the Office of Record Access to re-visit the matter or provide further explanation.

   b. Institute a proceeding in the Superior Court of New Jersey

   c. File a complaint in writing with the Government Records Council (GRC). You may contact the GRC by toll-free telephone at 866-850-0511, by mail at PO Box 819, Trenton, NJ, 08625, by e-mail at *grc@dca.state.nj.us*, or at their web site at *www.state.nj.us/grc*. The Council can also respond to other questions about the law.

The New Jersey Department of Environmental Protection has responded to your submitted Open Public Records Act (OPRA) record request. The following information will help you understand the response and your next available actions.

Tracking #: This is the Department's assigned Tracking # to your OPRA record request, which should be used in all corresponding matters.

Record Request Response:

- **In Progress** – Based on the nature of the request, the records sought, and/or the manner to which the records may exists, the Department requires additional time to investigate and respond to the request.
- **Filled** – Based on the information provided in your request, the Department was able to investigate and respond to your record request.
- **Denied** – Based on the nature of the request and/or the records sought, the Department has denied your request pursuant to a specific exemption(s) cited in N.J.S.A. 47:1A-1 seq.
- **Partial** – The Department has identified both responsive government records and records being denied based on the nature of the request and/or the records sought, that do not meet the definition of a government record pursuant to a specific exemption(s) cited in N.J.S.A. 47:1A-1 seq.

Disposition Notes: Provides detailed information concerning the Department's response to your request.

Accessing Records: Dependent on the volume of records and your interest, there are five (5) methods available to access the responsive government records:

- **File Review** – Schedule a file review with the Department to directly access the records and take notes or tag records of interest for copying. Copying can be performed by either the Department's onsite Copying Unit at State duplication fee costs or by the requester employing a Copy Vendor Service. If there are records stored in archives, a five-day processing period will be included prior to scheduling a review.
- **Copy Request** – All records of interest will be copied by the Department's onsite Copying Unit at State duplication fee costs unless a Copy Vendor Service is employed.
- **Electronic Records Request** – Dependent on the size & nature of the e-records, the Department will email the records or provide a CD or DVD.
- **Fax Request** – Based on the number of pages, the Department faxes the responsive records.

Access to Government Records Under the New Jersey Open Public Records Act (N.J.S.A. 47:1A-1 et seq.)

- **Web Access** – The responsive records can be access directly through the Department's web site. Web address will be provided.

1. The fees for duplication of a government record are specified below. We will notify you of any special charges, special service charges or other additional charges authorized by State law or regulation before processing your request. Payment shall be made by check or money order payable to the State of New Jersey and mailed to the address specified below.

   Hard Copies: Letter & Legal size = $0.05 per page
   Oversized Maps (Color) = $5.00 per map
   Oversized Maps (B&W) = $3.00 per map

   Electronic Records: CDs = $0.55 per CD
   DVDs = $0.55 per DVD

2. Pursuant to OPRA (C.47:1A-5c & C47:1A-5d), the Department will apply special service charge for any extraordinary expenditure of time and effort to accommodate a request. The special service charge will be based on the actual direct cost of providing the records. The requester shall have the opportunity to review and object to the charge prior to it being incurred; however, in the event the requester objects to the special service charge, the request will be closed and access to the records will not be granted.

3. By law, the Department must notify you that it grants or denies a request for access to government records within seven business days after the custodian of the record requested receives the request, provided that the record is currently available and not in storage. If the record requested is not currently available or is in storage, the custodian will advise you within seven business days when the record can be made available and the estimated cost. You may agree with the custodian to extend the time for making records available, or granting or denying your request.

4. You may be denied access to a government record if your request would substantially disrupt agency operations and the custodian is unable to reach a reasonable solution with you.

5. If the Department was unable to comply with your request for access to a government record, the custodian will indicate the reasons for denial on the request form.

6. Except as otherwise provided by law or by agreement with the requester, if the custodian of the record requested fails to respond to you within seven business days of receiving a request form, the failure to respond will be considered a denial of your request.

7. **Resolution of Disputed Findings:**

   In the event that a requester does not agree with the Department's record response, the requester should:

   No Records - Reexamined the request details to evaluate if all of the information was provided that could aid the Department in locating records. The Department's ability to identify records of interest is in direct correlation to matching the Department information with the information provided on the request. Such important identifiers are Facility/Site Name, Address, Case #, Permit #, Block/Lot.

   Denial - If your request for access to a government record has been denied or unfilled within the time permitted by law, you have a right to challenge the decision by the Department to deny access. The Department denies access to records only when those records do not meet the definition of a government record and/or public access is not allowed pursuant to the law. At your option, you may either:

   a. Contact the Office of Record Access to re-visit the matter or provide further explanation.

   b. Institute a proceeding in the Superior Court of New Jersey

   c. File a complaint in writing with the Government Records Council (GRC). You may contact the GRC by toll-free telephone at 866-850-0511, by mail at PO Box 819, Trenton, NJ, 08625, by e-mail at *grc@dca.state.nj.us*, or at their web site at *www.state.nj.us/grc*. The Council can also respond to other questions about the law.

The New Jersey Department of Environmental Protection has responded to your submitted Open Public Records Act (OPRA) record request. The following information will help you understand the response and your next available actions.

Tracking #: This is the Department's assigned Tracking # to your OPRA record request, which should be used in all corresponding matters.

Record Request Response:

- **In Progress** – Based on the nature of the request, the records sought, and/or the manner to which the records may exists, the Department requires additional time to investigate and respond to the request.
- **Filled** – Based on the information provided in your request, the Department was able to investigate and respond to your record request.
- **Denied** – Based on the nature of the request and/or the records sought, the Department has denied your request pursuant to a specific exemption(s) cited in N.J.S.A. 47:1A-1 seq.
- **Partial** – The Department has identified both responsive government records and records being denied based on the nature of the request and/or the records sought, that do not meet the definition of a government record pursuant to a specific exemption(s) cited in N.J.S.A. 47:1A-1 seq.

Disposition Notes: Provides detailed information concerning the Department's response to your request.

Accessing Records: Dependent on the volume of records and your interest, there are five (5) methods available to access the responsive government records:

- **File Review** – Schedule a file review with the Department to directly access the records and take notes or tag records of interest for copying. Copying can be performed by either the Department's onsite Copying Unit at State duplication fee costs or by the requester employing a Copy Vendor Service. If there are records stored in archives, a five-day processing period will be included prior to scheduling a review.
- **Copy Request** – All records of interest will be copied by the Department's onsite Copying Unit at State duplication fee costs unless a Copy Vendor Service is employed.
- **Electronic Records Request** – Dependent on the size & nature of the e-records, the Department will email the records or provide a CD or DVD.
- **Fax Request** – Based on the number of pages, the Department faxes the responsive records.

Access to Government Records Under the New Jersey Open Public Records Act (N.J.S.A. 47:1A-1 et seq.)

- **Web Access** – The responsive records can be access directly through the Department's web site. Web address will be provided.

1. The fees for duplication of a government record are specified below. We will notify you of any special charges, special service charges or other additional charges authorized by State law or regulation before processing your request. Payment shall be made by check or money order payable to the State of New Jersey and mailed to the address specified below.

   Hard Copies: Letter & Legal size = $0.05 per page
   Oversized Maps (Color) = $5.00 per map
   Oversized Maps (B&W) = $3.00 per map

   Electronic Records: CDs = $0.55 per CD
   DVDs = $0.55 per DVD

2. Pursuant to OPRA (C.47:1A-5c & C47:1A-5d), the Department will apply special service charge for any extraordinary expenditure of time and effort to accommodate a request. The special service charge will be based on the actual direct cost of providing the records. The requester shall have the opportunity to review and object to the charge prior to it being incurred; however, in the event the requester objects to the special service charge, the request will be closed and access to the records will not be granted.

3. By law, the Department must notify you that it grants or denies a request for access to government records within seven business days after the custodian of the record requested receives the request, provided that the record is currently available and not in storage. If the record requested is not currently available or is in storage, the custodian will advise you within seven business days when the record can be made available and the estimated cost. You may agree with the custodian to extend the time for making records available, or granting or denying your request.

4. You may be denied access to a government record if your request would substantially disrupt agency operations and the custodian is unable to reach a reasonable solution with you.

5. If the Department was unable to comply with your request for access to a government record, the custodian will indicate the reasons for denial on the request form.

6. Except as otherwise provided by law or by agreement with the requester, if the custodian of the record requested fails to respond to you within seven business days of receiving a request form, the failure to respond will be considered a denial of your request.

7. **Resolution of Disputed Findings:**

   In the event that a requester does not agree with the Department's record response, the requester should:

   No Records - Reexamined the request details to evaluate if all of the information was provided that could aid the Department in locating records. The Department's ability to identify records of interest is in direct correlation to matching the Department information with the information provided on the request. Such important identifiers are Facility/Site Name, Address, Case #, Permit #, Block/Lot.

   Denial - If your request for access to a government record has been denied or unfilled within the time permitted by law, you have a right to challenge the decision by the Department to deny access. The Department denies access to records only when those records do not meet the definition of a government record and/or public access is not allowed pursuant to the law. At your option, you may either:

   a. Contact the Office of Record Access to re-visit the matter or provide further explanation.

   b. Institute a proceeding in the Superior Court of New Jersey

   c. File a complaint in writing with the Government Records Council (GRC). You may contact the GRC by toll-free telephone at 866-850-0511, by mail at PO Box 819, Trenton, NJ, 08625, by e-mail at *grc@dca.state.nj.us*, or at their web site at *www.state.nj.us/grc*. The Council can also respond to other questions about the law.

GOVERNMENT RECORDS REQUEST FORM

IMPORTANT NOTICE

Please read this entire form carefully as it contains important information concerning the response to your record request, accessing records, disputing denials, and your rights concerning government records. For further information, access WWW.NJ.GOV/DEP/OPRA.

Requestor Information

First Name: **VICTOR** MI Last Name **MAI**

Company: **PENNONI**

Mailing Address: **515 GROVE ST SUITE 1B**

City: Haddon Heights State: **NJ** Zip: **08035** Email: **vmai@pennoni.com**

Business Telephone: **((60) 9) -254-** Extension **9780**

Facsimile Telephone: () -

State Use Only

Tracking #	**380070**
Received Date	**07/16/2025**
Access Method	**Send Electronic copies**

All matters relating to the response and access of any records identified for this request should be directed to:

NJDEP – Office of Record Access
401 East State Street
PO Box 420 Mail Code 401-06Q
Trenton, New Jersey 08625-0420

Tele #: (609) 341-3121
Fax #: (609) 292-1177

Record Request Details:

I am conducting an environmental due diligence on the above referenced property and seek all identifiable remedial, permitting, compliance, and enforcement records.

Disposition Notes

Based on the record request, no responsive records have been identified. Requester should contact the Office of Record Access at 609-341-3121 with any questions.

Addendum Disposition Notes: Based on this request, no responsive records have been located. Please note that the request is very broad and does not define specific records and for that reason; the NJDEP searched for any remedial, permitting and enforcement records from the various NJDEP Programs that have historically provided records in response to Environmental Phase I or Due Diligence (e.g. performing a Preliminary Assessment) requests.

Information Regarding the Requested Records		
If your request is in reference to a single facility, please provide the name of the facility, and the name of the operator name of the facility:	Facility Name: Operator Name:	
Please provide the owner name the facility or parcel of land:	Owner Name:	
If your request is in reference to a specific parcel of land, please provide the street address, block, lot and property owner of the parcel of land: (Note: if the property in question is over multiple blocks and lots, please list all in the description field below)	Street Address 1: **1206-1208 Walnut St** Street Address 2: Block: **1286** Lot: **7 & 8**	
If your request is in reference to a facility, site or parcel of land, please provide the Municipality and County where the facility, site or parcel of land is located:	County: **Camden** Municipality: **Camden City**	
If the request is in reference to a particular permit issued by NJDEP, please provide the type of permit and any identifying numbers such as permit, incident or case numbers. (i.e. Fishing, Hunting, Hazardous Waste, Solid Waste, Land Use, NJPDES, Pesticides, Stream Encroachment, TWA, UST, Water Allocation)	List Permit Type:	List ID Numbers:
If your request is in reference to an individual, please provide the individual's name and type, and if the individual is a DEP employee, your relationship with the individual:	Individual's name: Type of Individual: Relationship:	
If the an individual was specified above, the individual was DEP Licensed, please specify the license type the individual holds:	License Type:	

The New Jersey Department of Environmental Protection has responded to your submitted Open Public Records Act (OPRA) record request. The following information will help you understand the response and your next available actions.

Tracking #: This is the Department's assigned Tracking # to your OPRA record request, which should be used in all corresponding matters.

Record Request Response:

- **In Progress** – Based on the nature of the request, the records sought, and/or the manner to which the records may exists, the Department requires additional time to investigate and respond to the request.
- **Filled** – Based on the information provided in your request, the Department was able to investigate and respond to your record request.
- **Denied** – Based on the nature of the request and/or the records sought, the Department has denied your request pursuant to a specific exemption(s) cited in N.J.S.A. 47:1A-1 seq.
- **Partial** – The Department has identified both responsive government records and records being denied based on the nature of the request and/or the records sought, that do not meet the definition of a government record pursuant to a specific exemption(s) cited in N.J.S.A. 47:1A-1 seq.

Disposition Notes: Provides detailed information concerning the Department's response to your request.

Accessing Records: Dependent on the volume of records and your interest, there are five (5) methods available to access the responsive government records:

- **File Review** – Schedule a file review with the Department to directly access the records and take notes or tag records of interest for copying. Copying can be performed by either the Department's onsite Copying Unit at State duplication fee costs or by the requester employing a Copy Vendor Service. If there are records stored in archives, a five-day processing period will be included prior to scheduling a review.
- **Copy Request** – All records of interest will be copied by the Department's onsite Copying Unit at State duplication fee costs unless a Copy Vendor Service is employed.
- **Electronic Records Request** – Dependent on the size & nature of the e-records, the Department will email the records or provide a CD or DVD.
- **Fax Request** – Based on the number of pages, the Department faxes the responsive records.

Access to Government Records Under the New Jersey Open Public Records Act (N.J.S.A. 47:1A-1 et seq.)

- **Web Access** – The responsive records can be access directly through the Department's web site. Web address will be provided.

1. The fees for duplication of a government record are specified below. We will notify you of any special charges, special service charges or other additional charges authorized by State law or regulation before processing your request. Payment shall be made by check or money order payable to the State of New Jersey and mailed to the address specified below.

   Hard Copies: Letter & Legal size = $0.05 per page
   Oversized Maps (Color) = $5.00 per map
   Oversized Maps (B&W) = $3.00 per map

   Electronic Records: CDs = $0.55 per CD
   DVDs = $0.55 per DVD

2. Pursuant to OPRA (C.47:1A-5c & C47:1A-5d), the Department will apply special service charge for any extraordinary expenditure of time and effort to accommodate a request. The special service charge will be based on the actual direct cost of providing the records. The requester shall have the opportunity to review and object to the charge prior to it being incurred; however, in the event the requester objects to the special service charge, the request will be closed and access to the records will not be granted.

3. By law, the Department must notify you that it grants or denies a request for access to government records within seven business days after the custodian of the record requested receives the request, provided that the record is currently available and not in storage. If the record requested is not currently available or is in storage, the custodian will advise you within seven business days when the record can be made available and the estimated cost. You may agree with the custodian to extend the time for making records available, or granting or denying your request.

4. You may be denied access to a government record if your request would substantially disrupt agency operations and the custodian is unable to reach a reasonable solution with you.

5. If the Department was unable to comply with your request for access to a government record, the custodian will indicate the reasons for denial on the request form.

6. Except as otherwise provided by law or by agreement with the requester, if the custodian of the record requested fails to respond to you within seven business days of receiving a request form, the failure to respond will be considered a denial of your request.

7. **Resolution of Disputed Findings:**

   In the event that a requester does not agree with the Department's record response, the requester should:

   No Records - Reexamined the request details to evaluate if all of the information was provided that could aid the Department in locating records. The Department's ability to identify records of interest is in direct correlation to matching the Department information with the information provided on the request. Such important identifiers are Facility/Site Name, Address, Case #, Permit #, Block/Lot.

   Denial - If your request for access to a government record has been denied or unfilled within the time permitted by law, you have a right to challenge the decision by the Department to deny access. The Department denies access to records only when those records do not meet the definition of a government record and/or public access is not allowed pursuant to the law. At your option, you may either:

   a. Contact the Office of Record Access to re-visit the matter or provide further explanation.

   b. Institute a proceeding in the Superior Court of New Jersey

   c. File a complaint in writing with the Government Records Council (GRC). You may contact the GRC by toll-free telephone at 866-850-0511, by mail at PO Box 819, Trenton, NJ, 08625, by e-mail at *grc@dca.state.nj.us*, or at their web site at *www.state.nj.us/grc*. The Council can also respond to other questions about the law.

AREA 1

ASTM E1527-21 USER QUESTIONNAIRE

When the "user" (the party for whom the assessment is being prepared) of the Phase I is required to help the environmental professional identify recognized environmental conditions at the property, a "User Questionnaire" is completed by the user to help gather information that may identify recognized environmental conditions at the property.

We ask that you answer the six questions below to the best of your knowledge. We understand that, in some circumstances, you may have little or no information. Still, we encourage you to complete and return the questionnaire as soon as possible. This will allow us to reflect the fact that the Questionnaire was completed when we issue our report as is required. Completion of the assessment to the new standard, when conducted in connection with the asset purchase of a real property, may entitle the user to certain federal liability protections that result from conducting "All Appropriate Inquiries" into the previous ownership and uses of a property.

On the second page of this form is a list of documentation. The E1527-21 Standard requires that the User will ensure that the consultant is made aware that any of these materials exist for a site, and if so, that these documents be provided for the consultant's review. Please indicate whether any of these documents are available, and ensure that Environmental Services Company will either receive copies or be provided an opportunity to review the relevant materials.

We appreciate your assistance. If you have any questions, feel free to contact us.

1. Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?

   No

2. Are you aware of any Activity and Use Limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?

   No

3. As the user of this ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

   No

4. Does the purchase price/loan amount for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

   Yes

5. Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user, (a.) Do you know the past uses of the property? (b.) Do you know of specific chemicals that are present or once were present at the property? (c.) Do you know of spills or other chemical releases that have taken place at the property? (d.) Do you know of any environmental cleanups that have taken place at the property?

   No

6. As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property?

   No

ASTM E1527-21 USER QUESTIONNAIRE

As part of this study, which of the following are you providing?

1. Previous environmental site assessment reports ◯ Yes ◉ No
2. Environmental compliance audit reports ◯ Yes ◉ No
3. Environmental permits (including but not limited to solid waste disposal permits, hazardous waste disposal permits, wastewater permits, NPDES permits, underground injection permits) ◯ Yes ◉ No
4. Registrations for underground and aboveground storage tanks ◯ Yes ◉ No
5. Registrations for underground injection systems ◯ Yes ◉ No
6. Material safety data sheets ◯ Yes ◉ No
7. Community Right-to-Know plan ◯ Yes ◉ No
8. Safety plans; preparedness and prevention plans; spill prevention, countermeasure, and control plans; etc. ◯ Yes ◉ No
9. Reports regarding hydrogeologic conditions on the property or surrounding area ◯ Yes ◉ No
10. Notices or other correspondence from any government agency relating to past or current violations of environmental laws with respect to the property or relating to environmental liens encumbering the property ◯ Yes ◉ No
11. Hazardous waste generator notices or reports ◯ Yes ◉ No
12. Geotechnical studies ◯ Yes ◉ No
13. Risk assessments ◯ Yes ◉ No
14. Recorded Activity and Use Limitations (AULs). ◯ Yes ◉ No

Please contact us if you have any questions regarding these ASTM requirements.

30 DAY NOTICE OF INTENT TO CLOSE AN UNDERGROUND STORAGE TANK SYSTEM

Submission of this notification satisfies the requirements of N.J.A.C. 7:14B-9.2. An Underground Storage Tank Facility Questionnaire must be completed and submitted to the Department upon completion of the closure activities.

Do not use this form to notify the Department of a request for a variance from the Technical Requirements of Site Remediation, N.J.A.C. 7:26E. Instead, use a Closure Plan Approval Application, UST-013, XX/XX.

- Please type or print legibly in ink. Call 609/633-0708 for help in completing this notification.
- Please sign and return one original of this form to the address above.
- The UST system must be registered. If the UST system is not registered this form will be returned and not processed.

Facility Registration # ~~0 _ _ _ _ _ N/A~~ 147339

Date Underground Storage Tank(s) and/or piping will be removed From Jan. 30, 2002

A. FACILITY NAME 1240 Walnut UST

FACILITY STREET ADDRESS 1240 Walnut Street

MUNICIPALITY Camden County Camden

TELEPHONE NUMBER (856) 966-2633

B. OWNER'S NAME Camden City Board of Education

STREET ADDRESS OR P.O. BOX NUMBER 201 N. Front St CITY Camden

30 days Notification, UST Closure

Dear Mr. Cannaham:

Attached please find a 30-Days Notification form for your approval for the removal of four USTs identified at the 1240 Walnut site through an excavation work performed on December 4, 2001.

The USTS were not registered with the state, a registration form along with the appropriate fees has been forwarded to the NJDEP for the above referenced UST.

Please do not hesitate to contact me with any questions or comments regarding these USTs. Your cooperation on this important project is very much appreciated.

Sincerely,
SmithCo Group, Inc.

SECTION C. SITE USE

Current Site Use (check all that apply)

- ☐ Industrial
- ☐ Residential
- ☐ Commercial
- ☐ School or child care
- ☐ Agricultural
- ☐ Park or recreational use
- ☒ Vacant
- ☐ Government
- ☒ Other: Former garage

Intended Future Site Use, if known (check all that apply)

- ☐ Industrial
- ☐ Residential
- ☐ Commercial
- ☐ School or child care
- ☐ Park or recreational use
- ☐ Vacant
- ☐ Government
- ☒ Future site use unknown

SECTION D. CASE TYPE: (check all that apply)

- ☐ Administrative Consent Order (ACO)
- ☐ Brownfield Development Area (BDA)
- ☐ Child Care Facility
- ☐ Chrome Site (Chromate chemical production waste)
- ☐ Coal Gas
- ☐ Due Diligence with RAO
- ☐ Hazardous Discharge Remediation Fund (HDSRF) Grant/Loan
- ☐ ISRA
- ☐ Landfill (SRP subject only)
- ☒ Regulated Underground Storage Tank (UST)
- ☐ Remediation Agreement (RA)
- ☐ School Development Authority (SDA)
- ☐ School facility
- ☐ Spill Act Defense – Government Entity
- ☐ Spill Act Discharge
- ☐ UST Grant/Loan

Federal Case (check all that apply)

☐ **RCRA GPRA 2020** ☐ **CERCLA/NPL** ☐ **USDOD** ☐ **USDOE** ☐ TSCA

☐ Other (explain): _____

SECTION E. PUBLIC FUNDS

Did the remediation utilize public funds? ☐ Yes ☒ No

If "Yes," check applicable:

- ☐ UST Grant
- ☐ UST Loan
- ☐ Brownfield Reimbursement Program
- ☐ HDSRF Grant
- ☐ HDSRF Loan
- ☐ Landfill Reimbursement Program
- ☐ Spill Fund
- ☐ Schools Development Authority

SECTION F. GENERAL

1. Was an inspection of the site conducted? ☒ Yes ☐ No ☐ NA
   Date of the inspection 04/10/2014
2. Did the PA identify any areas of concern? ☐ Yes ☐ No ☒ NA
   If "Yes," please complete section H2.
3. What page or appendix is the site map indicating all of the areas of concern located? _____
4. Did the PA identify any current or historic industrial, commercial, agricultural or residential use at the site dating back to the time the site was naturally vegetated? ☐ Yes ☐ No ☒ NA
   If "Yes," please complete section H1.
5. Prior to this submittal have any NFAs/RAOs been issued for this site? ☐ Yes ☒ No
   a. Does the site currently have a Deed Notice? ☐ Yes ☒ No
   b. Does the site currently have a Classification Exemption Area (CEA)? ☐ Yes ☒ No
   c. Has an order of magnitude evaluation been performed? ☐ Yes ☒ No

6. Is the ground water at the site classified as a Class I Ground Water? ☐ Yes ☒ No

7. Are there potable wells on-site? ☐ Yes ☒ No

8. Has a well search been conducted pursuant to N.J.A.C. 7:26E-1.14? ☐ Yes ☒ No

   a. If "Yes," are there any potable wells within 200' of the AOCs listed in H2 or within 200' of the site boundary? ☐ Yes ☐ No

9. Is an environmentally sensitive natural resource (ESNR) present on, adjacent to, or potentially impacted by the site? ☐ Yes ☒ No

   a. If "Yes," are there visible signs of impact/impairment (e.g., discolored media, stressed vegetation, discharge/spill, seeps, fish kill)? ☐ Yes ☐ No

   b. Does the site contain any land use features (e.g. wetlands, flood hazard area, etc.) that will be impacted by sampling activities? ☐ Yes ☐ No

   c. Have the necessary land use permits been issued to implement this sampling? ☐ Yes ☐ No

      Provide permit #s: _____

   d. Provide a scaled figure that documents the presence or absence of an ESNR.

10. Has the site investigation been completed for:

    Specific Areas Of Concern (AOC)s? ☒ Yes ☐ No

    Entire Site based on a PA? ☐ Yes ☒ No

11. Have all of the potentially contaminated AOCs identified in the PA been addressed within the regulatory timeframe? ☐ Yes ☐ No ☒ NA

SECTION G. SITE INFORMATION

G1. Current and Historic Operators/Operations (attach additional sheets as necessary)

Name of Operator	Type of Operation – e.g., dry cleaning, electro-plating, residence	Dates of Operation	
		Start	End

G2. Areas of Concern (For PA or PA/SI Report, list each AOC; for SI Report, list only AOCs documented in this submittal.)

	Area of Concern	Currently Exists? ☒ if "Yes"	Formerly Existed? ☒ if "Yes"	Investigation: SI Conducted ☒ if "Yes"	Investigation: RI Proposed ☒ if "Yes"
1	Above ground storage tank and associated piping	☐	☐	☐	☐
2	Area of stressed vegetation	☐	☐	☐	☐
3	Area which receives flood or storm water from potentially contaminated areas	☐	☐	☐	☐
4	Chemical storage cabinet and closet	☐	☐	☐	☐
5	Compressor vent discharge	☐	☐	☐	☐

	☐	☐	☐	☐		

G4. REGULATED USTs: Complete if any underground storage tanks (USTs) on site are regulated pursuant to N.J.A.C. 7:14B or if a UST Unknown Source Investigation was conducted pursuant to N.J.A.C. 7:14B-7.4.

a. Have all the regulated USTs on site been registered with the NJDEP? ☒ Yes ☐ No

b. Have all incidents related to regulated USTs been remediated/investigated? ☒ Yes ☐ No

c. Have any USTs been removed on/after September 4, 1990? ☒ Yes ☐ No

d. Including this submittal, has an SI/RI report been submitted for all USTs closed on/after September 4, 1990? ☒ Yes ☐ No

e. Was an Unknown Source Investigation conducted per N.J.A.C. 7:14B-7.4? ☐ Yes ☒ No
If "No" skip to G5.

1) Did the investigation identify contamination? ☐ Yes ☐ No
If "No" skip to G5.

2) Was an ongoing release discovered? ☐ Yes ☐ No
If "No" skip to G5.

3) Was the UST system emptied and taken out-of-service? ☐ Yes ☐ No
(Note: A UST Facility Certification Questionnaire must be submitted to update the registration.)

G5. Compliance Check (Complete only if sampling of soil and/or ground water was conducted)

a. Identify the media if impacted above applicable standards/screening levels (check all that apply):
☐ soil ☐ ground water

Type of contamination in soil and ground water above applicable standards/screening levels (check all that apply):

Soil	Ground Water		Soil	Ground Water	
☐	☐	Volatile Organics	☐	☐	PCBs
☐	☐	Polycyclic Aromatic Hydrocarbons(PAHs)	☐	☐	Chromium
☐	☐	Acid Extractables	☐	☐	Dioxin
☐	☐	Base Neutrals (non-PAHs)	☐	☐	Mercury
☐	☐	Metals	☐	☐	Arsenic
☐	☐	Pesticides	☐	☐	Perchlorate, RDX, TNT, etc.
☐	☐	PHC	☐	☐	Other, specify _____

b. For all AOCs at which an SI was conducted and an RI/RA is not proposed, answer the following questions (for those AOCs only):

1) Are any soil analytical results greater than the most stringent Direct Contact Soil Remediation Standards (DCSRS)? ☐ Yes ☒ No

2) Are any soil analytical results greater than the default Impact to Ground Water Soil Screening Levels (IGWSSL)? ☐ Yes ☒ No

3) Are any ground water analytical results greater than the Ground Water Quality Standards (GWQS)? ☐ Yes ☐ No ☒ NA

4) Are any Method Detection Limits (MDLs) greater than the applicable soil and/or ground water standards or screening levels? ☐ Yes ☒ No

5) Are any surface water analytical results greater than the most stringent, both human and ecological, Surface Water Quality Standards? ☐ Yes ☐ No ☒ NA

6) Are any sediment analytical results above the screening levels? ☐ Yes ☐ No ☒ NA

7) Are any soil analytical results greater than Soil Ecological Screening Criteria in an Environmentally Sensitive Natural Resource (ESNR)? ☐ Yes ☐ No ☒ NA

8) Are any analytical results above the vapor intrusion screening levels? ☐ Yes ☐ No ☒ NA

9) Did the SI document, via a background investigation, outside the influence of onsite AOCs and operational areas, determine that:

a) contamination is migrating onto this site per N.J.A.C. 7:26E-3.9 ☐ Yes ☐ No ☒ NA

b) contamination is naturally occurring per N.J.A.C. 7:26E-3.8? ☐ Yes ☐ No ☒ NA

10) Contamination is associated with an ongoing ISRA remediation. ☐ Yes ☐ No ☒ NA

c. Have Alternative Remediation Standards (ARS) been utilized for Inhalation and/or Ingestion/Dermal pathways? ☐ Yes ☒ No

d. Have any site specific Impact to Groundwater Soil Remediation Standards (IGWSRS) been established? ☐ Yes ☒ No

Note: Complete if "Yes" to question b.) 1-4, c. or d. List affected AOC(s) below; attach additional sheets if necessary.

Area of Concern (from G2. above)	Exceeds DCSRS	Exceeds IGWSSL	Exceeds GWQS	MDLs > Standards	ARS	Site Specific IGWSRS	Comments
	☐	☐	☐	☐	☐	☐	
	☐	☐	☐	☐	☐	☐	
	☐	☐	☐	☐	☐	☐	
	☐	☐	☐	☐	☐	☐	
	☐	☐	☐	☐	☐	☐	
	☐	☐	☐	☐	☐	☐	
	☐	☐	☐	☐	☐	☐	
	☐	☐	☐	☐	☐	☐	

SECTION H. LABORATORY DATA (Complete only if sampling of soil and/or ground water was conducted)

1. Were all data submitted in the appropriate full and/or reduced formats according to the deliverables defined in N.J.A.C. 7:26E-2? ☒ Yes ☐ No
2. Do all data submitted meet the quality assurance/quality control (QA/QC) requirements incorporated by reference in N.J.A.C. 7:26E-2 for:
   sampling ☒ Yes ☐ No
   analysis ☒ Yes ☐ No
3. How was it determined that the data complied with the QA/QC requirements?
   - ☒ Laboratory non-conformance summary/narrative
   - ☐ Laboratory correspondence
   - ☒ LSRP review
   - ☐ Independent contractor review
   - ☐ Other: _____
4. Has any data been qualified and used? ☐ Yes ☒ No
5. Has any data been rejected and used? ☐ Yes ☒ No
6. Comments:

SECTION I. ALTERNATIVE STANDARD / VARIANCES

Alternative remediation standard

If proposing an alternative remediation standard pursuant to N.J.A.C. 7:26D-7.4, alternate vapor intrusion screening level, or ecological site specific goal, check here ☐ and attach the Alternative Soil Remediation Standard and/or Screening Level Application Form as an addendum.

A site-specific screening level was developed for the evaluation of the VI pathway ☐ Yes ☒ No

Variance from regulations

If the Licensed Site Remediation Professional has varied from the Technical Rules, provide the citation(s) from which the remediation varied and the page(s) in the attached document where the rationale for the variance is provided.

SECTION J. PERSON RESPONSIBLE FOR CONDUCTING THE REMEDIATION INFORMATION AND CERTIFICATION

Full Legal Name of the Person Responsible for Conducting the Remediation: CAMDEN BOARD OF EDUCATION

Representative First Name: STEVE Representative Last Name: NICOLELLA

Title: DIRECTOR BUILDINGS & GROUNDS Business Affiliation:

Phone Number: (856) 966-4626 Ext: 41400 Fax:

Mailing Address: 901 SOUTH 8TH STREET

City/Town: CAMDEN State: NJ ZIP Code: 08103

Email Address: snicolella@camden.k12.nj.us

This certification shall be signed by the person responsible for conducting the remediation who is submitting this notification in accordance with Administrative Requirements for the Remediation of Contaminated Sites rule at N.J.A.C. 7:26C-1.5(a).

I certify under penalty of law that I have personally examined and am familiar with the information submitted herein, including all attached documents, and that based on my inquiry of those individuals immediately responsible for obtaining the information, to the best of my knowledge, I believe that the submitted information is true, accurate and complete. I am aware that there are significant civil penalties for knowingly submitting false, inaccurate or incomplete information and that I am committing a crime of the fourth degree if I make a written false statement which I do not believe to be true. I am also aware that if I knowingly direct or authorize the violation of any statute, I am personally liable for the penalties.

Signature: Date: 6/17/14

Name/Title: STEVE NICOLELLA /DIRECTOR BUILDINGS & GROUNDS

No changes to contact information since last submittal ☒

SECTION K. LICENSED SITE REMEDIATION PROFESSIONAL INFORMATION AND STATEMENT

LSRP ID Number: 577371

First Name: THOMAS Last Name: SMITH

Phone Number: (856) 795-9595 Ext: 1902 Fax: (856) 795-1883

Mailing Address: 232 KINGS HIGHWAY

City/Town: HADDONFIELD State: NJ Zip Code: 08033

Email Address: THOMAS.SMITH@RVE.COM

This statement shall be signed by the LSRP who is submitting this notification in accordance with SRRA Section 16 d. and Section 30 b.2.

I certify that I am a Licensed Site Remediation Professional authorized pursuant to N.J.S.A. 58:10C to conduct business in New Jersey. As the Licensed Site Remediation Professional of record for this remediation, I:

[SELECT ONE OR BOTH OF THE FOLLOWING AS APPLICABLE]:

☒ *directly oversaw and supervised all of the referenced remediation, and\or*

☒ *personally reviewed and accepted all of the referenced remediation presented herein.*

I believe that the information contained herein, and including all attached documents, is true, accurate and complete.

It is my independent professional judgment and opinion that the remediation conducted at this site, as reflected in this submission to the Department, conforms to, and is consistent with, the remediation requirements in N.J.S.A. 58:10C-14.

My conduct and decisions in this matter were made upon the exercise of reasonable care and diligence, and by applying the knowledge and skill ordinarily exercised by licensed site remediation professionals practicing in good standing, in accordance with N.J.S.A. 58:10C-16, in the State of New Jersey at the time I performed these professional services.

I am aware pursuant to N.J.S.A. 58:10C-17 that for purposely, knowingly or recklessly submitting false statement, representation or certification in any document or information submitted to the board or Department, etc., that there are significant civil, administrative and criminal penalties, including license revocation or suspension, fines and being punished by imprisonment for conviction of a crime of the third degree.

LSRP Signature: Date: 5/23/2014

LSRP Name/Title: THOMAS SMITH / LSRP

Trenton, NJ 08625-0420

2.0 INTRODUCTION

This Site Investigation Report (SIR) has been prepared by Remington & Vernick Engineers on behalf of the Camden City Board of Education (BOE) to document the removal and closure of underground storage tanks (USTs) at the above referenced site. The site is located at 1240 Walnut Street (also reported as 919 Princess Avenue) (Block 365, Lot 6) in Camden, New Jersey and is currently owned by the Camden City BOE. The work was completed under the direction of Thomas Smith, Licensed Site Remediation Professional License No. 577371.

3.0 SITE SETTING, SITE HISTORY AND MOST RECENT OPERATIONS

3.1 Site Setting

The site is identified as 1240 Walnut Street, and is located at the southwest corner of Princess Street and Walnut Street in Camden New Jersey. The property was formerly used as a fuel storage facility and maintenance garage. The Camden City Board of Education reports that the property was acquired as a donation to the Camden City BOE. There were four (4) known underground storage tanks (USTs) reported at the site. A Notice of Intent to close these USTs was originally filed on April 15, 2002, however these tanks were not removed in 2002. The Camden City BOE implemented the tank removal, building demolition, and debris clearing from the site in April 2014. The Notice of Intent to close these tanks is included in Attachment 1.

3.1.1 Geology

The subject site is located within the Raritan-Magothy formations. The Raritan Formation is recognized as a light colored sand, clay and gravel. The Magothy Formation is recognized as a grayish colored clay. These formations underlie the Delaware River and crop out along a three (3) mile belt adjacent to the river and often times cannot be differentiated because of similar lithology.

The soil from the ground surface to approximately 10 feet below grade at the site is essentially fill in the areas that were disturbed to remove the USTs. At the periphery of the tank excavations layers of fill were evident from one to five feet below the ground surface. The lower portions of the USTs appeared to be bedded in native sands.

3.1.2 Hydrogeology

No groundwater was encountered during the tank removal. The depth to groundwater was not determined during the tank removal work.

3.1.3 Surface Water Bodies

There are no surface water bodies in the vicinity of the area of concern. The closest surface water body is a portion of Cooper Lake located approximately 1,100 feet northeast of the site.

3.1.4 Topography

The site is essentially level with an elevation of approximately 15 ft above mean sea level (MSL).

3.1.5 Wetlands

There are no wetlands on/adjacent to the site. The site area is located approximately 1,100 feet southwest from the nearest wetlands area.

3.1.6 Land Use

The subject site is a vacant, fenced, former garage facility with concrete and asphalt paving and a single one-story concrete block building. The area around the site is mixed use residential /commercial/industrial.

3.2 Description of Current Operations

The site is currently owned by the Camden Board of Education and has been vacant for an extended period of time. The site is secured with an eight foot high chain link fence, however there exists openings in the fence at several locations. The dumping of trash, tires, and other debris was prevalent essentially over all of the site including within the remains of the building on the property.

4.0 UST REMOVAL AND SOIL SAMPLING

4.1 Removal of Registered USTs

Remington & Vernick Engineers oversaw the removal of the three (3) former No. 2 fuel tanks, one 500 gallon gasoline tank and one additional 550 gallon waste oil tank from the locations shown on Figure 2.

TTI Environmental Services Inc. (Sewell, New Jersey) completed the aboveground demolition, UST excavation, and UST removal services for the Camden Board of Education. The building demolition included limited asbestos abatement. The documentation for the asbestos disposal is included in Attachment 3.

The contents of the USTs were pumped out by Monarch Environmental Services, LLC (Woodstown, New Jersey) prior to TTI cutting the tops open to permit final cleaning and inspection. The inspection was conducted prior to removal of the tanks from the ground.

No release was evident from the three No. 2 fuel oil tanks or the 500 gallon gasoline tank. Further inspection of the No. 2 fuel oil tanks and the gasoline tank after removal from the excavations found no evidence of pitting or perforations in these tanks and there was no staining or odors in the soils adjacent to the tanks. Soil samples were collected from each tank invert centerline at five foot intervals to confirm that no release had occurred. Upon removal from the ground the three (3) No. 2 fuel oil tanks that were identified in the site UST registration records as 3,000 gallon were confirmed to be 4,000 gallon USTs. A revised facility questionnaire was submitted to NJDEP to update the facility UST records.

4.2 Waste Oil UST and Hydraulic Lift

During the removal of the four (4) registered USTs at the site an additional waste oil UST was discovered adjacent to the northeast corner of the garage building. A hydraulic lift was also discovered in the floor of the garage. The waste oil tank and the hydraulic lift were not visible until a significant amount of debris had been cleared from the building. Upon removal it was confirmed that the hydraulic lift did not include a subsurface hydraulic fluid reservoir and there was no release from the hydraulic cylinder into the surrounding soils. The oil was drained from the hydraulic cylinder and it was transported to the metal recycling facility along with the steel USTs. Disposal documentation is included in Attachment 3.

There was evidence of oil release at the ground surface around the waste oil fill pipe, however the soils beneath the surface were not impacted and the tank itself was in good condition without pitting or perforations and there was no evidence of leakage. The oil impacted soil was limited to a shallow depth above the top of the waste oil tank.

4.3 Soil Sampling

A total of sixteen (16) soil samples were collected to confirm that there were no significant soil impacts from the five USTs at the site. Sample locations and sample designations are shown in Figure 2. Samples were collected at the center-line tank inverts unless otherwise noted in the figure. The samples were taken in accordance with N.J.A.C. 7:26E and the "Field Sampling Procedures Manual". The samples were transported to Aqua Pro Tech Laboratories and analyzed for Extractable Petroleum Hydrocarbons (EPHs). The UST excavations were backfilled with excavated soil and additional clean fill brought on to the site. The imported fill documentation is included in Attachment 3.

The analytical results of the post-excavation soil sampling indicated that all samples tested for EPH contained concentrations below the NJDEP Soil Remediation Standards. Based upon the chemical testing results combined with the field observations, it can be concluded that the USTs did not leak or otherwise release hazardous materials to the surrounding soils. We recommend no further action for the five (5) USTs removed from the site. The chemical test results are summarized on Figure 3 and the analytical reports are contained in Attachment 2.

The following documentation from TTI Environmental Services is included in Attachment 3:

- Local Construction Permit
- Liquid disposal documentation (Monarch environmental Services)
- Clean fill certification and weight tickets
- Metal recycling documentation

5.0 UST CLOSURE CONCLUSIONS

The results from soil samples collected along the UST center-line inverts (Figure 3) confirm the field observations that there was no release from the five (5) USTs removed from the site. Approximately five cubic yards of impacted shallow soil was segregated for off-site disposal at a permitted facility to address the soil contamination from the waste oil fill pipe.

No further investigation is proposed for the following USTs removed from the site:

- Three (3) 4,000 gallon No. 2 fuel oil USTs;
- One (1) 500 gallon gasoline UST;
- One 550 gallon waste oil UST.

The site restoration included final grading and application of seed and mulch for stabilization. The perimeter fencing was restored to prevent future dumping on the property.

6.0 QUALITY ASSURANCE/QUALITY CONTROL

Remington & Vernick Engineers performed the investigation and sampling in accordance with the applicable sections of NJAC 7:26E and the August 2005 edition of the NJDEP Field Sampling Procedures Manual. Fully trained and qualified sampling personnel performed all sampling. Field monitoring equipment is calibrated prior to use according to the manufacturer instructions that are provided with the monitoring equipment.

Remington & Vernick Engineers utilizes the following equipment and procedures for sampling:

Soil

- Stainless steel trowels for sampling 0 to 6 inches below grade when in unconsolidated formations.
- Direct Push Technology drill rigs are utilized whenever possible.
- Backhoe bucket sampling is utilized for test pits and UST excavations. Soil samples are collected from the backhoe bucket with a stainless steel trowel.
- Sample soil on a continuous basis whenever possible.
- All recovered samples are screened for volatile organic compounds utilizing PID/FID, CGI, methane detector and any other applicable field screening monitor based on the suspected contaminants.
- Soils are logged by accepted soil classification system.

Groundwater

- Bottom-fill bailers are utilized for sampling.
- Low Flow Purge Sampling Techniques are utilized for purging and sampling monitoring wells.

General Sampling Procedures

Soil and groundwater sampling equipment, including but not limited to trowels, split spoon samplers and groundwater sampling equipment are properly decontaminated prior to sampling. Sample technicians utilize dedicated groundwater sampling equipment for individual monitoring wells. Equipment for soil sampling is field decontaminated when required (if new/disposable utensils are not used) by the following procedure:

- A detergent scrub and tap water rinse is utilized to remove visual contamination.

- Generous second tap water rinse.
- 10% Nitric Acid rinse.
- Distilled and de-ionized water rinse.

Sample technicians shall collect proper field and trip blanks for chemical testing. The drill rig (auger flights) will be steam cleaned prior mobilization to the Site and between each sampling location when drilling in contaminated areas. Disposable direct push sampling equipment does not require decontamination for sampling. Sampling soils from an excavator bucket will be required with entry of an excavation is not permitted. Soils sampled from an excavator bucket will not include any material that has come in contact with the surface of the excavator bucket. Each sample will be placed in laboratory cleaned and prepared sampling jars and labeled with project number, sample designation, date, time and analysis required. Chain of custody documents will be prepared and accompanied each sample.

All soil, surface water, sediment and groundwater samples are maintained in coolers at 4°C after collection until delivered to an NJDEP certified laboratory for analysis. Please refer to the chemical test results for compliance with holding times, achievement of method detection limits, and precision and accuracy of the analytical methods.

SECTION D. NOTIFICATION TYPE

☒ Notice of Closure of an UST System(s); or

☐ Out of Service UST Extension Request for more than 12 months, and ☐ Site Investigation Report Submitted

Has closure occurred prior to this submittal? ☒ Yes ☐ No

If "Yes," date of closure: 04/10/2014

Name of Company/Individual who performed the closure without approval.

Camden City Public School District;

A Notice of Intent to Close was originally filed on 04/15/2002. That Notice of Intent submittal is attached. No release from the tanks was evident and no release reporting was required. Tank sizes were confirmed upon removal.

SECTION E. CLOSURE INFORMATION

Complete the following information concerning UST system closure.

If piping is being closed without associated tank, please include associated Tank No., Tank Size, and Tank Contents fields and check **PIPING ONLY**.

Tank Closure

Tank No. (i.e., E1)	Length of Piping (ft)	Tank Size (gallons)	Tank Contents*	PIPING ONLY
E001	40	3500	No. 2 Fuel Oil	☐
E002	40	3500	No. 2 Fuel Oil	☐
E003	40	3500	No. 2 Fuel Oil	☐
E004	20	550	Unleaded Gasoline	☐
				☐
				☐
				☐
				☐
				☐
				☐

* If material is a hazardous substance but not a petroleum product, use chemical name and CAS number to identify tank's content. (Brand or trade names are unacceptable).

SECTION F. LICENSED SITE REMEDIATION PROFESSIONAL INFORMATION AND STATEMENT

LSRP ID Number: 577371

First Name: Thomas Last Name: Smith

Phone Number: (856) 795-9595 Ext: Fax: (856) 795-1882

Mailing Address: 232 Kings Highway East

City/Town: Haddonfield State: NJ Zip Code:

Email Address: thomas.smith@RVE.com

This statement shall be signed by the LSRP who is submitting this notification in accordance with SRRA Section 16 d. and Section 30 b.2.

I certify that I am a Licensed Site Remediation Professional authorized pursuant to N.J.S.A. 58:10C to conduct business in New Jersey. As the Licensed Site Remediation Professional of record for this remediation, I:

[SELECT ONE OR BOTH OF THE FOLLOWING AS APPLICABLE]:

☒ *directly oversaw and supervised all of the referenced remediation, and\or*

☒ *personally reviewed and accepted all of the referenced remediation presented herein.*

I believe that the information contained herein, and including all attached documents, is true, accurate and complete.

It is my independent professional judgment and opinion that the remediation conducted at this site, as reflected in this submission to the Department, conforms to, and is consistent with, the remediation requirements in N.J.S.A. 58:10C-14.

My conduct and decisions in this matter were made upon the exercise of reasonable care and diligence, and by applying the knowledge and skill ordinarily exercised by licensed site remediation professionals practicing in good standing, in accordance with N.J.S.A. 58:10C-16, in the State of New Jersey at the time I performed these professional services.

I am aware pursuant to N.J.S.A. 58:10C-17 that for purposely, knowingly or recklessly submitting false statement, representation or certification in any document or information submitted to the board or Department, etc., that thero are significant civil, administrative and criminal penalties, including license revocation or suspension, fines and being punished by imprisonment for conviction of a crime of the third degree.

LSRP Signature: Date: 04/11/2014

STATE OF NEW JERSEY
DEPARTMENT OF ENVIRONMENTAL PROTECTION
BUREAU OF FIELD OPERATIONS
401 EAST STATE STREET
P.O. Box 435
TRENTON, NEW JERSEY 08625-0435

30 DAY NOTICE OF INTENT TO CLOSE AN UNDERGROUND STORAGE TANK SYSTEM

Submission of this notification satisfies the requirements of N.J.A.C. 7:14B-9.2. An Underground Storage Tank Facility Questionnaire must be completed and submitted to the Department upon completion of the closure activities.

Do not use this form to notify the Department of a request for a variance from the Technical Requirements of Site Remediation, N.J.A.C. 7:26E. Instead, use a Closure Plan Approval Application, UST-013, XX/XX.

- Please type or print legibly in ink. Call 609/633-0708 for help in completing this notification.
- Please sign and return one original of this form to the address above.
- The UST system must be registered. If the UST system is not registered this form will be returned and not processed.

Facility Registration # ~~N/A~~ 147339 Date Underground Storage Tank(s) and/or piping will be removed From Jan. 30, 2002

A. FACILITY NAME 1240 Walnut UST

ANALYTICAL REPORT

Methodology

All analyses are adapted from one or more of the following reference methods:

"Guidelines Establishing Test Procedures for the Analysis of Pollutants"' Code of Federal Regulations, Vol. 40, Part 136

"Test Methods for Evaluating Solid Waste", SW846 Third Edition, September 1986, USEPA.

Code of Federal Regulations Vol. 40, Part 261, "Appendix II Method 1311 Toxicity Characteristic Leaching Procedure."

Standard Methods for the Examination of Water and Wastewater", 18th & 21st editions

"Methods for the Chemical Analysis of Water and Wastes", EPA600/4-79-020, March 1983, U.S. EPA, EMSL

"Annual Book of Standards, Section 11-Water", American Society for Testing and Materials (ASTM)

"Methods for the Determination of Organic Compounds in Drinking Water", EPA 600/4-88/039, December 1988

Qualifiers

B	Detected in method blank	E	Detected above calibration limits, result estimated
H	Parameter run out of hold time	J	Detected below PQL, result estimated
P	Incorrect Preservative	R	See report notes
SUB	Sub-Contracted to Certified Lab	N	Not NELAP/TNI certified for parameter

Abbreviations

ppm	Parts Per Million (mg/kg or mg/L)	PQL	Practical Quantitation Level
ppb	Parts Per Billion (ug/kg or ug/L)	attached	Subcontract Lab Report Attached
g	gram (1000 g = 1Kg)	ND	Not Detected
kg	kilogram (1 kg = 1000 g)	NA	Not Applicable
mg	milligram (1000 mg = 1 g)	NS	Not Spiked
mg/kg	milligram per kilogram (ppm)	NP	No PCB pattern detected
ug/kg	microgram per kilogram (ppb)	NR	Not Requested
ug	microgram (1000 ug = 1 mg)	NI	Not Ignitable
L	liter (1 L = 1000 mL)	NFL	No Free Liquid
ml	milliliter (1000 ml = 1 L)	NTU	Nephelometric Turbidity Units
ul	microliter (1000 ul = 1 ml)	S.U.	Standard Unit
mg/L	milligram per liter (ppm)	RPD	Relative Percent Difference
ug/L	microgram per liter (ppb)	RSD	Relative Standard Deviation
ng/kg	nanogram per kilogram	MS/MSD	Matrix Spike/Matrix Spike Duplicate
BTU/lb	British Thermal Units per pound	LCS	Laboratory Control Sample
CFU/mL	Colony Forming Units per milliliter	BS	Blank Spike (Method Spike)
MPN/100 ml	Most Probable Number per 100 mL	o F	degrees Fahrenheit
mS/cm	milli Siemans per centimeter	o C	degrees Celsius
uS/cm	micro Siemans per centimeter	umhos	Conductivity Units
ug/sq cm	microgram per square centimeter	ohms	Resistivity Units
ug/sq ft	microgram per square feet	RL	Reporting Limit
ug/wipe	microgram per wipe		

Note: All non-aqueous samples, with the exception of oils, wipes, and paint chips are dry weight corrected

PQL-The Practical Quantitation Limit (PQL) is the lowest level that can be reliably achieved within specified limits of precision and accuracy during routine laboratory operating conditions.

RL-Reporting Limit is greater than or equal to PQL.

Analytical Report

Project Name:	Walnut (Princess) Street
MAEL Job Number:	40603
Client:	Remington & Vernick Engineers 236 Kings Highway East Haddonfield, NJ 08033
Contact Name:	Tom Smith
Date Received:	05/02/2014
Date Reported:	5/8/2014

Analytical test results for methods listed on the laboratory's scope of accreditation meet all requirements of NELAC unless otherwise noted. All sample holding times and preservation requirements were met unless otherwise noted. Test results relate only to the sample tested. This report shall not be reproduced, except in full, without prior written authorization of Mid-Atlantic Environmental Laboratories, Inc.

ANALYTICAL REPORT

Methodology

All analyses are adapted from one or more of the following reference methods:

"Guidelines Establishing Test Procedures for the Analysis of Pollutants"' Code of Federal Regulations, Vol. 40, Part 136

"Test Methods for Evaluating Solid Waste", SW846 Third Edition, September 1986, USEPA.

Code of Federal Regulations Vol. 40, Part 261, "Appendix II Method 1311 Toxicity Characteristic Leaching Procedure."

Standard Methods for the Examination of Water and Wastewater", 18th & 21st editions

"Methods for the Chemical Analysis of Water and Wastes", EPA600/4-79-020, March 1983, U.S. EPA, EMSL

"Annual Book of Standards, Section 11-Water", American Society for Testing and Materials (ASTM)

"Methods for the Determination of Organic Compounds in Drinking Water", EPA 600/4-88/039, December 1988

Qualifiers

B	Detected in method blank	E	Detected above calibration limits, result estimated
H	Parameter run out of hold time	J	Detected below PQL, result estimated
P	Incorrect Preservative	R	See report notes
SUB	Sub-Contracted to Certified Lab	N	Not NELAP/TNI certified for parameter

Abbreviations

ppm	Parts Per Million (mg/kg or mg/L)	PQL	Practical Quantitation Level
ppb	Parts Per Billion (ug/kg or ug/L)	attached	Subcontract Lab Report Attached
g	gram (1000 g = 1Kg)	ND	Not Detected
kg	kilogram (1 kg = 1000 g)	NA	Not Applicable
mg	milligram (1000 mg = 1 g)	NS	Not Spiked
mg/kg	milligram per kilogram (ppm)	NP	No PCB pattern detected
ug/kg	microgram per kilogram (ppb)	NR	Not Requested
ug	microgram (1000 ug = 1 mg)	NI	Not Ignitable
L	liter (1 L = 1000 mL)	NFL	No Free Liquid
ml	milliliter (1000 ml = 1 L)	NTU	Nephelometric Turbidity Units
ul	microliter (1000 ul = 1 ml)	S.U.	Standard Unit
mg/L	milligram per liter (ppm)	RPD	Relative Percent Difference
ug/L	microgram per liter (ppb)	RSD	Relative Standard Deviation
ng/kg	nanogram per kilogram	MS/MSD	Matrix Spike/Matrix Spike Duplicate
BTU/lb	British Thermal Units per pound	LCS	Laboratory Control Sample
CFU/mL	Colony Forming Units per milliliter	BS	Blank Spike (Method Spike)
MPN/100 ml	Most Probable Number per 100 mL	o F	degrees Fahrenheit
mS/cm	milli Siemans per centimeter	o C	degrees Celsius
uS/cm	micro Siemans per centimeter	umhos	Conductivity Units
ug/sq cm	microgram per square centimeter	ohms	Resistivity Units
ug/sq ft	microgram per square feet	RL	Reporting Limit
ug/wipe	microgram per wipe		

Note: All non-aqueous samples, with the exception of oils, wipes, and paint chips are dry weight corrected

PQL-The Practical Quantitation Limit (PQL) is the lowest level that can be reliably achieved within specified limits of precision and accuracy during routine laboratory operating conditions.

RL-Reporting Limit is greater than or equal to PQL.

TTI Project No. 13-1366

Dear Mr. Smith,

TTI Environmental, Inc. (TTI) has been performing the UST Closure Project at the above referenced site. In order to assist you with the completion of the NJDEP Closure Report, enclosed please find the following documentation:

- Clean Fill Certification Letter from Hanson Aggregates
- Clean Fill Receipts
- Tank Scrap Receipts
- Residual fuel disposal from USTs – Monarch Environmental
- Copies of Camden City Construction Permits for Building and Fire
- AbateTech, Inc. Asbestos Report

Please note that this may only be a portion of the documents you need for your reporting. As TTI receives any remaining disposal manifests, fill receipts, etc., they will be forwarded to you for your records.

Should you require anything additional, please do not hesitate to contact our office at any time at (856) 840-8800 x 15. Thank you for allowing TTI to assist you with this project, in providing the Camden City Board of Education with professional tank services.

Sincerely,
TTI ENVIRONMENTAL, INC. (TTI)

Attn: Kim McCarty

Re: Environmentally Clean Material

Project Site: 919 Princess Avenue
Camden, NJ

Dear Kim:

Hanson Aggregates BMC, Inc hereby certifies that the I-13 Soil Aggregate supplied to your project located in Camden, New Jersey is from a Virgin Source and is free of any hazardous waste and/or contaminants. This material was delivered from our mining operation in Berlin, N. J.

Information Requested:

Name of Supplier and Source:
Hanson Aggregates BMC, Inc
Berlin Plant

Street, Town, Lot and Block, County, State:
127 Williamstown Rd
Berlin, NJ 08009
Winslow Township
Block 1701, Lots12, 16, 17, 18, 19, 20, 21
Camden County
New Jersey

Brief History of Site of Fill Source:

The Hanson Aggregate BMC Berlin Plant is a sand and gravel plant opened in the late 1920's and operated continuously to present. The operation has maintained State and Local permit requirements.

Hanson Aggregates BMC certifies that the Berlin site produces Virgin material and that no chemicals or additives are used in producing the product.

Should there be any questions or need for additional information concerning this material, please contact me.

Sincerely,

Hanson Aggregates BMC.

Mr. Tom Voorhees
New Jersey Department Labor
Asbestos Control & Licensing
1 John Fitch Plaza, 3rd Floor
PO Box 949
Trenton, NJ 08625-0949

RE: Request for Waiver of 10-Day Notification

Dear Mr. Voorhees:

An old abandoned gas station located at 919 Princess Avenue, in Camden, NJ, has been slated for demolition. The station is presently collapsing posing both an environmental hazard as well as a safety issue. The Camden Board of education is greatly concerned about inquisitive neighborhood children and the ramifications that may ensue. It is with this concern that the Camden Board is requesting a waiver of the 10 day notification so that the asbestos issues can be addressed immediately, allowing us to level the structure as soon as possible.

Thank you for your assistance in this matter and do not hesitate to call me at (856-840-8800 ext. 36) if you have any questions.

Sincerely,

Adam Clayton, Project Manager
TTI Environmental, Inc.

SECTION D. SITE USE

Current Site Use (check all that apply)

- ☐ Industrial
- ☐ Residential
- ☐ Commercial
- ☐ School or child care
- ☐ Agricultural
- ☐ Park or recreational use
- ☒ Vacant
- ☐ Government
- ☐ Other: _____

Intended Future Site Use, if known (check all that apply)

- ☒ Industrial
- ☒ Residential
- ☒ Commercial
- ☐ School or child care
- ☐ Park or recreational use
- ☐ Vacant
- ☐ Government
- ☐ Future site use unknown

SECTION E. DESCRIPTION OF DISCHARGE

Date Discharge Occurred: Unknown Date NJDEP Hotline called: 05/02/2014

Media Contaminated:

☒ Soil ☐ Groundwater ☐ Surface Water Receiving Water: None

☐ Historic Fill only

Description of Discharge:

UST removals being conducted at this site under notification N14-9629 resulted in the discovery of a previously unknown 550 gallon waste oil tank. There was no release from the tank or piping form leakage. The fill pipe had been overflowed during the period of use at a former service station and oil impacted soils were observed around the fill pipe to a depth of approximately 2.5 ft. Approximately 6 yards of impacted soil surrounding the fill pipe was removed for off-site disposal. The tank was unearthed, pumped out, and removed. No additional impacted soil was observed around or beneath the tank. Soil samples were collected within 6" of the tank invert for laboratory analysis. The tank was cleaned and removed to a metal recycling facility.

SECTION F. FEDERAL RELEASE

Is this discharge related to a release from a Federally regulated UST? ☐ Yes ☒ No

If "Yes," please answer the following questions:

Tank ID (from Registration): _____ Tank System Size: _____

Contents: _____

Source of Federal Release (check appropriate category):

- ☐ Dispenser
- ☐ Vent Pipe
- ☐ Fill Port/Fill Lines
- ☐ Piping (Upgraded)
- ☐ Piping (Not Upgraded)
- ☐ Spill Bucket
- ☐ Tank (Upgraded)
- ☐ Tank (Not Upgraded)
- ☐ Vapor System Recovery
- ☐ Submersible Turbine Pump Area
- ☐ Other (Specify) _____
- ☐ Delivery Problem
- ☐ Unknown

Cause of Federal Release (check appropriate category):

- ☐ Spill
- ☐ Overfill
- ☐ Physical/Mechanical Damage
- ☐ Loose Fittings
- ☐ Installation Problem
- ☐ Vapor Release
- ☐ Other (Specify) _____
- ☐ Corrosion
- ☐ Unknown

SECTION G. CASE TYPE: (check all that apply)

- ☐ Administrative Consent Order (ACO)
- ☐ Brownfield Development Area (BDA)
- ☐ Child Care Facility
- ☐ Chrome Site (Chromate chemical production waste)
- ☐ Coal Gas
- ☐ Due Diligence with RAO
- ☐ Hazardous Discharge Remediation Fund (HDSRF) Grant/Loan
- ☐ Historic Pesticides
- ☐ ISRA
- ☐ Landfill (SRP subject only)
- ☒ Regulated Underground Storage Tank (UST)
- ☐ Remediation Agreement (RA)
- ☐ School Development Authority (SDA)
- ☐ School facility
- ☐ Spill Act Defense – Government Entity
- ☒ Spill Act Discharge
- ☐ UST Grant/Loan
- ☐ Other (explain): _____

Federal Case (check all that apply)

Re: Response Action Outcome
Remedial Action Type: Unrestricted Use
Scope of Remediation: *Area of Concern*: One (1) 500 Gallon Leaded Gasoline Underground Storage Tank (No.), Three (3) 4,000 Gallon No. 2 Fuel Oil Underground Storage Tanks, one (1) 550 Gallon Waste Oil tank and no other areas.
Case Name: 1240 Walnut Street
Address: 1240 Walnut Street
Municipality: Camden City
County: Camden
Block: 365 **Lot:** 6
Preferred ID: 147339
UST Closure # N14-9629

Dear Mr. Nicolella:

As a Licensed Site Remediation Professional authorized pursuant to N.J.S.A. 58:10C to conduct business in New Jersey, I hereby issue this Response Action Outcome for the remediation of the area of concern specifically referenced above. I directly oversaw and supervised all of the referenced remediation and based upon this work, it is my professional opinion that this remediation has been completed in compliance with the Administrative Requirements for the Remediation of Contaminated Sites (N.J.A.C. 7:26C), that is protective of public health, safety and the environment. Also, full payment has been made for all Department fees and oversight costs pursuant to N.J.A.C. 7:26C-4.

This remediation includes the completion of a Site Investigation as defined pursuant to the Technical Requirements for Site Remediation (N.J.A.C. 7:26E),

My decision in this matter is made upon the exercise of reasonable care and diligence and by applying the knowledge and skill ordinarily exercised by licensed site remediation professionals in good standing practicing in the State at the time these professional services are performed.

As required pursuant to N.J.A.C. 7:26C-6.2(b)2ii, a copy of all records related to the remediation that occurred at this location is being simultaneously filed with the New Jersey Department of Environmental Protection (Department). These records contain all information upon which I based my decision to issue this Response Action Outcome.

By operation of law a Covenant Not to Sue pursuant to N.J.S.A. 58:10B -13.2 applies to this remediation. The Covenant Not to Sue is subject to any conditions and limitations contained herein. The Covenant Not to Sue remains effective only as long as the real property referenced above continues to meet the conditions of this Response Action Outcome.

CONDITIONS

Pursuant to N.J.S.A. 58:10B-12o, Pennsauken Township Board of Education and any other person who is liable for the cleanup and removal costs, and remains liable pursuant to the Spill Compensation and Control Act, N.J.S.A. 58:10-23.11 et seq. shall inform the Department in writing, on a form available from the Department, within 14 calendar days after its name or address changes. Any notices you submit pursuant to this paragraph shall reference the above case numbers and shall be sent to:

New Jersey Department of Environmental Protection
Bureau of Case Assignment and Initial Notice
Mail Code 401-05H
401 East State Street, 5th floor
PO Box 420
Trenton, New Jersey 08625-0420

In concluding that this remediation has been completed, I am offering no opinions concerning whether either primary restoration (restoring natural resources to their pre-discharge condition) or compensatory restoration (compensating the citizens of New Jersey for the lost interim value of the natural resources) has been completed.

Pursuant to N.J.S.A. 58:10C-25, the Department may audit this Response Action Outcome and associated documentation up to three years following issuance. Based on a finding by the Department that a Response Action Outcome is not protective of public health, safety and the environment, the Department can invalidate the Response Action Outcome. Other justifications for the Department's invalidation of this Response Action Outcome are listed in the Administrative Requirements for the Remediation of Contaminated Sites at N.J.A.C. 7:26C-6, including, but not limited to, a Department audit following issuance of this document may be initiated at any time if: a) undiscovered contamination is found that was not addressed by the Response Action Outcome, b) if the Licensed Site Remediation Professional Board conducts an investigation of the Licensed Site Remediation Professional issuing the Response Action Outcome or, c) if the license of that person is suspended or revoked.

Thank you for your attention to these matters. If you have any questions, please contact me at (856)795-9595.

Sincerely,

Thomas Smith
Licensed Site Remediation Professional # 577371

SECTION C. SITE USE

Current Site Use (check all that apply)

- ☐ Industrial
- ☐ Residential
- ☐ Commercial
- ☐ School/Childcare
- ☐ Agricultural
- ☐ Park or recreational use
- ☒ Vacant
- ☐ Government
- ☒ Other: FORMER GARAGE

Intended Future Use (check all that apply)

- ☐ Industrial
- ☐ Residential
- ☐ Commercial
- ☐ School/Childcare
- ☐ Park or recreational use
- ☐ Vacant
- ☐ Government
- ☒ Future site use unknown

SECTION D. CASE TYPE: (check all that apply)

- ☐ Administrative Consent Order (ACO)
- ☐ Brownfield Development Area (BDA)
- ☐ Child Care Facility
- ☐ Chrome Site (Chromate chemical production waste)
- ☐ Coal Gas
- ☐ Due Diligence with RAO
- ☐ Hazardous Discharge Remediation Fund (HDSRF) Grant/Loan
- ☐ ISRA
- ☐ Landfill (SRP subject only)
- ☒ Regulated Underground Storage Tank (UST)
- ☐ Remediation Agreement (RA)
- ☐ School Development Authority (SDA)
- ☐ School facility
- ☐ Spill Act Defense – Government Entity
- ☐ Spill Act Discharge
- ☐ UST Grant/Loan

Federal Case (check all that apply)

☐ **RCRA GPRA 2020** ☐ **CERCLA/NPL** ☐ **USDOD** ☐ **USDOE** ☐ TSCA

☐ Other (explain): _____

SECTION E. PUBLIC FUNDS

Did the remediation utilize public funds? ..... ☐ Yes ☒ No

If "Yes," check applicable:

- ☐ UST Grant
- ☐ UST Loan
- ☐ Brownfield Reimbursement Program
- ☐ HDSRF Grant
- ☐ HDSRF Loan
- ☐ Landfill Reimbursement Program
- ☐ Spill Fund
- ☐ Schools Development Authority

SECTION F. SCOPE OF THE RESPONSE ACTION OUTCOME

1. Check only 1 box
   - ☒ Area(s) of Concern Only
   - ☐ Entire Site
   - ☐ Entire Site – Child Care Center Facility License
   - ☐ Lease Hold Portion Only – Child Care Center Facility (Refer to RAO Guidance Document for license details)
   - ☐ ISRA Subject Industrial Establishment (leasehold portion only)
2. Total number of contaminated AOCs associated with the site: 1
3. Total number of contaminated AOCs addressed in this submittal: 1
4. Are there any outstanding contaminated AOCs associated with the case where an RAO has not been filed? ..... ☐ Yes ☒ No

SECTION G. FEES

☒ All Oversight Invoices and Annual Remediation Fees are Paid in Full.

Attach a copy of the Financial Obligation Report

SECTION H. EXTENT OF REMEDIATION COVERED BY THE RESPONSE ACTION OUTCOME (check only 1 box)

- ☒ Unrestricted RAO
- ☐ Limited Restricted RAO
- ☐ Restricted RAO

SECTION I. RESPONSE ACTION OUTCOME PREPARATION CHECKS

1. Was the RAO issued only to the "Person(s) that conducted the Remediation"? ☒ Yes ☐ No
2. Does the language in the issued RAO document conform to the RAO shell document? ☒ Yes ☐ No
3. Were all the applicable individuals/agencies noted in the shell document copied on the RAO? ☒ Yes ☐ No
4. Are there electronic copies of all remediation related records included with this submittal? ☒ Yes ☐ No
5. Have all NJDEP fees and outstanding oversight costs been paid? ☒ Yes ☐ No
6. Have any identified deficiencies been addressed in this or prior submittal? ☐ Yes ☐ No ☒ N/A
7. Did the remedial action render the property unusable for future redevelopment or recreation use? ☒ Yes ☐ No

SECTION J. APPLICABLE REMEDIATION STANDARDS

1. Were Default Remediation Standards used for all contaminants? ☒ Yes ☐ No
   (If "Yes," check all that apply)
   - ☐ Direct Contact
   - ☐ Impact to Ground Water Soil Screening Levels
   - ☐ Ecological Screening Levels

2. Has compliance averaging been utilized to determine compliance with the Inhalation Pathway? ☐ Yes ☒ No
   If "Yes," check all that apply:

Compliance Averaging Method Utilized

Pathway	Arithmetic Mean	95 Percent UCL	Spatially Weighted Average	75 Percent/ 10X Procedure
☐ Ingestion-Dermal Pathway	☐	☐	☐	☐
☐ Inhalation Pathway	☐	☐	☐	☐
☐ Impact to Ground Water Pathway	☐	☐	☐	☐

3. Has a compliance option been utilized to determine compliance with the Impact to Ground Water Pathway? (If "Yes," check all that apply) ☐ Yes ☒ No
   - ☐ Immobile Compounds
   - ☐ Data evaluation for metals and semi-volatiles
   - ☐ Data evaluation for volatile organics derived from discharges of petroleum mixtures

4. Were Alternate Remediation Standards used for the Ingestion/Dermal Pathway? ☐ Yes ☒ No
5. Were Alternate Remediation Standards used for the Inhalation Pathway? ☐ Yes ☒ No
6. Were Site Specific Standards used for the Impact to Ground Water Pathway? ☐ Yes ☒ No
   (If "Yes," check all that apply)
   - ☐ Soil-Water Partitioning Equation ☐ SPLP ☐ Sesoil ☐ Sesoil/AT123D
   - ☐ DAF Modification ☐ Immobile Chemicals List
   - ☐ Soil and Ground Water Analytical Data Evaluation

7. Were Site Specific Ecological Remediation Goals used? ☐ Yes ☒ No
8. What is the ground water classification for this site as per N.J.A.C. 7:9C? (check all that apply)
   - ☐ Class I-A
   - ☐ Class I-PL Pinelands Protection Area
   - ☐ Class I-PL Pinelands Preservation Area
   - ☐ Class II-A
   - ☐ Class III-A
   - ☐ Class III-B

SECTION K. MEDIA IMPACTED/REMEDIATED

1. Soil Remediation Types (check all that apply):

- ☐ No remedial action required
- ☐ Capping / other engineering controls
- ☐ Institutional Control
- ☒ Excavation
- ☐ Treatment
- ☐ Other _____

2. Ground Water

Have the Ground Water Quality Standards been met? ☐ Yes ☐ No

Do groundwater concentrations remain above the Ground Water Quality Standards but concentrations are low and non-decreasing? ☐ Yes ☐ No ☒ N/A

3. Ground Water Remediation Types (check all that apply):

☐ No remedial action required ☐ Physical Containment ☐ Pump & Treat
☐ In-Situ ☐ Hydraulic Control ☐ Institutional Control
☐ Monitored Natural Attenuation ☐ Other _____

4. Ecological

Was wetlands mitigation/restoration required? ☐ Yes ☒ No
Was a wetlands mitigation/restoration plan approved by NJDEP? ☐ Yes ☐ No
Do contaminant levels currently meet ecological screening levels or Site Specific Ecological Remediation Goals?
Surface water ☐ Yes ☐ No ☐ N/A
Sediment ☐ Yes ☐ No ☐ N/A

5. Wetland Remediation Types (check all that apply):

☐ No remedial action required ☐ Capping
☐ Excavation ☐ Other _____

6. Sediment Remediation Types (check all that apply):

☐ No remedial action required ☐ Capping
☐ Excavation ☐ Other _____

7. General

Has radionuclide contamination been addressed in any media? ☐ Yes ☐ No ☒ N/A

SECTION L. ALTERNATIVE STANDARD / VARIANCES

Alternative remediation standard / screening level

If proposing an alternative remediation standard pursuant to N.J.A.C. 7:26D-7.4, alternate vapor intrusion screening level, or ecological site specific goal check here ☐ and attach the Alternative Soil Remediation Standard and/or Screening Level Application Form as an addendum.

A site-specific screening level was developed for the evaluation of the VI pathway ☐ Yes ☒ No

Variance from regulations

If the Licensed Site Remediation Professional has varied from the Technical Rules, provide the citation(s) from which the remediation varied and the page(s) in the attached document where the rationale for the variance is provided.

N.J.A.C. 7:26E- _____ Page _____
N.J.A.C. 7:26E- _____ Page _____
N.J.A.C. 7:26E- _____ Page _____

SECTION M. RESPONSE ACTION OUTCOME NOTICES (check all the apply and were used in the RAO document)

1. General Notices

☐ Well Decommissioning
☐ Building Interiors Not Addressed

2. Child Care Center Notices

☐ Child Care Center Notices (Use this notice in all Child Care Center RAOs)
☐ Child Care Center Specific-Multi-Tenant Situations

3. Contamination Remaining Onsite

- ☐ Regional Natural Background Levels of Contamination
- ☐ Existing CEA or Deed Notice
- ☐ Soils Only RAO
- ☐ Ground Water Contamination Not Yet investigated
- ☐ Ground Water Contamination Due to Regional Historic Fill
- ☐ Contamination Remaining Onsite Due to Migration from Off-site Source
- ☐ Known Onsite Contamination Source Not Yet Remediated
- ☐ Less than an Order of Magnitude Remediation Standard Change For A Site With An Approved RAW Prior To A New Remediation Standard
- ☐ Less than an Order of Magnitude Remediation Standard Change For A Site With A Final Remediation Document Prior to A New Remediation Standard

4. ISRA Specific Notices

- ☐ ISRA Specific – RCRA Situations
- ☐ ISRA Specific – Multi-Tenant Situations
- ☐ ISRA Specific – Landfill Situations

SECTION N. REMEDIATION FUNDING SOURCE

1. Has a Remediation Funding Source been posted for this site pursuant to N.J.A.C. 7:26C-5?.... ☐ Yes ☐ No

If "Yes, check a. or b. below as applicable:

a. ☐ This RAO is for the entire site and serves as notice to the NJDEP to return the Remediation Funding Source posted for this site*.

b. ☒ This RAO is for an Area of Concern only and (check one below):

- ☐ Serves as notice to the NJDEP to decrease the Remediation Funding Source posted for this site*.
- ☒ No adjustments to the Remediation Funding Source are requested at this time.

Note: If any box in a. or b. above identified with an asterisk (*) is checked, be sure to include the completed "Remediation Cost Review and RFS-FA Form" available at http://nj.gov/dep/srp/srra/forms

SECTION O. PERSON RESPONSIBLE FOR CONDUCTING THE REMEDIATION INFORMATION AND CERTIFICATION

Full Legal Name of the Person Responsible for Conducting the Remediation: CAMDEN BOARD OF EDUCATION

Representative First Name: STEVE Representative Last Name: NICOLELLA

Title: DIRECTOR BUILDINGS & GROUNDS

Phone Number: (856) 966-4626 Ext: 41400 Fax:

Mailing Address: 901 SOUTH 8TH STREET

City/Town: CAMDEN State: NJ Zip Code: 08103

Email Address: snicolella@camden.k12.nj.us

This certification shall be signed by the person responsible for conducting the remediation who is submitting this notification in accordance with Administrative Requirements for the Remediation of Contaminated Sites rule at N.J.A.C. 7:26C-1.5(a).

I certify under penalty of law that I have personally examined and am familiar with the information submitted herein, including all attached documents, and that based on my inquiry of those individuals immediately responsible for obtaining the information, to the best of my knowledge, I believe that the submitted information is true, accurate and complete. I am aware that there are significant civil penalties for knowingly submitting false, inaccurate or incomplete information and that I am committing a crime of the fourth degree if I make a written false statement which I do not believe to be true. I am also aware that if I knowingly direct or authorize the violation of any statute, I am personally liable for the penalties.

Signature: Date: 6/17/14

Name/Title: STEVE NICOLELLA /DIRECTOR BUILDINGS & GROUNDS

Company Name: CAMDEN BOARD OF EDUCATION

SECTION P. LICENSED SITE REMEDIATION PROFESSIONAL INFORMATION AND STATEMENT

LSRP ID Number: 577371

First Name: THOMAS Last Name: SMITH

Phone Number: (856) 795-9595 Ext: 1902 Fax:

Mailing Address: 232 KINGS HIGHWAY

City/Town: HADDONFIELD State: NJ Zip Code: 08033

Email Address: THOMAS.SMITH@RVE.COM

This statement shall be signed by the LSRP who is submitting this notification in accordance with SRRA Section 16 d. and Section 30 b.2.

I certify that I am a Licensed Site Remediation Professional authorized pursuant to N.J.S.A. 58:10C to conduct business in New Jersey. As the Licensed Site Remediation Professional of record for this remediation, I:

[SELECT ONE OR BOTH OF THE FOLLOWING AS APPLICABLE]:

☒ *directly oversaw and supervised all of the referenced remediation, and\or*

☒ *personally reviewed and accepted all of the referenced remediation presented herein.*

I believe that the information contained herein, and including all attached documents, is true, accurate and complete.

It is my independent professional judgment and opinion that the remediation conducted at this site, as reflected in this submission to the Department, conforms to, and is consistent with, the remediation requirements in N.J.S.A. 58:10C-14.

My conduct and decisions in this matter were made upon the exercise of reasonable care and diligence, and by applying the knowledge and skill ordinarily exercised by licensed site remediation professionals practicing in good standing, in accordance with N.J.S.A. 58:10C-16, in the State of New Jersey at the time I performed these professional services.

I am aware pursuant to N.J.S.A. 58:10C-17 that for purposely, knowingly or recklessly submitting false statement, representation or certification in any document or information submitted to the board or Department, etc., that there are significant civil, administrative and criminal penalties, including license revocation or suspension, fines and being punished by imprisonment for conviction of a crime of the third degree.

QUALIFICATIONS

Andrew W. Zjawin, LSRP
EHS Division Manager

EDUCATION
BS, Environmental Science (Physics), Rutgers University (2005)

PROFESSIONAL REGISTRATIONS
Licensed Site Remediation Professional: NJ (#714446, exp. 6-1-22)

CERTIFICATIONS/TRAININGS
8-Hr. Refresher, Hazwoper, OSHA, (exp. 7-25-22)

Project Management I, Pennoni (2016, no exp.)

40-Hr. Hazardous Waste Site Safety Training, OSHA (2004, no exp.)

PROFESSIONAL AFFILIATIONS
New Jersey Licensed Site Remediation Professionals Association

EXPERIENCE SUMMARY

Mr. Zjawin serves as our EHS Division Manager with nearly 20 years of experience and specializes in environmental investigation and remediation. His experience includes preparation and completion of environmental due diligence reports, preliminary assessments, conducting site and remedial activities at sites subject to the NJDEP Site Remediation Program, ISRA, licensed childcare facilities, schools, brownfield sites, landfills, dry cleaners and various land development projects.

He is experienced with design, oversight and implementation of remedial activities related to contaminated media. He is also highly experienced in investigating and remediating SRP, UST, ISRA, and VI sites in accordance with New Jersey Department of Environmental Protection (NJDEP) rules and regulations. Additionally, he has a focus on removal and treatment of LNAPLs, DNAPLs.

Mr. Zjawin has worked with public, private, non-profit and community association type clients on projects requiring technical knowledge in conducting environmental investigations, remediation and regulatory site closure activities in accordance with the NJDEP Technical Requirements for Site Remediation N.J.A.C. 7:26E. His experience consists of the preparation and completion of environmental regulatory reporting including ASTM Phase I/Phase II Environmental Assessment Reports (ESA), Preliminary Assessment Reports (PAR), Site Investigation Reports (SIR), Remedial Investigation Reports (RIR), Site Investigation/Remedial Investigation/Remedial Action Workplans, Remedial Action Reports (RAR) and Environmental Site Assessments accordance with ASTM International standards, NJDEP Administrative Requirements for the Remediation of Contaminated Sites (ARRCS) Rules N.J.A.C. 7:26C, Tech Rules, and guidance.

REPRESENTATIVE PROJECTS

PROJECT EXPERIENCE PRIOR TO PENNONI

Borough of Merchantville - Downtown Brownfields Redevelopment, Merchantville, NJ (2018)
Project Manager - Provided environmental services which included review of previous reports and data and preparation of a Remedial Investigation (RI) Workplan, remedial cost estimate, and Hazardous Discharge Site Remediation Fund (HDSRF) application related to the Merchantville Boro Downtown Brownfields Redevelopment project. Based on the initial review, site and remedial investigations (SI/RI) were required for several Areas of Concern (AOCs) including but not limited to inactive rail lines, chlorinated solvent groundwater contamination and vapor intrusion (VI). The HDSRF was approved in May 2018; however, prior to commencing the approved workplan, additional funds were requested to prepare an updated Preliminary Assessment (PA) and VI testing due to site and regulatory changes since the previous PA and investigations.

Blonder Tongue Laboratories, Inc. – Old Bridge, Middlesex, NJ (2018)
Project Manager - Provided LSRP oversight for the Industrial Site Recovery Act (ISRA) case which included preparing a Preliminary Assessment (PA) for the site in accordance with the New Jersey Department of Environmental Protection's (NJDEP) Technical Requirements for Site Remediation (NJAC 7:26E), ISRA (N.J.S.A. 13:1K and N.J.A.C. 7:26B), Administrative Requirements for the Remediation of Contaminated Sites (ARRCS) Rules (N.J.A.C. 7:26C) and applicable guidance. Based on the findings of the PA, site investigation (SI) activities were conducted to confirm / deny the presence of a release from a former hazardous waste storage area and other AOCs. Based on the SI findings, chlorinated groundwater contamination was identified requiring delineation and a VI study due to samples exceeding NJDEPs screening levels. Additional RI was conducted which delineated the vertical and horizontal limits of the plume and determined that VI is not a concern at the site based on a soil gas and indoor air investigation. On-going monitoring of the groundwater contamination was proposed in pursuit of a restricted-use Response Action Outcome (RAO) via monitored natural attenuation (MNA).

Laws & Laws – Cumberland County, Commercial Township, NJ (2017)
Project Manager - Provided LSRP oversight for the remediation of a former gasoline underground storage tank (UST) which was removed from the site but not properly closed. A review of the existing case file and NJDEP correspondence identified the need to investigate groundwater because of the prior removal action. The results of a groundwater investigation conducted in the vicinity of the former UST did not identify contaminants of concern above NJDEPs Ground Water Quality Standards (GWQS), as such, no further action was recommended for the UST and an unrestricted use Response Action Outcome (RAO) was issued for the AOC.

Fellowship House of South Camden – Camden, NJ (2017 – 2018)
Project Manager - Provided LSRP oversight for the site initially to attain Childcare Licensing for the site. The findings of the Preliminary Assessment identified multiple AOCs requiring further investigation. The results of Site and Remedial Investigations determined the site was underlain by historic fill requiring remediation. Due to the existing structure, site features and site use at the time, an Alternative Remedy was proposed for the capping of the site. The NJDEP reviewed and approved the proposed Alternative Remedies, and the remediation was completed via capping and institutional controls. Following issuance of a Remedial Action Permit (RAP) for Soil, a restricted use RAO for the entire site was issued by the LSRP.

Rafael Molina School – Mastery Charter Schools, Camden, NJ (2017 - 2018)
Project Manager - Provided LSRP oversight for the remediation of historic fill at the site. Due to the site use as a school, the on-going building addition and site features, an Alternative Remedy Proposal was prepared and submitted to the NJDEP to remediate historic fill. Upon NJDEP approval of the Alternative Remedy, the engineering caps were installed and documented in a deed restriction for the property in pursuit of a RAP for soil and restricted use RAO.

Camden Waterfront Redevelopment – Preliminary Assessment Report, Camden, NJ (2017 – 2018)
Project Manager - Supported the LSRP of Record in preparing the Preliminary Assessment Reports and remedial action estimates for the Camden Waterfront Redevelopment project which began in 2017 and is currently under construction. The site was formerly occupied by multiple industrial properties from before the turn of the century until the 1990's. Former occupants included the former Ferry Terminal, Campbells Food, lumber yards but mostly consisted of former Radio Corporation of America (RCA) operations during the second half of the 19th century. Prior to the most recent redevelopment, the site was utilized for parking lots to support the nearby attractions. The findings of the PA and subsequent reports identified multiple AOCs requiring additional investigation/remediation, the results of which documented the presence of PCB laden historic fill material, historic fill, chlorinated solvent groundwater contamination, and a "discharge pit" contaminated with chlorinated volatiles and PCBs. Subsequent remedial excavations and chemical / biological amendment injections were conducted to remediate the former discharge pit concurrent with the project build-out. Currently, the site is undergoing redevelopment and engineering control installations as part of the remedial actions. On-going monitoring and maintenance will be conducted to ensure the protectiveness of the remediation.

Lakeside Business Park LLC - 2 Independence Boulevard, Gloucester County, NJ (2017)
Project Manager - provided LSRP services which included preparation of a PA that identified two AOCs, fill material and historic agricultural use, in connection with the site. Based on the PA findings, the site was historically agricultural land until it was operated by a local mine adjacent to the site. Test pits and soil borings were advanced for sample collection to characterize suspect fill material and historically applied pesticides in accordance with NJAC 7:26E and guidance. Analytical results did not identify the presence of targeted compounds at concentrations above NJDEP soil remediation standards as such, a due diligence entire site unrestricted use RAO was issued for the site.

Weequahic Park – Department of Parks, Essex County, NJ (2011)
Project Manager - Provided environmental services that included the completion of an environmental Preliminary Assessment (PA) for the County of Essex's Weequahic Park. The PA was completed in accordance with the New Jersey Department of Environmental Protection's (NJDEP) Technical Requirements for Site Remediation (NJAC 7:26E) and submitted to the NJDEP Green Acres Program for funding. The PA was requested by Green Acres as part of a due diligence effort for the property. The PA included a comprehensive evaluation of the historic site operations, an ownership history, a review of reasonably available environmental files/maps/data, and a review of third-party regulatory database to determine whether AOCs were present at the site.

Branchbrook Park –Department of Parks, Essex County, NJ (2010)
Project Manager - Provided environmental services that included the completion of an environmental Preliminary Assessment (PA) for the County of Essex's Weequahic Park. The PA was completed in accordance with the New Jersey Department of Environmental Protection's (NJDEP) Technical Requirements for Site Remediation (NJAC 7:26E) and submitted to the NJDEP Green Acres Program for funding. The PA was requested by Green Acres as part of a due diligence effort for the property. The PA included a comprehensive evaluation of the current and historic site operations, an ownership history, a review of reasonably available environmental files/maps/data, and a review of third-party regulatory database to determine whether AOCs were present at the site. Additional investigation of site AOCs including historic fill was subsequently conducted based on the PA findings.

PREVIOUS PROJECT EXPERIENCE AT PENNONI FROM JANUARY 2007 TO OCTOBER 2017

Former Pharmaceutical Manufacturing Facility – Remedial Investigation, Bergen County, NJ (2014)
Environmental Scientist - Conducted the remedial investigation of a former pharmaceutical manufacturing site in Bergen County, NJ. The site has operated in the manufacture of fine chemicals and pharmaceutical intermediates since the turn of the century until 2011. Two active ISRA cases are associated with the property with an extensive case history. Mr. Zjawin assisted the LSRP in evaluating the results of previous investigations and historic documents to determine the investigations and regulatory actions necessary for ISRA compliance. The investigation and remediation of select AOCs was conducted by other consultants between 1999-2012 which identified 89 AOCs about the site. AOCs included an open terracotta piping system, wastewater treatment systems, former and active USTs /ASTs, storage areas, production rooms, suspect disposal areas, and groundwater contamination. Additional investigations were conducted by Pennoni that demonstrated delineation of contaminants of concern (COCs) in soil and groundwater. Remedial actions are proposed to remediate a No.6 fuel oil spill prior to implementation of a presumptive remedy and the issuance of an RAO for the industrial establishment. The site structures were demolished in 2015 and the site is slated for redevelopment into a multistory condominium and community park.

Remedial Investigation/Remedial Action Work plan (Brownfield), Camden, NJ (2013)
Environmental Scientist - Prepared a RAWP and Permit applications for the proposed in-situ treatment of a chlorinated solvent groundwater plume originating from an underground vault and other sources. The RAWP proposed off-site delineation of the plume and investigation of a former AST prior to implementation of the in-situ treatment. Previous remedial activities included source removal, chemical injections, and installation of a slurry wall. A negative pressure vapor mitigation system was installed under a portion of the building and is effective in remediating vapor intrusion. Responsibilities included assisting in the design of additional soil and groundwater remedial investigations and the remedial action selection to treat the groundwater contamination.

Publicly Traded Insurance Comp. - Due Diligence/Cost Evaluation, Sites, NJ, CT, & PA (2013)
Environmental Scientist - Provided pre-foreclosure due diligence and risk evaluation of seven industrial and commercial properties for a mutual life-insurance company based in New York City. The project included evaluating sites with significant environmental history and consulting with the Asset Management Team and general counsel. We provided ASTM Phase I's, Preliminary Assessment Reports, and letter reports summarizing remediation cost estimates and regulatory requirements for each of the sites. Regulatory involvement with the properties included state agencies from New Jersey (Industrial Site Remediation Act), Connecticut (Property Transfer Program), and Pennsylvania (Act II). Pennoni continues to work with the client providing consulting services for property transactions in the northeast.

Former Automotive Service/Sales – Preliminary Assessment, Remedial Investigation, &, Union City, NJ (10/12 – 3/13)
Environmental Scientist - Retained to conduct due diligence and the subsequent remediation prior to the transfer of the property. The site operated between the 1930's and 2012 as an automotive sales and service center. The results of the Preliminary Assessment identified three hydraulic lifts requiring additional investigation. During remediation activities, impacted soils were observed in one of the three excavations emanating from a previously unknown UST. Impacted soils were stockpiled, characterized, and properly disposed of off-site. Prior to backfill, post-excavation soil samples were collected and analyzed in accordance with NJDEP regulations and guidance. It was determined that based on the hydrogeological attributes of the underlying formation and evaluation of site data, PAH contamination detected in one post-excavation sample was determined to be limited due to the presence of bedrock on the sidewalls and bottom of the excavation. Furthermore, utilizing compliance averaging, the calculated

average was determined to be below the NJDEP residential soil standard. Based on the results of the investigations, no further action was recommended, and an unrestricted use site-wide RAO was issued by the LSRP.

Seafood Processing Plant – Active Remediation of No. 6 Fuel Oil Release, Cape May, NJ (1/10 – 10/15)
Project Manager, client contact, and Operations/Maintenance Coordinator - Retained to remediate a fuel oil spill that migrated beneath a 65,000-square foot seafood processing plant in Cape May, NJ. A multi-phase extraction (MPX) system was designed to treat free product, soil vapor, and dissolved groundwater contamination with minimal disruptions to site operations. Following three years of active remediation, remedial investigations identified a soil "hot spot" that was subsequently excavated. Post-remediation sampling results confirmed the MPX system successfully remediated extractable petroleum hydrocarbons (EPH) in soil, free product to intermittent occurrences, and decreasing groundwater contaminant trends. Following shutdown, the results of groundwater monitoring and well gauging have indicated the remediation was successful in the reduction of source mass below the site and concentrations of dissolve groundwater contamination. Pennoni is currently preparing the remedial action report and remedial action permit applications in pursuit of a restricted use Response Action Outcome (RAO).

Proposed Daycare - Due Diligence, Phase II and Alternative Analysis, Netcong, NJ (2009)
Associate Scientist - Investigated geotechnical and environmental conditions associated with fill dumped on their property from the adjoining property. Designed a retaining wall that allows the construction of the daycare facility with a useable rear yard; and studied the costs associated with alternatives which would allow the construction of the proposed daycare center to continue. The fill area was delineated utilizing aerial photographs, historic topographic maps, and digital ortho-photography and prior to investigations the property and fill boundary were surveyed and marked. Following due diligence, Pennoni oversaw a test pit investigation of the fill material that identified PCBs and PAHs more than the NJDEP residential soil standards. The results of the investigation successfully delineated the extent of fill material and characterized the contaminants of concern associated with the fill. In addition to the Site Investigation, a Preliminary Assessment (PA) was prepared for the Client in accordance with the Technical Requirements for Site Remediation (N.J.A.C. 7:26E) to establish the site's environmental conditions. The PA identified the fill material as an AOC about the site. Mr. Zjawin conducted field investigations and prepared the PA.

USEPA Superfund Site - Hexavalent Chrome Soil Remedial Action, Clarks Summit, PA (10/05 - 11/06)
Site Manager – Responsible for remedial action of impacted soils and groundwater at a 45-acre USEPA Superfund Site in Pennsylvania. Identified areas of soil contamination were designated into 5-, 10- & 15-foot grids for injection of calcium polysulfide to remediate the hexavalent chromium in soils. The injection points were determined based on depth of contamination and porosity of soils. Duties included coordinating day to day remediation activities between contractors, EPA, PADEP and the client, daily health and safety meetings, oversight of perimeter air monitoring data, data collection of injection volumes and points, liaison to local residences, collecting over 60 post-remediation samples, and operations and maintenance of two wastewater treatment systems. Other duties included oversight of installation of injection points, quarterly groundwater sampling, and weekly drinking water sampling of local residences.

Perth Amboy Housing Authority - Former Middlesex County Vocational Technical School, Perth Amboy, NJ
Environmental Scientist - Conducted the oversight of the abatement of hazardous materials from within the technical school building, oversee the demolition and cut/fill operations, as well as oversee the removal of hydraulic lifts and a UST. The site was impacted with historic fill and a release from a waste oil UST. Following additional RI and groundwater investigations, a restricted use NFA was granted with monitoring requirements of the engineering controls.

Andover County - Preliminary Assessment, Andover, NJ
Environmental Scientist - Conducted a Preliminary Assessment (PA)/Site Investigation (SI) of a County owned maintenance garage and fueling facility with known sources of contamination to establish the site's environmental conditions and identify the source of chlorinated solvents impacting site groundwater. The PA involved a review of historical documents, local and state document review and a site visit. The PA identified 36 AOCs about the property. The PA identified the parts washing equipment, floor drain, and septic system as the potential source of chlorinated solvents impacting the subject property.

Soil Remedial Action - Harrison, NJ
Environmental Scientist - Responsibilities included installation of soil borings and collection of soil samples; installation of groundwater monitoring wells and collection of groundwater samples; completion of third-party oversight for additional areas of concern on the property; and preparation of a Remedial Investigation and Remedial Action Report. The project was submitted to the NJDEP for a "No Further Action" determination under the New Jersey Cleanup Star Program.

USEPA Superfund Site - Operation & Maintenance of Wastewater Treatment System, Jersey City, NJ
Environmental Scientist - Performed operation and maintenance of a NJPDES N-3 Industrial Wastewater Treatment Plant as part of a multi-million-dollar Hexavalent Chromium remedial action. Approximately 250 gallons a minute were required from the treatment system 24-hours a day.

Wyckoff Board of Education - AHERA Inspections, Management Planner, Wyckoff, NJ
Environmental Scientist - Conducted AHERA three-year Re-Inspections, prepared AHERA 6-month Periodic Surveillance Reports and developed Asbestos Operation and Maintenance Plans for five schools in Wyckoff, NJ.

Phase I Environmental Site Assessments, NJ, NY, PA, FL
Environmental Scientist - Performed Phase I's at numerous residential and commercial facilities throughout New Jersey, New York, Pennsylvania, and Florida. Responsibilities included the acquisition, review, and interpretation of current and historical site information, file reviews, and correspondence with USEPA, PADEP, NJDEP, NYCDEC, and County & City Health Department. Investigations conducted in accordance with published ASTM requirements.

Phase II Environmental Site Assessments, NJ, NY, PA
Environmental Scientist - Performed Phase II's at numerous residential and commercial facilities throughout New Jersey, New York, Pennsylvania, and Florida. Responsibilities include installation of soil borings and collection of soil samples; installation of groundwater monitoring wells and collection of groundwater samples; sensitive receptor surveys. Duties also included preparation of quarterly groundwater reports, groundwater contour maps, contaminant isopleths and interpretation of laboratory data.

City of Philadelphia - Aboveground and Underground Storage Tank Installations, Philadelphia, PA
Environmental Scientist - Prepared construction plans and specifications for the installation and upgrading of AST and UST systems at two locations utilized for the storage and dispensing of petroleum products. Researched operational requirements, determined proper site locations, selected equipment and prepared associated civil, mechanical and electrical drawings.

National Paint Manufacturer - Remedial Action, Somerset, NJ
Environmental Scientist - Performed contractor oversight, perimeter air monitoring, impacted soil screening segregation, and sampling at a site in central New Jersey as part of a large remedial action for a national paint manufacturer.

Jersey City - Monthly UST Inspections, Jersey City, NJ
Environmental Scientist - Responsibilities included visual inspection of underground storage tank ("UST") systems at various Jersey City Public Schools facilities. Duties included inspection of fill ports and piping sumps, as well as, verifying the integrity of the various monitoring systems.

Harrison High School - Indoor Air Quality Sampling, Harrison, NJ
Environmental Scientist - Performed indoor air quality sampling activities at the new Harrison High School in Harrison, New Jersey to further assess the extent of on-site impacts. Work was performed consistent with the NJDEP's *Vapor Intrusion Guidance* document and the *Field Sampling Procedures Manual*

Hightstown - Monitoring Well Gauging/O&M of Water Treatment System, Hightstown, NJ
Environmental Scientist - Duties included monthly maintenance of a pump and treatment system for a TCE/PCE groundwater plume. Other duties included monthly monitoring well gauging activities and designing groundwater flow maps.

New Orleans Parish, St. Bernard Parish, and Jefferson Parish - Industrial Hygiene Inspections, New Orleans, LA
Environmental Scientist - Conducted Industrial Hygiene Activities in New Orleans, LA after Hurricanes Katrina and Rita. Collected moisture data and mold observations obtained from building materials within flood impacted and hurricane damaged buildings.

Jersey City Public Schools - Developed Deed Notice, Jersey City, NJ
Environmental Scientist - Assisted in developing a Deed Notice for a Jersey City Public School consistent with NJAC 7:26E. Additional duties included researching previous reports and establishing a delineation of the restricted area per the findings.

Remedial Investigations, Newark, NJ
Lead field technician - Completed remedial investigations for an apartment complex in Newark, New Jersey that was impacted by a #6 oil spill associated with two former 15,000-gallon USTs. To date, approximately 40 soil borings have been advanced, eight monitoring wells have been installed, and eight soil gas probes have been sampled. Soil contamination, groundwater contamination and free phase product are observed to be virtually site wide. In addition, the potential for vapor intrusion is present. Upon completion of the remedial investigations, a Remedial Action Work plan will be prepared to address each impacted medium.

Convalescent Center - Remedial Actions, Trenton, NJ
Lead field technician – Conducted free product recovery (No 6-fuel oil) activities at a convalescent center in Trenton, NJ since late 2006. The product recovery activities consist of the replacement of sorbent socks and direct pumping from two recovery wells using a peristaltic pump and are conducted on a biannual basis. Remedial Action Progress Reports are submitted to the NJDEP on an annual basis.

Town of Collingswood - Remedial Investigation, Collingswood, NJ
Lead field technician – Responsible for the remedial investigation of impacted soil and groundwater associated with an out of service heating oil UST in Collingswood, NJ. Based on the results of the remedial investigations, it was evident that the UST had impacted soil and groundwater on the subject property and an adjacent property. Conducted oversight of the installation of monitoring wells and injection wells for an in-situ chemical oxidation injection program to be implemented on the subject and adjacent properties to remediate the impacted soil and groundwater.

Town of Andover - Preliminary Assessment, Andover, NJ
Environmental Scientist - Conducted a Preliminary Assessment (PA) of a County owned maintenance garage and fueling facility with known sources of contamination under the Technical Requirements for Site Remediation (N.J.A.C. 7:26E) to establish the site's environmental conditions and identify the source of chlorinated solvents identified in site soils and groundwater. The PA involved a review of historical documents, local and state document review and a site visit. The PA identified 36 Areas of Concern (AOCs) about the property. The PA also identified the parts washing equipment and floor drains about the source of chlorinated solvents.

Preliminary Assessment/Site Investigation, Netcong, NJ
Environmental Scientist - Conducted a Site Investigation of suspected fill material placed on the subject property by an adjacent property owner. A total of five test pits were installed and eleven soil samples were collected and analyzed. The results of the soil sampling revealed that the soils are in fact non-native fill material and are impacted with PCBs and PAHs. In addition to the Site Investigation, a Preliminary Assessment (PA) was conducted in accordance with the Technical Requirements for Site Remediation (N.J.A.C. 7:26E) to establish the site's environmental conditions. The PA involved a review of historical documents, local and state document review and a site visit. The PA identified the fill material as an AOC about the property. Remedial investigation is proposed for the fill material.

Parkside Development Area 2

ASTM PHASE I ENVIRONMENTAL SITE ASSESSMENT

1500 Baird Boulevard

Andrew Zjawin, LSRP
Division Manager

Pennoni

EXECUTIVE SUMMARY

On behalf of **Parkside Business & Community in Partnership, Inc.** (Client), Pennoni has performed a Phase I Environmental Site Assessment (ESA) of 1500 Baird Boulevard located in Camden City, New Jersey (subject property or Site). The subject property consists of a vacant two-story residential building. The Site is identified as Block 1274, Lot 14 on the Camden County tax map of the City of Camden. The ESA is being conducted for risk assessment associated with a financial transaction.

Pennoni conducted the ESA in general conformance with the scope and limitations of the ASTM International (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, Designation E 1527-21. ASTM E 1527-21 is a voluntary consensus standard that constitutes "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice." The procedures included in the ASTM E 1527-21 standard comply with the United States Environmental Protection Agency (USEPA) 40 CFR Part 312, Standards and Practices for All Appropriate Inquiries; Final Rule.

The purpose of the Phase I ESA was to identify recognized environmental conditions (**RECs)**, controlled recognized environmental conditions (**CRECs**), historical recognized environmental conditions (**HRECs**), and business environmental risks (**BERs**) in connection with the subject property. Pennoni's Phase I ESA included a review of historical Site documents (e.g. aerial photographs, maps, etc.); a Site reconnaissance; interviews with available Site representatives; review of available regulatory records held by local, state, and federal agencies; a review of information provided by the User (i.e., the party seeking to complete an ESA of the subject property); and preparation of a report presenting Pennoni's findings, opinions, conclusions, and supporting documentation. The Phase I ESA for the subject property did not include testing or sampling of materials (e.g., soil, water, air, building materials).

Pennoni conducted a Phase I ESA of the Site in accordance with ASTM E1527-21 and applicable technical guidance documents. Our conclusions regarding **RECs**, **CRECs**, **HRECs**, and **BERs** in connection with the Site are summarized below.

Pennoni did not identify **RECs, CRECs, or HRECs** in connection with the Subject Property.

Pennoni identified the following **BERs** in connection with the Subject Property:

- **BER-1: Fire Damage**
- **BER-2: Historic Unknown Heating Sources**

Pennoni identified the following **significant data gap** in connection with the Site:

- **Inaccessible Structure Interior**

1.0 INTRODUCTION

Pennoni conducted the Phase I ESA in general conformance with the scope and limitations of the ASTM Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, Designation E 1527-21. The procedures included in the ASTM E 1527-21 standard comply with the USEPA 40 CFR Part 312, Standards and Practices for All Appropriate Inquiries; Final Rule.

ASTM E 1527-21 is a voluntary consensus standard that constitutes "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice." The ASTM practice is intended to permit a User (i.e., the party seeking to complete an environmental site assessment of the subject property, in this case, New Jersey Schools Development Authority, to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) liability (i.e., landowner liability protections or LLPs). The practice does not address whether requirements in addition to all appropriate inquiry have been met in order to qualify for LLPs (e.g., continuing obligations not to impede the integrity and effectiveness of activity and use limitations (AULs), the duty to take reasonable steps to prevent releases, or the duty to comply with legally required release reporting obligations).

ASTM E 1527-21 does not include any testing or sampling of materials (e.g., soil, water, air, building materials).

This report presents the findings, opinions, and conclusions, and supporting documentation for the Phase I ESA of the subject property, completed by Pennoni as of the date of this report. Information made available to Pennoni after this date, which would change the conclusions of this report, will be forwarded upon receipt.

1.1 Purpose

The purpose of the ESA was to identify recognized environmental conditions (**RECs**), controlled recognized environmental conditions (**CRECs**), historical recognized environmental conditions (**HRECs**), and business environmental risks (**BERs**) in connection with the subject property.

A **REC** is defined as: (1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. A *de minimis* condition is not a **REC**.

A **CREC** is defined as a **REC** affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).

An **HREC** is defined as a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations). An **HREC** is not a **REC**.

A BER is defined as a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of commercial real estate, not necessarily related to those environmental issues required to be investigated in this practice. Consideration of BER issues may involve addressing one or more non-scope considerations.

A *de minimis condition* is a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

1.2 Scope of Work

Pennoni's ESA for the subject property included a review of historical site documents (e.g., aerial photographs, maps, etc.); a site reconnaissance; interviews with available site representatives; review of available regulatory records held by local, state, and federal agencies; a review of information provided by the User (i.e., the party seeking to complete this Phase I ESA of the subject property); and preparation of a report presenting Pennoni's findings, opinions conclusions, and supporting documentation as referenced in our Proposal #PRKSD 25001, dated June 30, 2025. The Phase I ESA requirements do not include any testing or sampling of materials (e.g., soil, water, air, building materials).

The environmental professionals responsible for the preparation of this report have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. The report was reviewed by Andrew W. Zjawin, Division Manager of Pennoni, who was supported by various staff, including Victor Mai, Associate Environmental Scientist, also with Pennoni. Andrew W. Zjawin meets the definition of an "Environmental Professional" as defined in the ASTM standard and AAI regulation. The Environmental Professional Statement and Signature are presented in Section 13.0 of this report. Andrew W. Zjawin,

is a New Jersey Licensed Site Remediation Professional (LSRP) and has reviewed this report prior to issuance.

Non-scope considerations as defined in ASTM E1527-21 (e.g., asbestos , biological agents, cultural and historical resources, ecological resources, endangered species, health and safety, indoor air quality unrelated to releases of hazardous substances or petroleum products into the environment, industrial hygiene, testing of building materials for presence of lead-based paint or polychlorinated biphenyls [PCBs], lead in drinking water, mold, radon, regulatory compliance, wetlands, compliance with AULs, etc.) are considered beyond the scope of standard practice.

1.3 Limitations, Exceptions, Special Terms and Conditions

Pennoni conducted a Phase I ESA of the subject property in general conformance with the scope and limitations of ASTM Standard E1527-21. The assessment of the subject property did not deviate from these standards. Data gaps that would affect the ability of the environmental professional to identify conditions indicative of releases or threatened releases of pollutants, contaminants, petroleum and petroleum products are identified in Section 9.0.

The Phase I ESA is presumed to be valid provided it has been completed less than 180 days prior to the acquisition of the subject property or the date of the intended transaction. Recognizing that the passage of time affects the information provided in the reports; our opinions relating to site conditions are based upon information that existed at the time our conclusions were formulated.

1.4 User Reliance

This report and findings, conclusions, and recommendations contained herein, are furnished for the sole use and benefit of the Client to aid in understanding the environmental condition and potential liabilities of the subject property. This report may not be assigned, quoted, reproduced, relied upon, or otherwise used without the express prior written consent of Pennoni.

All documents prepared by Pennoni Associates Inc. are the instruments of service in respect of the project. They are not intended or represented to be suitable for reuse by owner or others on extensions of the project or on any other project.

Any reuse without the written verification or adaptation by Pennoni Associates Inc. for the specific purpose intended will be at owner’s sole risk and without liability or legal exposure to Pennoni Associates Inc. and owner shall indemnify and hold harmless Pennoni Associates Inc. from all claims, damages, losses, and expenses arising out of or resulting therefrom.

2.0 SUBJECT PROPERTY DESCRIPTION

The following tables provide a description of the subject property including its location, general characteristics, and current use. Current uses of adjoining properties and properties in the surrounding area are also described below.

Copies of the topographic and tax maps depicting the subject property are included in **Appendix A.**

2.1 Site Location and Legal Description

The following table summarizes the property location and legal description. The Site Location is shown on **Figure 1** in **Appendix A**.

Property Location and Legal Description	
Site City	Camden
Site County	Camden County
Site State	NJ
Quadrangles	Camden, NJ; Philadelphia, PA
Site Coordinates	-75.09915264° west longitude and 39.93329821° north latitude
Parcel Number	Block 1274, Lot 14

2.2 Subject Property Characteristics

The following table summarizes the general characteristics of the subject property, including its current use and a description of structures, roads, and other improvements (i.e., heating/cooling system, sewage disposal, source of potable water, etc.) on the subject property.

Subject Property Characteristics	
Current Use of the Subject Property	
Site Acreage	0.205 Acres
Site Occupant	Vacant
Site Structure	
Number of Stories	Two stories + Basement

Subject Property Characteristics	
Total Square Footage	~2,500 ft^2
Current Use	Vacant
Construction Date	Circa 1920
Type of Heating	No Heating
Type of Cooling	No Cooling
Site Utilities	
Sanitary Sewer Provider	Delaware No 1 WPCF
Water Service Provider	Camden City WD
Electric Provider	Public Service Electric and Gas Company (PSE&G)
Natural Gas Provider	PSE&G

2.3 Current Uses of Adjoining Properties and Properties in the Surrounding Area

Adjoining properties, and properties and roads in the area surrounding the subject property, are identified below.

Current Uses of Adjoining and Surrounding Properties	
Direction	**Current Use**
North	Baird Blvd is adjacent to the north, beyond which lie residential properties.
East	Residential structures are adjacent to the east.
South	Belleview Ave is adjacent to the south, beyond which lie residential properties.
West	Baird Blvd is adjacent to the north, beyond which lie residential properties.

3.0 USER PROVIDED INFORMATION

A User Questionnaire was provided to Parkside Business & Community in Partnership, Inc., the User, on July 24, 2025. On July 28, 2025, a response was provided. Below is a summary of the User responses and a copy of the User Questionnaire is provided in **Appendix C**.

User Provider Information			
Type	**User Provided**	**Issue Identified**	**Comments**
Chain of Title Information	No	No	The User did not provide chain of title information.
Environmental Liens and/or Activity and Use Limitations	No	No	The User has no actual knowledge of any environmental lien or AULs encumbering the subject property or in connection with the subject property.
Specialized Knowledge or Experience of the User	No	No	The User has no specialized knowledge or experience in connection with the Site.
Actual User Knowledge	No	No	The User has no actual User knowledge in connection with the Site.
Valuation Reduction for Environmental Issues	No	No	The User is not aware of any environmental issues impacting the
Commonly Known or Reasonably Ascertainable Information	No	No	The User has no commonly known or reasonably ascertainable information to provide.
Purpose of the ESA	No	No	The purpose of this ESA is for risk assessment associated with a financial transaction.

3.1 Degree of Obviousness

Based on their knowledge and experience related to the subject property, the User is not aware of any obvious indicators that point to the presence or likely presence of contamination at the Site.

3.2 Purpose of the ESA

The purpose of this report is for risk assessment associated with a financial transaction.

4.0 PHYSICAL SETTING

The following tables detail the physical setting of the Site.

Physical Setting	
Item	**Description**
Topographic Information/Regional Drainage	
Source(s)	Camden, NJ; Philadelphia, PA 7.5-minute United States Geological Survey (USGS) Topographic Map
Elevation	34.26 feet above mean sea level
Slope Direction	West
Regional Drainage	Regionally, the area is drained by the Delaware River which is located west of the Site.
Water Migratory Pathways	Local topography slopes in the western direction. Surface water and groundwater, therefore, are expected to migrate from the properties located to the east. Storm drainage and surface water flow is expected to percolate through the permeable Site surfaces.
Underlying Information	
Source	USGS Geology
Description	The underlying formation is determined to be Magothy Formation (Kmg). Magothy Formation consists of fine to very coarse-grained, locally gravelly Quartz sand, clay, and silt. Sand is white and weathers yellow brown or orange brown. Clay and silt weathers to gray, brown, or white. The formation is best exposed and thickest at about 262 feet in the Raritan Bay Area and about 82 feet thick in the southern sheet.
Soil Information	
Source	United States Department of Agriculture-Natural Resources Conservation Service (USDA-NRCS)
Soil Type(s)	Based on the USDA-NRCS survey soil in the site consists of Urban land. The soil is described as "soils in areas of high population density in the largely built environment. These soils can be significantly changed human-transported materials, human-altered materials, or minimally altered or intact “native” soils. Soils in urban areas exhibit a wide variety of conditions and properties and may have impervious surfaces, such as buildings and pavement." The Urban Land on the Site is composed of 95% Urban Land Component and 5% Udorthents.

Physical Setting	
Item	**Description**
Groundwater	
Groundwater Flow Direction	Groundwater is expected to flow to the west, parallel to the surface gradient. Deep groundwater would be expected in the joints and fractures of the underlying formation. Based on sites proximity to the Delaware River to the west, ground water is expected to flow west. However, due to pumping in the area direction is likely to vary. To further evaluate groundwater conditions at the Site, a property-specific hydrogeologic investigation would be necessary.

5.0 HISTORICAL RECORDS

The purpose of consulting historical records is to develop a history of the previous uses of the subject property and surrounding area to identify the likelihood of past uses having led to RECs in connection with the subject property.

ASTM E 1527-21 requires identification of obvious uses of the subject property from the present, back to the subject property's first developed use (including agricultural uses and placement of fill dirt), or back to 1940, whichever is earlier. As such, Pennoni reviewed as many of the standard historical sources (i.e., aerial photographs, fire insurance maps, property tax files, recorded land title records, USGS topographic maps, local street directories, building department records, zoning/land use records, etc.) as were necessary and both reasonably ascertainable and practically reviewable (i.e., publicly available, obtainable from its source within reasonable time and cost constraints). In addition, the historical sources must be determined to be sufficiently useful by the environmental professional.

5.1 Historical Summary

The Site is currently owned by Parkside Business & Community in Partnership Inc., who purchased the Site from Doris Still-Moore and the Estate of Ellen Cream (Deceased) in September 2024.

The residential structure present on the Site was constructed circa 1920. Based on interview with a neighboring residential occupant and visual observation, the structure was severely damaged by a fire; however, no records of the fire or response were identified during this report.

The Site is currently vacant and the residential structure's entryways are boarded off. The Site is located within an area consisting primarily of residential and commercial properties.

5.2 Historical Maps

A historical map (i.e., Sanborn Fire Insurance Maps) inquiry was placed with for the subject property. Fire insurance maps were reviewed for the years 1906, 1923, 1926, 1950, 1977, and 1982. Copies of Fire Insurance Maps are provided in **Appendix B**. A summary of the maps reviewed are provided as follows:

Historic Fire Insurance Maps Review	
Year	**Description**
1906	Site: No features are mapped on the Site.
	Surrounding Area: North and east of the Site is not mapped. Belleview Avenue, Baird Avenue, Kaighns Avenue, Kenwood Avenue, Princess Avenue, and Bradley Avenue are south of the Site. West of the Site includes Langham Avenue and Empire Avenue. The majority of lots to the south and west of the Site have no features mapped on them. Few residential and religious structures are mapped south of the Site.
1923	Site: A residential structure consistent with general layout of the present day structure is mapped on the Site.
	Surrounding Area: North, east, south, and west of the Site consists of residential buildings, commercial buildings, educational buildings, automobiles/garages, and religious structures. The area northeast of the Site is primarily undeveloped.
1926	Site: No significant changes to the Site are observed from the 1923 Fire Insurance Map.
	Surrounding Area: Additional residential and commercial structures are mapped to the north of the Site.
1950	Site: No significant changes to the Site are observed from the 1923 Fire Insurance Map.
	Surrounding Area: Additional religious and school structures are mapped to the east of the Site.
1977	Site: No significant changes to the Site are observed from the 1923 Fire Insurance Map.
	Surrounding Area: No significant changes to the surrounding area are observed from the 1950 Fire Insurance Map.
1982	Site: No significant changes to the Site are observed from the 1923 Fire Insurance Map.
	Surrounding Area: No significant changes to the surrounding area are observed from the 1950 Fire Insurance Map.

5.3 Historical Aerial Photographs

Available aerial photographs were obtained from ERIS, to determine past uses and conditions of the subject property. Aerial photographs were reviewed for the years 1931, 1940, 1951, 1957, 1965, 1973, 1981, 1990, 1995, 2002, 2004, 2005, 2006, 2008, 2010, 2013, 2015, 2017, 2019, 2022, and 2023. Copies of the aerial photographs reviewed by Pennoni are included in **Appendix B**. The following is a summary of the aerial photographs reviewed:

Historic Aerial Photographs	
Year	**Description**
1931	Site: The Site is improved with a residential structure which appears consistent with the present day structure. The quality of the photograph is poor; therefore, specific details are unclear.
	Surrounding Area: West and south of the Site include residential properties. Vacant land is present south of the Site. East of the Site is comprised primarily of woodlands and a body of water. North of the Site includes commercial or residential properties as well as vacant land. A river is also depicted north of the Site.
1940	Site: No significant changes to the Site are observed from the 1931 aerial photograph.
	Surrounding Area: Additional roads and commercial properties are visible to the north of the Site.
1951	Site: No significant changes to the Site are observed from the 1931 aerial photograph.
	Surrounding Area: Additional residential properties have been constructed north and southeast of the Site. Additional roads have been constructed northeast of the Site.
1957 - 1965	Site: No significant changes to the Site can be observed from the 1931 aerial photograph.
	Surrounding Area: No significant changes to the surrounding area are observed from the 1951 aerial photograph.
1973	Site: No significant changes to the Site are observed from the 1931 aerial photograph.
	Surrounding Area: Additional commercial properties have been constructed near the river north of the Site. The area north of the newly constructed commercial properties, that previously had residential or commercial properties, is now vacant land.

Historic Aerial Photographs	
Year	**Description**
1981 - 1995	Site: No significant changes to the Site observed from the 1931 aerial photograph.
	Surrounding Area: No significant changes can be observed from the 1973 aerial photograph.
2002	Site: No significant changes to the Site observed from the 1931 aerial photograph.
	Surrounding Area: Commercial/residential buildings that were adjacent to the river were deconstructed, leaving vacant land.
2004	Site: No significant changes to the Site are observed from the 1931 aerial photograph.
	Surrounding Area: A commercial building was deconstructed adjacent to the river, leaving vacant land.
2005 - 2017	Site: No significant changes to the Site are observed from the 1931 aerial photograph.
	Surrounding Area: No significant changes to the surrounding area are observed from the 2004 aerial photograph.
2019	Site: No significant changes to the Site can be observed from the 1931 aerial photograph, besides difference in aerial photograph coloration.
	Surrounding Area: Solar panels were constructed north of the Site.
2022	Site: No significant changes to the Site are observed from the 1931 aerial photograph.
	Surrounding Area: Additional commercial structures were constructed north of the Site.
2023	Site: No significant changes to the Site are observed from the 1931 aerial photograph.
	Surrounding Area: No significant changes can be observed from the 2022 aerial photograph.

5.4 Property Tax Files

Pennoni obtained a current tax map for the subject property from the Camden County website. A copy of the tax map is included as **Figure 2** in **Appendix A**. The subject property was identified as a portion of tax parcel Block 1274, Lot 14.

5.5 Recorded Land Title Records

The current owner of the Site is Parkside Business & Community in Partnership Inc. The Site is a portion of Block 1274, Lot 14, which was purchased through the following deed:

- September 27, 2024 – Parkside Business & Community in Partnership Inc purchases Block 1274, Lot 14 from Doris Still-Moore and the Estate of Ellen Cream (Deceased), recorded in the Camden County Clerk's Office in Book 12686, Page 799.

This deed is provided in **Appendix C**.

5.6 Historical Topographical Maps

Pennoni obtained historic topographical maps from ERIS to review past uses and activities associated with the subject property. Historic topographical maps for the Camden, NJ and Philadelphia, PA quadrangles, which includes the subject property, were reviewed for the years 1891, 1894, 1896, 1898, 1920, 1943, 1949, 1967, 1973, 1984, 1994, 1995, 2014, 2016, 2019, and 2023.

Upon review, the elevation contours and surface feature previously noted were confirmed. No significant changes to the topography of the Site or surrounding areas were observed. No buildings or other significant features are mapped on the Site. No other features or conditions considered materially significant for the purposes of this review were noted in historic topographical maps.

Copies of the historical topographical maps reviewed by Pennoni are included in **Appendix B**.

5.7 Local Street Directories

A local street directory was obtained from ERIS to review past uses and activities associated with the subject property. Pennoni reviewed city directories for the years 1926, 1931, 1940, 1943, 1954, 1959, 1971, 1976, 1980, 1985, 1990, 1995, 2000, 2002, 2008, 2012, 2016, 2020, 2023, and 2024.

The address 1500 Baird Blvd was used for the city Directory Search. Property owners for the evaluated years are identified as follows:

City Directories	
Year	**Description**
1926	1500 Baird Blvd - Fridrich Israel E
1931	1500 Baird Blvd - Borstein Jos
1940	1500 Baird Blvd - Borstein Jos

City Directories	
Year	**Description**
1943	1500 Baird Blvd - Borstein Jos
1954	1500 Baird Blvd - Borstein Meyer
1959	1500 Baird Blvd - Borstein Meyer
1971	1500 Baird Blvd - Cream Arnolo
1976	1500 Baird Blvd - Vacant
1980	1500 Baird Blvd - Mrs A Cream Jr
1985	1500 Baird Blvd - Site not identified
1990	1500 Baird Blvd - Site not identified
1995	1500 Baird Blvd - Site not identified
2000	1500 Baird Blvd - Site not identified
2002	1500 Baird Blvd - Site not identified
2008	1500 Baird Blvd - Site not identified
2012	1500 Baird Blvd - Arnold Cream, Ellen Cream
2016	1500 Baird Blvd - Site not identified
2020	1500 Baird Blvd - Site not identified
2023	1500 Baird Blvd - Site not identified
2024	1500 Baird Blvd - Site not identified

No other suspected Site occupants under different addresses were identified in the search. No occupants with the likely potential to environmentally impact the Site were identified in the City Directory Search.

Copies of the local street directories reviewed by Pennoni are included in **Appendix B**.

5.8 Previous Environmental Reports

Previous environmental reports pertaining to the subject property were not provided by the Client and were not identified from publicly available resources.

6.0 REGULATORY AGENCY RECORDS REVIEW

As part of the ESA for the subject property, Pennoni reviewed both standard and additional environmental record sources for the subject property and surrounding area. Our environmental records review consisted of a review of the following:

- the Environmental Risk Information Services Report (ERIS Report)/ERIS Radius Map Report (ERIS Report) for the subject property provided by ERIS;
- information requested from the United States Environmental Protection Agency (USEPA), Region III; and,
- information requested from the NJDEP

6.1 Standard Environmental Record Sources, Federal and State

Pennoni contracted the services of ERIS to search both state and federal environmental databases to identify potential concerns that may be associated with either the Site and/or surrounding properties. The ERIS Report provided listings, accompanied by a map, of facilities and operations with reported environmental concerns within the ASTM E 1527-21 specified search radius around the subject property.

The federal databases searched by the ERIS Report included the following:

- Federal National Priorities List (NPL) site list;
- Federal Delisted NPL site list;
- Federal Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) list;
- Federal CERCLIS No Further Remedial Action Planned (NFRAP) site list;
- Federal Resource Conservation and Recovery Act (RCRA) Corrective Action (CORRACTS) facilities list;
- Federal Treatment, Storage, and Disposal (RCRA TSD) facilities list;
- Federal RCRA (RCRA GEN) generators list;
- Federal Institutional Control/Engineering Control (IC/EC) registries; and
- Federal Emergency Response Notification System (ERNS) list.

The ERIS Report also searched the following state database files:

- State Hazardous Waste Sites (SHWS) list;
- State Solid Waste Facility/Landfill (SWF/LF) site list;
- State Leaking Underground Storage Tank (LUST) site list;
- State Registered Underground and Aboveground Storage Tank (REG UST/AST) site list;
- State Institutional Control/Engineering Control (IC/EC) registries;

• State Voluntary Cleanup Program (VCP) sites list; and

• State Brownfields sites list.

The ERIS Report is presented in **Appendix B**. Complete listings and descriptions of each of the databases searched are included in the ERIS Report.

6.1.1 Subject Property

The Site was not identified on the databases included in the ERIS Report.

6.1.2 Vicinity Properties – Facilities of Potential Concern

Pennoni reviewed vicinity properties as identified in the ERIS Report. Based on the regulatory status, distance and/or location of the properties relative to the subject property, the following significant vicinity properties were identified:

- **(1414 Bellview Ave);** HIS SPILL
    - This property is located approximately 80 feet south-southeast of the Site.
        - The HIS SPILL database identified the property with Case No: 99-12-01-1440-27. This spill is dated December 1, 1999, and is described as a spill of approximately 20 gallons of No. 2 heating oil due to a rotten tank. The case is terminated.
- **(1458 Kaighn Ave);** SPILLS
    - This property is located approximately 500 feet southeast of the Site.
        - The SPILLS database identified the property with Incident ID: 75891. The incident is dated October 23, 2003, and is described as a release of approximately 1 pint of No. 2 heating oil due to overfilling an aboveground storage tank. The incident is terminated.
- **St Bartholomew Parkside Catholic (1725 Park Blvd);** UST, SITE REMEDIATION
    - This property is located approximately 500 feet east-northeast of the Site.
        - The UST database identified this property as PI No: 023075 and PI ID: 81480. The following two USTs formerly existed on this property.
            - 5,000-gallon No. 2 heating oil, installed 01/01/1944 and removed 12/12/2000.

        - 8,000-gallon No. 2 heating oil, installed 01/01/1959 and removed 12/29/1999.

    - The SITE REMEDIATION database identified this property as Site ID: 54160 and PI ID: 023075. Based on review of the NJDEP Dataminer website, all activities associated with this case are closed or terminated.

- **St Bartholomew Catholic School (1725 Park Blvd);** NJEMS
    - This property is located approximately 500 feet east-northeast of the Site.
        - The NJEMS database identified this property as Site ID: 54160.
- **Boys & Girls Club of Camden County (1725 Park Blvd);** NJEMS, SITE REMEDIATION
    - This property is located approximately 500 feet east-northeast of the Site.
        - The NJEMS database identified this property as Site ID: 378481.
        - The SITE REMEDIATION database identified this property as Site ID: 378481 and PI ID: 469283. According to the NJDEP Dataminer website, the activity associated with this property is closed as of 2010. No reports or other documents were available for review.

Based on the locations relative to the Site and status of the regulatory cases, no impacts to the Site are expected from the surrounding properties.

6.1.3 Orphan Sites

The unfiltered ERIS Report identified 24 orphan sites, or sites which could not be mapped due to inadequate address information. Based on a review of the orphan sites summary, the listings do not present a risk to significantly impact the Site.

6.2 Regulatory Agency File and Records Review

6.2.1 New Jersey Department of Environmental Protection

Pennoni submitted online requests to the NJDEP for information regarding environmental concerns at the subject property. The following table summarizes the request submitted to the NJDEP.

Department of Environmental Protection Records Request		
Agency	**Date of Request**	**Agency Response**
NJDEP Open Public Records Act (OPRA)	July 16, 2025	Pennoni received a response from the NJDEP on July 17, 2025, indicating the Department had no responsive records. A copy of the record request correspondence is included in **Appendix C**.

In addition, Pennoni accessed the NJDEP Dataminer website on July 30, 2025, to review information available for the subject property. The Site was not identified.

6.2.2 United States Environmental Protection Agency

A request was submitted online to the United States Environmental Protection Agency (USEPA), *MyPropertyInfo* website, on July 16, 2025, to search federal files for any information regarding the subject property, and any instances of illegal waste discharges, Notices of Violations, and the current regulatory status of the subject property.

No records related to this inquiry were identified for the Site. A copy of the inquiry is contained in **Appendix C** of this report.

6.3 Additional Environmental Records Sources – Regional and Local

Additional Environmental Records Sources – Regional and Local			
Records Source	**Date of Records Request**	**Method of Request**	**Findings**
Camden County	July 16, 2025	Email	Camden County responded to the request on July 21, 2025, stating that they possess no pertinent records. A copy of the correspondence is available in **Appendix C**.

Additional Environmental Records Sources – Regional and Local			
Records Source	**Date of Records Request**	**Method of Request**	**Findings**
City of Camden	July 16, 2025	Email	The City of Camden responded to the request on July 28, 2025, stating that they possess no pertinent records. A copy of the correspondence is available in **Appendix C**.
Camden Fire Department	July 25, 2025	Mail	On July 25, 2025, Pennoni requested that the City of Camden forward the OPRA request to the fire department due to a lack of submission method from the fire department. The Camden Fire Department responded to the request on July 28, 2025, stating that there are no files on record for the subject property. A copy of the request is available in **Appendix C**.

6.3.1 McRae's Industrial Directory

Historic and present Site operations utilizing significant amounts of hazardous materials have not been identified. Sufficient historic resources were available to identify the historic Site operations. No industrial operations were conducted on the Site. Therefore, review of the industrial directory is not needed at this time.

7.0 SITE RECONNAISSANCE

Pennoni personnel completed an inspection of the subject property on July 28, 2025 to visually inspect the property for evidence of **RECs** and **BERs**. Victor Mai of Pennoni met with Mr. John Bond, Project Manager of Parkside business & Community in Partnership, Inc., prior to inspecting the Site. Details of the Site are shown on **Figure 3** in **Appendix A**. Photographs of the significant features observed during the Site visit are provided in **Appendix D**.

Methodology and Limiting Conditions	
Personnel	Victor Mai
Site Inspection Date	July 28, 2025
Methodology	The Site was observed by walking the surveyed property line.
Limiting Conditions	The interior of the structure could not be inspected due to unsafe conditions and the entryways being boarded off.

7.1 General Observations – Exterior Areas

The Site is currently improved with a vacant, fire-damaged residential structure. A concrete ramp on the west side of the structure provides access to the basement. The entryways are boarded off to prevent access to interiors. Exterior areas are sparsely vegetated. Municipal waste was observed diffusely throughout the Site. No hazardous materials were observed on the Site.

No RECs or BERs were observed in the exterior areas of the Site.

7.2 General Observations – Interior Areas

The Site is improved with a vacant two-story residential structure with basement. This structure was inaccessible due to the entryways being boarded and was deemed unsafe for entry. According to the Site escort, Mr. Bond, no storage tanks or other environmentally significant features are present in the structure. Interview with residential neighbors and visual inspection indicated that the structure has been severely damaged by a fire. No record of the fire or response was identified during this report. The presence of a past fire and lack of documentation constitutes a **BER**. Inspection by Pennoni would need to be conducted to evaluate the presence of RECs or BERs in the structure. Therefore, the lack of interior inspection constitutes a **significant data gap.**

7.3 Hazardous Substances in Connection with Identified Uses

Based on the residential occupancy, it is possible that heating oil was utilized historically by the residential structures. However, no evidence of heating oil tanks existing on the Site was identified during this report. No other hazardous substances are anticipated to have been used in significant quantities based on the historic Site operations.

7.4 Other Observations

Based on the Site reconnaissance, review of records, and historical usage of the subject property, Pennoni has identified the following conditions that may impact future development of the Site or present the potential for future environmental liability.

Other Observations	
Stains or Corrosion	Not Observed
Pits, Ponds or Lagoons	Not Observed
Stained Soil or Pavement	Not Observed
Stressed Vegetation	Not Observed
Fill Material	Not Observed
Municipal Solid Waste	Observed
Regulated Waste Disposal	Not Observed
Biomedical Waste Disposal	Not Observed
Waste Water Discharge History & Process Waste Streams	Not Observed
Wells	Not Observed
Septic Systems	Not Observed
Historic Agricultural Activity	Not Observed
Odors	Not Observed
Pools of Liquid	Not Observed
Drums/Containers	Not Observed
Unidentified Chemicals	Not Observed
Rail lines, Rail Spurs & Rail Sidings	Not Observed
Floor Drains & Sumps	Not Observed
Storage Tanks	Not Observed
Stormwater Collection & Drainage Systems	Not Observed
Loading or Transfer Areas	Not Observed
Discolored or Other Spill Areas	Not Observed
Compressor Vent Discharges	Not Observed
Non-Contact Cooling Water	Not Observed
Process Area Sinks and Piping which Receive Process Waste	Not Observed
Roof Leaders when Process Operations Vent to the Roof	Not Observed

7.4.1 Municipal Solid Waste

Municipal solid waste was observed throughout the exterior of the Site. No hazardous materials were observed on the Site.

7.5 Polychlorinated Biphenyls

Polychlorinated biphenyls (PCBs) are a class of compounds that were developed in the 1930s and became widely used in industry from the mid-1900s to the late 1970s. The flame resistance of PCBs made them ideal for use in electrical equipment and they did not break down or react with other chemicals, even under extreme conditions of high temperature and pressure. PCBs were commonly used, therefore, in hydraulic fluids, lubricating oils, and transformers, electric motors, switches, and capacitors (including fluorescent lighting ballasts), as well as in paints, plastics, and other household items.

Because PCBs persist in the environment and, because they are fat-soluble, they bio-accumulate in the food chain, the elimination of PCBs from distribution in commerce was mandated in federal legislation in the late 1970s. For economic reasons, however, the use of PCBs in existing equipment was allowed to continue for the useful or normal life of the equipment, as long as specific conditions were met. At present, many industrial facilities continue to rely upon PCB-containing equipment and transformers, while many commercial and residential structures continue to use lighting fixtures, switches, and other articles that contain some level of PCBs.

No transformers, capacitors, elevators, hydraulic equipment, or other common PCB-containing features were observed on the Site. Therefore, impacts relative to PCBs are not anticipated on the Site.

7.6 Potential Vapor Migration Pathways

Pennoni conducted a limited visual inspection throughout the buildings to determine the potential for subsurface vapors to enter the subject property structures. A Tier 1 Vapor Encroachment Screening (VES) for the subject property pursuant to ASTM E2600-15 Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions was not performed.

Based on review of NJ-GeoWeb, no groundwater Classification Exception Areas are located within 100' of the Site boundary. No significant amounts of chemicals with the potential to cause volatile organic compound contamination to the Site have been identified; however, information regarding the past heating methods and potential oil tanks is unknown. For these reasons, vapor encroachment is not a concern for the Site; however, if future investigations identify oil tanks in connection with the Site, further evaluation of vapor encroachment should be conducted.

8.0 INTERVIEWS

Pennoni conducted the following interviews in relation to the Site.

Interviews		
Title	**Contact**	**Comments**
Key Site Manager	John Bond, Project Manager for Parkside Business & Community in Partnership, Inc.	To the best of Mr. Bond's knowledge, there have been no adverse environmental conditions on the subject property. Mr. Bond informed Pennoni that he is not aware of any heating oil tanks on the Site.
Past Owners, Operators, Occupants, and Neighbors	Not Disclosed	A neighboring residential occupant stated that a fire had severely damaged the interior of the Site structure.
Environmental Professionals	Not Applicable	No Environmental Professional associated with the subject property was interviewed at the time of the assessment.

9.0 DATA GAPS AND DEVIATIONS

According to the Standards and Practices for All Appropriate Inquiries, Phase I Environmental Site Assessments must identify data gaps that would affect the ability of the environmental professional to identify conditions indicative of releases or threatened releases of pollutants, contaminants, petroleum and petroleum products, and controlled substances on the subject properties and to explain the significance of these data gaps. The following issues represent instances when either the investigation was hindered in some way, or where some issue was identified as a potential for concern but insufficient information was available to draw a conclusion or rule out that the issue did not represent a recognized environmental condition.

No property valuation was provided for review; however, the Client stated that the purchase price/loan amount for the Site reasonably reflects the fair market value. Therefore, Pennoni does not consider this a significant data gap.

Pennoni was unable to interview former owners of the subject property; however, the previous uses of the subject property are documented in the historical sources reviewed by Pennoni. Therefore, Pennoni does not consider this data gap to be a significant constraint on our ability to provide an opinion regarding RECs on the subject property.

The interior of the residential structure was unable to be inspected due to the entryways being boarded up and unsafe structural conditions. Based on exterior visual observation and interview with a residential neighbor indicates that a fire severely damaged the structure; however, the interior damage could not be evaluated. The Site escort, Mr. Bond, stated that there are no heating oil tanks in the structure; however, inspection by Pennoni would be required to confirm this. Therefore, the lack of interior inspection **is considered a significant data gap**.

10.0 NON-SCOPE CONSIDERATIONS

Pennoni reviewed available information regarding the following non-scope considerations.

Substances that are outside the scope of this practice (for example, emerging contaminants that are not hazardous substances under the CERCLA) may be regulated under state law and may be federally regulated in the future.

Historically, many production processes may have included the use of per- and polyfluoroalkyl substances (PFAS), including but not limited to metal plating applications, particularly chrome plating processes, soap/ cleaning product manufacturing, industrial cleaners, textile manufacturers, car washes, printing, plastic/resin manufacturing. No operations were identified on the Site which likely included the manufacturing or use of PFAS (in addition to perfluorooctanoic acid/perfluorooctane sulfonate (PFOA/PFOS)); however, a reported fire which was extinguished at the Site had no available records to detail the source of the fire suppression used (i.e., water or aqueous film-forming foam (AFFF)). AFFF is known to contain PFAS which can contaminate a property if used. However, it's likely that water was used since the property was residential and fire foams are typically reserved for use in chemical / industrial fires. Due to the unknown fire suppression utilized to extinguish the fire, this is identified as a **BER** in connection with the Site.

Except for PFOA and PFOS, the remaining PFAS are not a listed as a hazardous substance under CERCLA nor are they a petroleum product; therefore, the assessment of the potential use of the remaining PFAS at the subject property is considered a non-scope consideration with respect to the Phase I ESA.

The remaining non-scope considerations as defined in ASTM E1527-21 are considered beyond the scope of standard practice and not included in this contract.

11.0 FINDINGS AND CONCLUSIONS

Pennoni conducted a Phase I ESA of the Site in accordance with ASTM E1527-21. Our conclusions regarding **RECs**, **CRECs**, **HRECs**, **BERs,** and **significant data gaps** in connection with the Site are summarized below.

Pennoni did not identify any **RECS, CRECs or HRECs** in connection with the Subject Property.

Pennoni identified the following **BERs** in connection with the Site:

BER-1: Fire Damage – Based on visual inspection and interview with a residential neighbor, the Site structure was severely damaged by a fire. The interior of the structure could not be inspected due to the entryways being boarded off and the unsafe conditions caused by the fire and aging infrastructure. No documentation of the fire was identified through publicly available resources and the Camden Fire Department stated they have no records for the Site. The date of the incident, extent of the damage, and other significant details are unknown.

Fire has the potential to deposit polycyclic aromatic hydrocarbons, metals, dioxins, furans, and other contaminants to Site material. Depending on the nature of the fire, AFFF could have been used in firefighting efforts. AFFF is known to contain PFAS, which has the potential to contaminate Site media. However, it's likely that water was used since the property was residential and fire foams are typically reserved for use in chemical / industrial fires. For these reasons, the fire damage is considered a **BER**.

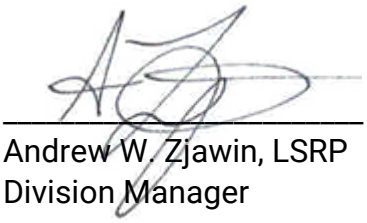
BER-2: Historic Unknown Heating Sources – The residential structure on the property was constructed circa 1920. The heating source for this structure is unknown. Based on the date of construction, it is likely that they initially utilized coal; however, the source could have changed to fuel oil or natural gas during later years. No evidence of USTs was observed during Site reconnaissance; however, heating oil USTs and/or ASTs could potentially exist on the Site as no records of tank removals were obtained from local / regional records requests for this Site. The potential presence of former heating sources at the Site constitutes a **BER**.

Pennoni identified the following **significant data gap** in connection with the Site:

Inaccessible Structure Interior – The interior of Site structure was unable to be inspected during the Site inspection due to the entryways being boarded up and unsafe building conditions resulting from age and fire damage.

12.0 ENVIRONMENTAL PROFESSIONAL STATEMENT AND SIGNATURE

I declare that, to the best of my professional knowledge and belief, I meet the definition of an "environmental professional" as defined at 40 C.F.R. §312.10. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. I have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 C.F.R. Part 312.



Andrew W. Zjawin, LSRP
Division Manager

Qualifications are provided in **Appendix E**.

121	1 of6	ESE	0.46 / 2,447.52	34.26 / 0	Camden City Water Department Parkside Well Field Contamination Vesper & Park Boulevards Camden City NJ	PUB FUNDED

Unique ID:	41	**Township:**	Camden City
Operating Status:	Active	**County:**	Camden County

Site Name: Camden City Water Department Parkside Well Field Contamination
Block: 1279
Lot: 1A
Type of Fac: Municipal Well Field
Property Size: 0.5 Acre
Surroun Land Use: Residential/Commercial
Category: Non-Superfund
State Lead, IEC
Site Name Description: Vesper & Park Boulevards
Project Status: (1) Receptor Control (Air Stripper)- RI/RAS: Not Required
, DESIGN: Completed , CONSTR: Completed , O&M: Not Required

Desc/Res of Environmental Concerns:

The Parkside Well Field supplies Camden City with 20% of its water supply during peak usage periods. In 1988 routine sampling revealed that the water from the three supply wells at the well field was contaminated with chlorinated volatile organic compounds at levels exceeding New Jersey Drinking Water Standards. For several years the water was effectively treated at the well field using minor treatment technologies but in 1997 increasing levels of contamination forced the Camden City Water Department to shut the wells down. NJDEP's Remedial Response Element subsequently completed a water supply alternatives analysis that

concluded the most cost-effective remedy was to install an air stripper at the well field to treat two of the supply wells and keep the third well out of service. The City of Camden completed construction of the air stripper in 1999 using funds provided by NJDEP and is operating and maintaining the system. Additional investigative work is underway to identify possible sources of the ground water contamination at this site.

Media Affected

Status:	Confirmed
Media Affected:	Ground Water
Contaminants:	Volatile Organic Compounds
Status:	Treating
Media Affected:	Potable Water
Contaminants:	Volatile Organic Compounds

Handler Summary

Importer:	No	**Used Oil Transpor:**	No
Mixed Waste Gen:	No	**Used Oil Trans Fac:**	No
Transporter:	No	**Used Oil Processor:**	No
Transfer Facility:	No	**Used Oil Refiner:**	No
Recycler:	No	**Used Oil Burner:**	No
Onsite Burner Exem:	No	**Commercial TSD:**	No
Furnace Exemption:	No	**Recycl Nonstorage:**	No
Underground Injec:	No		

Used Oil Market Burner: No
Used Oil Spec Marketer: No

Hazardous Waste Handler Details

Seq No: 1
Receive Date: 19800818
Handler Name: BORDEN CHEMICAL PRINTING INK
Fed Waste Generator: 1
Generator Code Description: Large Quantity Generator
Source Type: Notification

Waste Code Details

Waste Code: D000
Waste Code Desc: DESCRIPTION

Waste Code: D001
Waste Code Desc: IGNITABLE WASTE

Waste Code: F002
Waste Code Desc: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Code Desc: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Code Desc: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: K086
Waste Code Desc: SOLVENT WASHES AND SLUDGES, CAUSTIC WASHES AND SLUDGES, OR WATER WASHES AND SLUDGES FROM CLEANING TUBS AND EQUIPMENT USED IN THE FORMULATION OF INK FROM PIGMENTS, DRIERS, SOAPS, AND STABILIZERS CONTAINING CHROMIUM AND LEAD.

Waste Code: P030
Waste Code Desc: CYANIDES (SOLUBLE CYANIDE SALTS), NOT OTHERWISE SPECIFIED

Waste Code: U002
Waste Code Desc: 2-PROPANONE (I) (OR) ACETONE (I)

Waste Code: U031
Waste Code Desc: 1-BUTANOL (I) (OR) N-BUTYL ALCOHOL (I)

Waste Code: U056
Waste Code Desc: BENZENE, HEXAHYDRO- (I) (OR) CYCLOHEXANE (I)

Waste Code: U069
Waste Code Desc: 1,2-BENZENEDICARBOXYLIC ACID, DIBUTYL ESTER (OR) DIBUTYL PHTHALATE

Waste Code: U080
Waste Code Desc: METHANE, DICHLORO- (OR) METHYLENE CHLORIDE

Waste Code: U088
Waste Code Desc: 1,2-BENZENEDICARBOXYLIC ACID, DIETHYL ESTER (OR) DIETHYL PHTHALATE

Waste Code: U102
Waste Code Desc: 1,2-BENZENEDICARBOXYLIC ACID, DIMETHYL ESTER (OR) DIMETHYL PHTHALATE

Waste Code: U107
Waste Code Desc: 1,2-BENZENEDICARBOXYLIC ACID, DIOCTYL ESTER (OR) DI-N-OCTYL PHTHALATE

Waste Code: U112
Waste Code Desc: ACETIC ACID, ETHYL ESTER (I) (OR) ETHYL ACETATE (I)

Waste Code: U140
Waste Code Desc: 1-PROPANOL, 2-METHYL- (I,T) (OR) ISOBUTYL ALCOHOL (I,T)

Waste Code: U154
Waste Code Desc: METHANOL (I) (OR) METHYL ALCOHOL (I)

Waste Code: U159
Waste Code Desc: 2-BUTANONE (I,T) (OR) METHYL ETHYL KETONE (MEK) (I,T)

Waste Code: U161
Waste Code Desc: 4-METHYL-2-PENTANONE (I) (OR) METHYL ISOBUTYL KETONE (I) (OR) PENTANOL, 4-METHYL-

Waste Code: U171
Waste Code Desc: 2-NITROPROPANE (I,T) (OR) PROPANE, 2-NITRO- (I,T)

Waste Code: U220
Waste Code Desc: BENZENE, METHYL- (OR) TOLUENE

Waste Code: U226
Waste Code Desc: ETHANE, 1,1,1-TRICHLORO- (OR) METHYL CHLOROFORM

Waste Code: U239
Waste Code Desc: BENZENE, DIMETHYL- (I,T) (OR) XYLENE (I)

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13 and E1527-21, Section 8.1.8 Sources of Standard Source Information:

"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."

Standard Environmental Record Sources

Federal

National Priority List: NPL

The U.S. Environmental Protection Agency (EPA)'s National Priorities List (NPL) includes the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program, based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action. This data includes NPL sites represented as polygons, where available, that can be sourced from the EPA NPL Superfund Site Boundaries dataset, refreshed by the Shared Enterprise Geodata and Services (SEGS). These site boundaries represent the footprint of a whole site, the sum of all the Operable Units (OUs) and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. As site investigation and remediation progress, OUs may be added, modified or refined. Data provided by external parties is not independently verified by EPA. This boundary data is made available to the public strictly for informational purposes. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Mar 8, 2025

National Priority List - Proposed: PROPOSED NPL

Sites proposed by the U.S. Environmental Protection Agency (EPA), the state agency, or concerned citizens for addition to the National Priorities List (NPL) due to contamination by hazardous waste and identified by the EPA as a candidate for cleanup because it poses a risk to human health and/or the environment. Sites represented as polygons, where available, can be sourced from the EPA NPL Superfund Site Boundaries dataset, refreshed by the Shared Enterprise Geodata and Services (SEGS). These site boundaries represent the footprint of a whole site, the sum of all the Operable Units (OUs) and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Data provided by external parties is not independently verified by EPA. This boundary data is made available to the public strictly for informational purposes. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Mar 8, 2025

Deleted NPL: DELETED NPL

Sites deleted from the U.S. Environmental Protection Agency (EPA)'s National Priorities List (NPL). The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate. Sites represented as polygons, where available, can be sourced from the EPA NPL Superfund Site Boundaries dataset, refreshed by the Shared Enterprise Geodata and Services (SEGS). These site boundaries represent the footprint of a whole site, the sum of all the Operable Units (OUs) and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Data provided by external parties is not independently verified by EPA. This boundary data is made available to the public strictly for informational purposes. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Mar 8, 2025

SEMS List 8R Active Site Inventory: SEMS

The U.S. Environmental Protection Agency's (EPA) Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted. This data includes SEMS sites from the List 8R Active file as well as applicable sites from the EPA's Facility Registry Service map tool.

Government Publication Date: Apr 25, 2025

SEMS List 8R Archive Sites: SEMS ARCHIVE

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. This data includes sites from the List 8R Archived site file.

Government Publication Date: Apr 25, 2025

Inventory of Open Dumps, June 1985: ODI

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

Government Publication Date: Jun 1985

EPA Report on the Status of Open Dumps on Indian Lands: IODI

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

Government Publication Date: Dec 31, 1998

Comprehensive Environmental Response, Compensation and Liability Information System - CERCLIS: CERCLIS

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

Government Publication Date: Oct 25, 2013

CERCLIS - No Further Remedial Action Planned: CERCLIS NFRAP

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Government Publication Date: Oct 25, 2013

CERCLIS Liens: CERCLIS LIENS

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA). This database was provided by the United States Environmental Protection Agency (EPA). Refer to SEMS LIEN as the current data source for Superfund Liens.

Government Publication Date: Jan 30, 2014

RCRA CORRACTS-Corrective Action: RCRA CORRACTS

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

Government Publication Date: Jan 6, 2025

RCRA non-CORRACTS TSD Facilities: RCRA TSD

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites that have indicated engagement in the treatment, storage, or disposal of hazardous waste which requires a RCRA hazardous waste permit.

Government Publication Date: Jan 6, 2025

RCRA Generator List: RCRA LQG

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.

Government Publication Date: Jan 6, 2025

RCRA Small Quantity Generators List: RCRA SQG

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

Government Publication Date: Jan 6, 2025

RCRA Very Small Quantity Generators List: RCRA VSQG

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Very Small Quantity Generators (VSQG) generate 100 kilograms or less per month of hazardous waste, or one kilogram or less per month of acutely hazardous waste. Additionally, VSQG may not accumulate more than 1,000 kilograms of hazardous waste at any time.

Government Publication Date: Jan 6, 2025

RCRA Non-Generators: RCRA NON GEN

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

Government Publication Date: Jan 6, 2025

RCRA Sites with Controls: RCRA CONTROLS

List of Resource Conservation and Recovery Act (RCRA) facilities with institutional controls in place. RCRA gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances.

Government Publication Date: Jan 6, 2025

Federal Engineering Controls-ECs: FED ENG

List of Engineering controls (ECs) made availabe by the United States Environmental Protection Agency (EPA). ECs encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. The EC listing includes remedy component data from Superfund decision documents for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: May 30, 2025

Federal Institutional Controls- ICs: FED INST

List of Institutional controls (ICs) made available by the United States Environmental Protection Agency (EPA). ICs are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site. The IC listing includes remedy component data from Superfund decision documents for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: May 30, 2025

Land Use Controls Information System: LUCIS

The Land Use Controls Information System (LUCIS) database is sourced from the U.S. Department of the Navy (DON). This data contains information for former Base Realignment and Closure (BRAC) properties across the United States. DON's BRAC office was tasked with tracking certain base closures while requiring the prevention of risks to human health and the environment of those properties with LUCs in place. Regarding currently available LUC Sites data, the sites listing is limited to centroid point locations for the overall installation property boundaries. Formerly obtained LUC Sites data may reflect site details that applied previously for a BRAC property.

Government Publication Date: Jun 13, 2024

Institutional Control Boundaries at NPL sites: NPL IC

These boundaries of Institutional Control areas at sites on the U.S. Environmental Protection Agency's (EPA) National Priorities List (NPL), or as Proposed or Deleted, are sourced from the EPA NPL Superfund Site Boundaries dataset, refreshed by the Shared Enterprise Geodata and Services (SEGS). The EPA's NPL includes the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. Institutional controls are non-engineered instruments such as administrative and legal controls that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Data provided by external parties is not independently verified by EPA. This boundary data is made available to the public strictly for informational purposes.

Government Publication Date: Mar 8, 2025

Emergency Response Notification System: ERNS 1982 TO 1986

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1982-1986

Emergency Response Notification System: ERNS 1987 TO 1989

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1987-1989

Emergency Response Notification System: ERNS

Database of oil and hazardous substances spill reports made available by the United States Coast Guard National Response Center (NRC). The NRC fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. These data contain initial incident data that has not been validated or investigated by a federal/state response agency.

Government Publication Date: Apr 6, 2025

The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database: FED BROWNFIELDS

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This data is provided by the United States Environmental Protection Agency (EPA) and includes Brownfield sites from the Cleanups in My Community (CIMC) web application.

Government Publication Date: Feb 19, 2025

FEMA Underground Storage Tank Listing: FEMA UST

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

Government Publication Date: Dec 31, 2017

Facility Response Plan: FRP

This listing contains facilities that have submitted Facility Response Plans (FRPs) to the U.S. Environmental Protection Agency (EPA). Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit FRPs. Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments. This listing includes FRP facilities from an applicable EPA FOIA file and Homeland Infrastructure Foundation-Level Data (HIFLD) data file.

Government Publication Date: Jan 9, 2024

Delisted Facility Response Plans: DELISTED FRP

Facilities that once appeared in - and have since been removed from - the list of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

Government Publication Date: Jan 9, 2024

Historical Gas Stations: HIST GAS STATIONS

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

Government Publication Date: Jul 1, 1930

Petroleum Refineries: REFN

This list of petroleum refineries is sourced from the U.S. Energy Information Administration (EIA), Refinery Capacity Report. The listing includes operating and idle petroleum refineries (including new refineries under construction) and refineries shut down during the previous year. The geographic area the report covers is the 50 States, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, Guam, and other U.S. possessions. Per the EIA, the facility location data represents the approximate location based on research of publicly available information from sources such as Federal agencies, company websites, and satellite images on public websites.

Government Publication Date: Oct 31, 2024

Petroleum Product and Crude Oil Rail Terminals: BULK TERMINAL

A list of petroleum product and crude oil rail terminals from the U.S. Energy Information Administration (EIA), as well as petroleum terminals sourced from Oak Ridge National Laboratory hosted by the Homeland Infrastructure Foundation-Level Database. Data includes operable bulk petroleum product terminals with a total bulk shell storage capacity of 50,000 barrels or more, and/or the ability to receive volumes from tanker, barge, or pipeline; also rail terminals handling the loading and unloading of crude oil with activity between 2017 and 2018. EIA petroleum product terminal data comes from the EIA-815 Bulk Terminal and Blender Report, which includes working, shell in operation, and shell idle for several major product groupings.

Government Publication Date: Oct 31, 2024

LIEN on Property: SEMS LIEN

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) provides Lien details on applicable properties, such as the Superfund lien on property activity, the lien property information, and the parties associated with the lien.

Government Publication Date: Apr 25, 2025

Superfund Decision Documents: SUPERFUND ROD

This database contains a list of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include completed Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD) for active and archived sites stored in the Superfund Enterprise Management System (SEMS), along with other associated memos and files. This information is maintained and made available by the U.S. Environmental Protection Agency.

Government Publication Date: May 30, 2025

State

Air Permit Storage Vessels: TANK AIR PERMIT

List of air permitted storage vessels provided by the New Jersey Department of Environmental Protection (DEP) Division of Air Quality Bureau of Stationary Sources (BOSS). Includes aboveground storage tanks, underground storage tanks, and other miscellaneous types of storage vessels with General (GEN), Preconstruction (PCP), and Title V Operating Permits (BOP).

Government Publication Date: Mar 25, 2025

Historical Fill Areas: HIST FILL

Areas of historic fill covering more than approximately 5 acres, where historic fill is described as non-indigenous material placed on a site in order to raise the topographic elevation of the site. The Brownfield Contaminated Site Remediation Act (N.J.S.A. 58:10B-1 et seq.) requires the Department of Environmental Protection to map regions of the state where large areas of historic fill exist. No representation is made as to the composition of the fill or presence of contamination in the fill. Some areas mapped as fill may contain chemical-production waste or ore-processing waste that exclude them from the legislative definition of historic fill. Data made available by the New Jersey Department of Environmental Protection, Division of Water Supply and Geoscience.

Government Publication Date: Mar 26, 2018

Site Remediation Program Delisted Sites List: DELISTED SRP

A list of sites that once appeared on the Site Remediation Program site list from the New Jersey Department of Environmental Protection (NJDEP) Data Miner but are no longer on the list.

Government Publication Date: Mar 17, 2025

Known Contaminated Sites in New Jersey: SHWS

The Known Contaminated Sites List (KCSNJ) for New Jersey are those sites and properties where contamination of soil or ground water has been confirmed at levels equal to or greater than applicable standards. This list of Known Contaminated Sites may include sites where remediation is either currently under way, required but not yet initiated, or has been completed. Record details from GIS Open Data KCSNJ and New Jersey Department of Environmental Protection (NJDEP) Site Remediation Program KCSNJ Active, Pending, and Closed Sites reports. This database serves a purpose similar to that of the federal Superfund Enterprise Management System (SEMS), functioning as a state-level counterpart for tracking potential hazardous substance release sites.

Government Publication Date: Apr 24, 2025

Delisted Known Contaminated Sites: DSHW

The listing of sites that once appeared on - and have since been removed from - the list of Known Contaminated Sites in New Jersey (KCSNJ). KCSNJ is an inventory that includes all sites in New Jersey with confirmed contamination. Sites are classified as either 'Active Sites with Confirmed Contamination', 'Pending Sites with Confirmed Contamination', or 'Closed Sites with Remediated Contamination'. Active Sites are those sites having one or more active cases (with any number of pending and/or closed cases). Pending Sites are those sites having one or more pending cases, no active cases, and any number of closed cases. Closed sites are those sites having only closed cases (sites in this category have no active or pending cases).

Government Publication Date: Apr 24, 2025

Site Remediation Program: SITE REMEDIATION

List of Site Remediation Program sites from the New Jersey Department of Environmental Protection (NJDEP) Data Miner. Includes: cases where contamination is suspected, but not yet confirmed (including potential LUST cases); publicly funded as well as privately funded sites; sites with Underground Storage Tank (UST) contamination and remediation (LUST); Superfund sites, Brownfields, Licensed Site Remediation Professional (LSRP) sites; and sites under the Industrial Site Recovery Act (ISRA).

Government Publication Date: Mar 17, 2025

Site Re-Evaluation: RE EVAL

The sites listed were removed from the Department of Environmental Protection (DEP) Known Contaminated Sites in New Jersey (KCSNJ) report for reevaluation by the Site Remediation Program. These pending sites were a group of contaminated sites awaiting the execution of an oversight document, such as a Memorandum of Agreement or Administrative Consent Order, or the availability of resources for a publicly funded action prior to assignment to a specific remedial bureau. Due to the longevity that some of these sites had in this status and the possibility that some of the pending environmental concerns may have been addressed through subsequent remedial activities, the Department started reevaluating the pending environmental issues against the site's remedial history and current conditions. This database serves a purpose similar to that of the federal Superfund Enterprise Management System (SEMS), functioning as a state-level counterpart for tracking potential hazardous substance release sites.

Government Publication Date: Sept 2007

Solid Waste Facilities and Landfills: SWF/LF

The New Jersey Department of Environmental Protection (DEP) Solid and Hazardous Waste Management Program maintains the New Jersey Landfill database. The information has been compiled from several data sources and includes not only registered landfills, but also suspected illegal and preregulatory sites. The DEP describes the list as a work in progress.

Government Publication Date: Feb 1, 2024

Non-Operating Landfills List: NON OLF

List of Non-Operating Landfills, including those having suspected or known contamination. The landfills included in this list are non-operating and historic landfills identified by, or reported to, the Department of Environmental Protection. The Site Remediation Program developed this inventory, through collaboration with local and regional environmental agencies, community representatives, and through review of historic materials, to prevent injury to human and ecological resources.

Government Publication Date: Jul 2007

Authorized New Jersey Incinerators: INCINERATORS

List of Authorized New Jersey Incinerators made available by the New Jersey Department of Environmental Protection.

Government Publication Date: Feb 16, 2024

LUST- Leaking Underground Storage Tanks: LUST

A listing of the regulated Underground Storage Tank (UST) contamination cases recorded by the New Jersey Department of Environmental Protection (NJDEP) Site Remediation and Waste Management (SRWM) program. Contains remedial and non-remedial information on sites subject to the Underground Storage of Hazardous Substances Act.

Government Publication Date: Apr 4, 2025

UST Active Remediation: UST REM

List of regulated Underground Storage Tanks (USTs) that have a cleanup underway, made available by the New Jersey Department of Environmental Protection (DEP) DataMiner.

Government Publication Date: Jun 11, 2025

Historic LUST- Leaking Underground Storage Tanks: HIST LUST

Historic Leaking Underground Storage Tanks. Spill records taken from Pre-2002 Incidents database (historic). This is no longer maintained or updated by the New Jersey Department of Environmental Protection (DEP).

Government Publication Date: Dec 1, 2002

Delisted Leaking or Remediation Storage Tanks: DELISTED LST

Sites removed from the Site Remediation and Waste Management (SRWM) program's Underground Storage Tank (UST) contamination cases or the Department of Environmental Protection (DEP)'s list of Underground Storage Tank (UST) Active Remediation.

Government Publication Date: Jun 11, 2025

Delisted Storage Tank Remediation: DELIST STR

This database contains a list of the inactive tanks removed from the New Jersey Department of Environmental Protection (DEP)'s UST Active Remediation database.

Government Publication Date: Jul 07, 2016

Underground Storage Tanks: UST

This list of Underground Storage Tank (UST) facilities is provided by the New Jersey Department of Environmental Protection (NJDEP) through fulfilled public record request files and the NJDEP's Bureau of GIS data layer files.

Government Publication Date: Jun 12, 2025

Delisted Storage Tanks: DELISTED TNK

This database contains a list of storage tank sites that were removed from the New Jersey Department of Environmental Protection (DEP) under their Underground Storage Tank Program.

Government Publication Date: Jun 12, 2025

Major Facilities: MAJOR FAC

List of Discharge Prevention Program Petroleum and Other Hazardous Substances major & minor facilities maintained by the New Jersey Department of Environmental Protection (DEP) Bureau of Release Prevention. The Spill Compensation and Control Act (the Spill Act, N.J.S.A. 58:10-23.11), establishes storage capacity as the basis for determining if a facility is major and thus subject to the Spill Act's planning requirements. A major facility is defined as a facility with a total, aggregate storage capacity of 20,000 gallons or more of hazardous substances other than petroleum products; 200,000 gallons or more of all hazardous substances including petroleum products; or an equivalent measure for substances not commonly measured by volume. This list also includes the status of minor facilities.

Government Publication Date: May 28, 2025

Declaration of Environmental Restrictions / Deed Notices: DEED

List of all Declaration of Environmental Restrictions / Deed Notices (DER/DN) issued within the New Jersey Department of Environmental Protection (DEP) Site Remediation and Waste Management (SRWM) program. "DER/DN" refers to a document that provides notice of specific real property contamination issues in accordance with N.J.A.C. 7:26 E, Appendix E.

Government Publication Date: May 21, 2025

Sites with a Classification Exception Area: CEA

Sites with a Classification Exception Area (CEA) issued within the New Jersey Department of Environmental Protection (DEP) Site Remediation and Waste Management (SRWM) program. A CEA is an area where one or more constituent standards and designated uses are suspended in accordance with N.J.A.C. 7:9 C-1.6.

Government Publication Date: May 21, 2025

Publicly Funded Cleanups Site Status Report 2003: PUB FUNDED

The Publicly Funded Cleanup Site Status Report (2003) details efforts by the New Jersey Department of Environmental Protection's (NJDEP) Site Remediation and Waste Management Program (SRWM) to investigate and clean up contaminated properties using public funds.

Government Publication Date: Dec 1, 2003

Brownfields: BROWNFIELDS

List of brownfields provided by the New Jersey's Online Searchable Database for Brownfield Properies, in addition to the NJ Deparment of Environemental Protection's Brownfield Development Areas (Block and Lots) of New Jersey map application.

Government Publication Date: Nov 24, 2022

Brownfield Development Areas Polygons: BFLD DEV

A list of Brownfield Development Areas (BDAs) in New Jersey. Includes BDA boundaries as well as brownfield applicable properties within the BDA boundaries. A brownfield is any former or current commercial or industrial site that is currently vacant or underutilized and on which there has been, or there is suspected to have been, a discharge of contamination. Under the BDA approach, New Jersey Department of Environmental Protection (NJDEP) works with selected communities affected by multiple brownfields to design and implement remediation and reuse plans for these properties simultaneously. This data set is made available by the New Jersey Department of Environmental Protection Bureau of GIS.

Government Publication Date: Jan 31, 2024

Voluntary Cleanup Program Sites: VCP

The New Jersey Department of Environmental Protection (NJDEP)'s Voluntary Cleanup Program (VCP) was eliminated when the Site Remediation Reform Act was signed into law on May 7, 2009.

Government Publication Date: May 7, 2009

Tribal

Leaking Underground Storage Tanks on Indian Lands: INDIAN LUST

This list of leaking underground storage tanks (LUSTs) on Tribal/Indian Lands in Region 2, which includes New Jersey, is made available by the United States Environmental Protection Agency (EPA). There are no federally recognized Tribes in New Jersey, according to the U.S. Department of Interior, Bureau of Indian Affairs.

Government Publication Date: Jan 28, 2016

Underground Storage Tanks (USTs) on Indian Lands: INDIAN UST

This list of underground storage tanks (USTs) on Tribal/Indian Lands in Region 2, which includes New Jersey, is made available by the United States Environmental Protection Agency (EPA). There are no federally recognized Tribes in New Jersey, according to the U.S. Department of Interior, Bureau of Indian Affairs.

Government Publication Date: Apr 4, 2016

Delisted Tribal Leaking Storage Tanks: DELISTED INDIAN LST

Leaking Underground Storage Tank (LUST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian LUST lists made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Apr 1, 2025

Delisted Tribal Underground Storage Tanks: DELISTED INDIAN UST

Underground Storage Tank (UST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian UST lists made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Apr 1, 2025

County

No County standard environmental record sources available for this State.

Additional Environmental Record Sources

Federal

PFAS Greenhouse Gas Emissions Data: PFAS GHG

The U.S. Environmental Protection Agency's Greenhouse Gas Reporting Program (GHGRP) collects Greenhouse Gas (GHG) data from large emitting facilities (25,000 metric tons of carbon dioxide equivalent (CO2e) per year), and suppliers of fossil fuels and industrial gases that results in GHG emissions when used. Includes GHG emissions data for facilities that emit or have emitted since 2010 chemicals identified in EPA's CompTox Chemicals Dashboard list of PFAS without explicit structures and list of PFAS structures in DSSTox. PFAS emissions data has been identified for facilities engaged in the following industrial processes: Aluminum Production (GHGRP Subpart F), HCFC-22 Production and HFC-23 Destruction (Subpart O), Electronics Manufacturing (Subpart I), Fluorinated Gas Production (Subpart L), Magnesium Production (Subpart T), Electrical Transmission and Distribution Equipment Use (Subpart DD), and Manufacture of Electric Transmission and Distribution Equipment (Subpart SS). Over time, other industrial processes with required GHGRP reporting may include PFAS emissions data and the list of reportable gases may change over time. Note that some regulatory programs have specified chemical structure requirements that define PFAS differently than the lists in EPA's CompTox Chemicals Dashboard.

Government Publication Date: May 9, 2025

On-Scene Coordinator Response Sites: OSC RESPONSE

This list of On-Scene Coordinator (OSC) Response Sites is provided by the U.S. Environmental Protection Agency (EPA). OSCs are the federal officials responsible for monitoring or directing responses to all oil spills and hazardous substance releases reported to the federal government. OSCs coordinate all federal efforts with, and provide support and information to local, state, and regional response communities. An OSC is an agent of either EPA or the U.S. Coast Guard (USCG), depending on where the incident occurs. EPA's OSCs have primary responsibility for spills and releases to inland areas and waters. USCG OSCs have responsibility for coastal waters and the Great Lakes. In general, an OSC has the following key responsibilities during and after a response: Assessment, Monitoring, Response Assistance, and Evaluation.

Government Publication Date: Apr 4, 2024

Facility Registry Service/Facility Index: FINDS/FRS

The Facility Registry Service (FRS) is a centrally managed database that identifies facilities, sites, or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, and data collected from EPA's Central Data Exchange registrations and data management personnel. This list is made available by the U.S. Environmental Protection Agency (EPA).

Government Publication Date: Apr 23, 2025

Toxics Release Inventory (TRI) Program: TRIS

The U.S. Environmental Protection Agency's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of toxic chemicals from U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. There are currently 770 individually listed chemicals and 33 chemical categories covered by the TRI Program. Facilities that manufacture, process or otherwise use these chemicals in amounts above established levels must submit annual reporting forms for each chemical. Note that the TRI chemical list does not include all toxic chemicals used in the U.S. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment. This database includes TRI Reporting Data for calendar years 1987 through 2021 and Preliminary Data for 2022.

Government Publication Date: Sep 20, 2023

PFOA/PFOS Contaminated Sites: PFAS NPL

This list of Superfund Sites with Per- and Polyfluoroalkyl Substances (PFAS) detections is made available by the U.S. Environmental Protection Agency (EPA) in their PFAS Analytic Tools data, previously the list was obtained by EPA FOIA requests. EPA's Office of Land and Emergency Management and EPA Regional Offices maintain what is known about site investigations, contamination, and remedial actions under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) where PFAS is present in the environment. Limitations: Detections of PFAS at National Priorities List (NPL) sites do not mean that people are at risk from PFAS, are exposed to PFAS, or that the site is the source of the PFAS. The information in the Superfund NPL and Superfund Alternative Agreement (SAA) PFAS detection site list is years old and may not be accurate today. Site information such as site name, site ID, and location has been confirmed for accuracy; however, PFAS-related information such as media sampled, drinking water being above the health advisory, or mitigation efforts has not been verified. For Federal Facilities data, the other Federal agencies (OFA) are the lead agency for their data and provided them to EPA.

Government Publication Date: Jun 30, 2025

Federal Agency Locations with Known or Suspected PFAS Detections: PFAS FED SITES

This list of federal agency locations with known or suspected detections of Per- and Polyfluoroalkyl Substances (PFAS) is made available by the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools data. The EPA outlines that these data are gathered from several federal entities, such as the federal Superfund program, Department of Defense (DOD), National Aeronautics and Space Administration (NASA), Department of Transportation (DOT), and Department of Energy (DOE). The dates this data was extracted for the PFAS Analytic Tools range from 2022 to 2024. Sites on this list do not necessarily reflect the source/s of PFAS contamination and detections do not indicate level of risk or human exposure at the site. Agricultural notifications in this data are limited to DOD sites only. At this time, the EPA is aware that this list is not comprehensive of all Federal agencies.

Government Publication Date: Oct 24, 2024

SSEHRI PFAS Contamination Sites: PFAS SSEHRI

This PFAS Contamination Site Tracker database is compiled by the PFAS Project Lab, part of the Social Science Environmental Health Research Institute (SSEHRI) at Northeastern University. According to the SSEHRI, the database records qualitative and quantitative data from each known site of PFAS contamination, including timeline of discovery, sources, levels, health impacts, community response, and government response. The goal of this database is to compile information and support public understanding of the rapidly unfolding issue of PFAS contamination. All data presented was extracted from government websites, news articles, or publicly available documents. Locations for the Known PFAS Contamination Sites are sourced from the PFAS Sites and Community Resources Map by the PFAS-REACH team, credited to PFAS Project Lab, Silent Spring Institute, and PFAS Exchange. Disclaimer: The source conveys the data undergoes regular updates as new information becomes available, some sites may be missing and/or contain information that is incorrect or outdated, as well as their information represents all contamination sites SSEHRI is aware of, not all possible contamination sites. This data is not intended to be used for legal purposes. Access the following source link for the most current information: https://pfasproject.com/pfas-sites-and-community-resources/

Government Publication Date: Jun 27, 2024

National Response Center PFAS Spills: PFAS ERNS

This Per- and Poly-Fluoroalkyl Substances (PFAS) Spills dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. The National Response Center (NRC), operated by the U.S. Coast Guard, is the designated federal point of contact for reporting all oil, chemical, and other discharges into the environment, for the United States and its territories. This dataset contains NRC spill information from 1990 to the present that is restricted to records associated with PFAS and PFAS-containing materials. Incidents are filtered to include only records with a "Material Involved" or "Incident Description" related to Aqueous Film Forming Foam (AFFF). The keywords used to filter the data included "AFFF," "Fire Fighting Foam," "Aqueous Film Forming Foam," "Fire Suppressant Foam, "PFAS," "PERFL," "PFOA," "PFOS," and "Genx." Limitations: The data from the NRC website contains initial incident data that has not been validated or investigated by a federal/state response agency. Keyword searches may misidentify some incident reports that do not contain PFAS. This dataset should also not be considered to be exhaustive of all PFAS spills/release incidents.

Government Publication Date: Jun 16, 2025

PFAS NPDES Discharge Monitoring: PFAS NPDES

This list of National Pollutant Discharge Elimination System (NPDES) permitted facilities with required monitoring for Per- and Polyfluoroalkyl (PFAS) Substances is made available via the U.S. Environmental Protection Agency (EPA)'s PFAS Analytic Tools. Any point-source wastewater discharger to waters of the United States must have a NPDES permit, which defines a set of parameters for pollutants and monitoring to ensure that the discharge does not degrade water quality or impair human health. This list includes NPDES permitted facilities associated with permits that monitor for Per- and Polyfluoroalkyl Substances (PFAS), limited to the years 2007 - present. EPA further advises the following regarding these data: currently, fewer than half of states have required PFAS monitoring for at least one of their permittees, and fewer states have established PFAS effluent limits for permittees. For states that may have required monitoring, some reporting and data transfer issues may exist on a state-by-state basis.

Government Publication Date: Dec 16, 2024

Perfluorinated Alkyl Substances (PFAS) from Toxic Release Inventory: PFAS TRI

List of Toxics Release Inventory (TRI) facilities at which the reported chemical is a per- or polyfluoroalkyl (PFAS) substance included in the U.S. Environmental Protection Agency's (EPA) consolidated PFAS Master List of PFAS Substances. Encompasses Toxics Release Inventory records included in the EPA PFAS Analytic Tools. The EPA's TRI database currently tracks information on disposal or releases of 770 individually listed toxic chemicals and 33 chemical categories from thousands of U.S. facilities and details about how facilities manage those chemicals through recycling, energy recovery, and treatment. This listing includes TRI Reporting Data for calendar years 1987 through 2021 and Preliminary Data for 2022.

Government Publication Date: Sep 20, 2023

PFAS Water Quality Portal Sampling Data: PFAS WATER

This Per- and Poly-Fluoroalkyl Substances (PFAS) Environmental Media Sampling Data is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. The Water Quality Portal (WQP), as a cooperative service sponsored by the United States Geological Survey, the EPA, and the National Water Quality Monitoring Council, is part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations, and individuals submit project details and sampling results to this public repository. Limitations: EPA did not carry out the sampling or testing of a majority of the data in the WQP PFAS dataset. EPA can only speak to the accuracy and completeness of the data from projects like the National Aquatic Resource Surveys for which EPA is the data owner/organization. Data may exist within the file on Quality Assurance Project Plans (QAPPs) and the approving agency of the QAPP, if a QAPP is entered.

Government Publication Date: Jan 13, 2025

PFAS TSCA Manufacture and Import Facilities: PFAS TSCA

The U.S. Environmental Protection Agency (EPA) issued the Chemical Data Reporting (CDR) Rule under the Toxic Substances Control Act (TSCA) and requires chemical manufacturers and facilities that manufacture or import chemical substances to report data to EPA. This list is specific only to TSCA Manufacture and Import Facilities with reported per- and poly-fluoroalkyl (PFAS) substances. Data file is sourced from EPA's PFAS Analytic Tools TSCA dataset which includes CDR/Inventory Update Reporting data from 1998 up to 2020. Disclaimer: This data file includes production and importation data for chemicals identified in EPA's CompTox Chemicals Dashboard list of PFAS without explicit structures and list of PFAS structures in DSSTox. Note that some regulations have specific chemical structure requirements that define PFAS differently than the lists in EPA's CompTox Chemicals Dashboard. Reporting information on manufactured or imported chemical substance amounts should not be compared between facilities, as some companies claim Chemical Data Reporting Rule data fields for PFAS information as Confidential Business Information.

Government Publication Date: Jan 5, 2023

PFAS Waste Transfers from RCRA e-Manifest: PFAS E-MANIFEST

This Per- and Poly-Fluoroalkyl Substances (PFAS) Waste Transfers dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. Every shipment of hazardous waste in the U.S. must be accompanied by a shipment manifest, which is a critical component of the cradle-to-grave tracking of wastes mandated by the Resource Conservation and Recovery Act (RCRA). According to the EPA, currently no Federal Waste Code exists for any PFAS compounds. To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: • PFAS • PFOA • PFOS • PERFL • AFFF • GENX • GEN-X (plus the Vermont state-specific waste codes). Limitations: Amount or concentration of PFAS being transferred cannot be determined from the manifest information. Keyword searches may misidentify some manifest records that do not contain PFAS. This dataset should also not be considered to be exhaustive of all PFAS waste transfers.

Government Publication Date: Mar 23, 2025

PFAS Industry Sectors: PFAS IND

This Per- and Poly-Fluoroalkyl Substances (PFAS) Industry Sectors dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. The EPA developed the dataset from various sources that show which industries may be handling PFAS including: EPA's Enforcement and Compliance History Online (ECHO) records restricted to potential PFAS-handling industry sectors; ECHO records for Fire Training Sites identified where fire-fighting foam may have been used in training exercises; and 14 CFR Part 139 Airports compiled from historic and current records from the FAA Airport Data and Information Portal. Since July 2006, all certificated Part 139 Airports are required to have fire-fighting foam onsite that meet certain military specifications, which to date have been fluorinated (Aqueous Film Forming Foam). Limitations: Inclusion in this dataset does not indicate that PFAS are being manufactured, processed, used, or released by the facility. Listed facilities potentially handle PFAS based on their industrial profile, but are unconfirmed by the EPA. Keyword searches in ECHO for Fire Training sites may misidentify some facilities and should not be considered to be an exhaustive list of fire training facilities in the U.S.

Government Publication Date: Jun 2, 2025

Hazardous Materials Information Reporting System: HMIRS

The Hazardous Materials Incident Reporting System (HMIRS) database contains unintentional hazardous materials release information reported to the U.S. Department of Transportation, Pipeline and Hazardous Materials Safety Administration.

Government Publication Date: May 29, 2024

National Clandestine Drug Labs: NCDL

The U.S. Department of Justice ("the Department"), Drug Enforcement Administration (DEA), provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

Government Publication Date: Nov 30, 2023

Toxic Substances Control Act: TSCA

The U.S. Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule. The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI). EPA CDR collections occur approximately every four years and reporting requirements change per collection.

Government Publication Date: May 12, 2022

Hist TSCA: HIST TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.
The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.

Government Publication Date: Dec 31, 2006

FTTS Administrative Case Listing: FTTS ADMIN

An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

FTTS Inspection Case Listing: FTTS INSP

An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

Potentially Responsible Parties List: PRP

Early in the site cleanup process, the U.S. Environmental Protection Agency (EPA) conducts a search to find the Potentially Responsible Parties (PRPs). The EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site. This listing contains PRPs, Noticed Parties, at sites in the EPA's Superfund Enterprise Management System (SEMS).

Government Publication Date: Apr 25, 2025

State Coalition for Remediation of Drycleaners Listing: SCRD DRYCLEANER

The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin. Since 2017, the SCRD no longer maintains this data, refer to applicable state source data where available.

Government Publication Date: Nov 08, 2017

Integrated Compliance Information System (ICIS): ICIS

The Integrated Compliance Information System (ICIS) database contains integrated enforcement and compliance information across most of U.S. Environmental Protection Agency's (EPA) programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained by the EPA Headquarters and at the Regional offices. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

Government Publication Date: May 3, 2025

Drycleaner Facilities: FED DRYCLEANERS

A list of drycleaner facilities from Enforcement and Compliance History Online (ECHO) data as made available by the U.S. Environmental Protection Agency (EPA), sourced from the ECHO Exporter file. This EPA source file tracks facilities that possess NAICS and SIC codes that classify businesses as drycleaner establishments.

Government Publication Date: Apr 19, 2025

Delisted Drycleaner Facilities: DELISTED FED DRY

List of sites removed from the list of Drycleaner Facilities (sites in the EPA's Integrated Compliance Information System (ICIS) with NAIC or SIC codes identifying the business as a drycleaner establishment).

Government Publication Date: Apr 19, 2025

Formerly Used Defense Sites: FUDS

Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DOD) is responsible for an environmental restoration. The FUDS Annual Report to Congress (ARC) is published by the U.S. Army Corps of Engineers (USACE). This data is compiled from the USACE's Geospatial FUDS data layers and Homeland Infrastructure Foundation-Level Data (HIFLD) FUDS dataset which applies to the Fiscal Year 2021 FUDS Inventory.

Government Publication Date: May 15, 2023

FUDS Munitions Response Sites: FUDS MRS

Boundaries of Munitions Response Sites (MRS), published with the Formerly Used Defense Sites (FUDS) Annual Report to Congress (ARC) by the U.S. Army Corps of Engineers (USACE). An MRS is a discrete location within a Munitions response area (MRA) that is known to require a munitions response. An MRA means any area on a defense site that is known or suspected to contain unexploded ordnance (UXO), discarded military munitions (DMM), or munitions constituents (MC). This data is compiled from the USACE's Geospatial MRS data layers and Homeland Infrastructure Foundation-Level Data (HIFLD) MRS dataset.

Government Publication Date: May 15, 2023

Former Military Nike Missile Sites: FORMER NIKE

This information was taken from report DRXTH-AS-IA-83A016 (Historical Overview of the Nike Missile System, 12/1984) which was performed by Environmental Science and Engineering, Inc. for the U.S. Army Toxic and Hazardous Materials Agency Assessment Division. The Nike system was deployed between 1954 and the mid-1970's. Among the substances used or stored on Nike sites were liquid missile fuel (JP-4); starter fluids (UDKH, aniline, and furfuryl alcohol); oxidizer (IRFNA); hydrocarbons (motor oil, hydraulic fluid, diesel fuel, gasoline, heating oil); solvents (carbon tetrachloride, trichloroethylene, trichloroethane, stoddard solvent); and battery electrolyte. The quantities of material a disposed of and procedures for disposal are not documented in published reports. Virtually all information concerning the potential for contamination at Nike sites is confined to personnel who were assigned to Nike sites. During deactivation most hardware was shipped to depot-level supply points. There were reportedly instances where excess materials were disposed of on or near the site itself at closure. There was reportedly no routine site decontamination.

Government Publication Date: Dec 2, 1984

PHMSA Pipeline Safety Flagged Incidents: PIPELINE INCIDENT

This list of flagged pipeline incidents is made available by the U.S. Department of Transportation (US DOT) Pipeline and Hazardous Materials Safety Administration (PHMSA). PHMSA regulations require incident and accident reports for five different pipeline system types. Accidents reported on hazardous liquid gravity lines (§195.13) and reporting-regulated-only hazardous liquid gathering lines (§195.15) and incidents reported on Type R gas gathering (§192.8(c)) are not included in the flagged incident file data.

Government Publication Date: May 6, 2024

Material Licensing Tracking System (MLTS): MLTS

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

Government Publication Date: May 11, 2021

Historic Material Licensing Tracking System (MLTS) sites: HIST MLTS

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

Government Publication Date: Jan 31, 2010

Mines Master Index File: MINES

The Master Index File (MIF) is provided by the United States Department of Labor, Mine Safety and Health Administration (MSHA). This file, which was originally created in the 1970's, contained many Mine-IDs that were invalid. MSHA removes invalid IDs from the MIF upon discovery. MSHA applicable data includes the following: all Coal and Metal/Non-Metal mines under MSHA's jurisdiction since 1/1/1970; mine addresses for all mines in the database except for Abandoned mines prior to 1998 from MSHA's legacy system (addresses may or may not correspond with the physical location of the mine itself); violations that have been assessed penalties as a result of MSHA inspections beginning on 1/1/2000; and violations issued as a result of MSHA inspections conducted beginning on 1/1/2000.

Government Publication Date: Feb 5, 2024

Surface Mining Control and Reclamation Act Sites: SMCRA

This inventory of land and water impacted by past mining (primarily legacy coal mining operations) is maintained by the U.S. Department of the Interior's Office of Surface Mining Reclamation and Enforcement (OSMRE), as it provides information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). This inventory contains information on the type and extent of Abandoned Mine Land (AML) Problems, as well as information on the cost associated with the reclamation of those problems. The data is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed. Disclaimer: Per the OSMRE, States and tribes who enter their data into e-AMLIS (AML Inventory System) may truncate their latitude and longitude so the precise location of usually dangerous AMLs is not revealed in an effort to protect the public from searching for these AMLs, most of which are on private property. If more precise location information is needed, please contact the applicable state/tribe of interest.

Government Publication Date: May 20, 2024

Mineral Resource Data System: MRDS

The Mineral Resource Data System (MRDS) is a collection of reports describing metallic and nonmetallic mineral resources throughout the world. Included are deposit name, location, commodity, deposit description, geologic characteristics, production, reserves, resources, and references. This database contains the records previously provided in the Mineral Resource Data System (MRDS) of USGS and the Mineral Availability System/Mineral Industry Locator System (MAS/MILS) originated in the U.S. Bureau of Mines, which is now part of USGS. The USGS has ceased systematic updates of the MRDS database with their focus more recently on deposits of critical minerals while providing a well-documented baseline of historical mine locations from USGS topographic maps.

Government Publication Date: Mar 15, 2016

DOE Legacy Management Sites: LM SITES

The U.S. Department of Energy (DOE) Office of Legacy Management (LM) currently manages radioactive and chemical waste, environmental contamination, and hazardous material at over 100 sites across the U.S. The LM manages sites with diverse regulatory drivers (statutes or programs that direct cleanup and management requirements at DOE sites) or as part of internal DOE or congressionally-recognized programs, such as but not limited to: Formerly Utilized Sites Remedial Action Program (FUSRAP), Uranium Mill Tailings Radiation Control Act (UMTRCA Title I, Tile II), Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), Resource Conservation and Recovery Act (RCRA), Decontamination and Decommissioning (D&D), Nuclear Waste Policy Act (NWPA). This site listing includes data exported from the DOE Office of LM's Geospatial Environmental Mapping System (GEMS). GEMS Data disclaimer: The DOE Office of LM makes no representation or warranty, expressed or implied, regarding the use, accuracy, availability, or completeness of the data presented herein.

Government Publication Date: Dec 12, 2023

Alternative Fueling Stations: ALT FUELS

This list of alternative fueling stations is sourced from the Alternative Fuels Data Center (AFDC). The U.S. Department of Energy's Office of Energy Efficiency & Renewable Energy launched the AFDC in 1991 as a repository for alternative fuel vehicle performance data, which provides a wealth of information and data on alternative and renewable fuels, advanced vehicles, fuel-saving strategies, and emerging transportation technologies. The data includes Biodiesel (B20 and above), Compressed Natural Gas (CNG), Electric, Ethanol (E85), Hydrogen, Liquefied Natural Gas (LNG), Propane (LPG), and Renewable Diesel (R20 and above) fuel type locations.

Government Publication Date: May 12, 2025

Superfunds Consent Decrees: CONSENT DECREES

This list of Superfund consent decrees is provided by the Department of Justice, Environment & Natural Resources Division (ENRD) through a Freedom of Information Act (FOIA) applicable file. This listing includes Cases filed since 2010 limited to the following: Consent Decrees for CERCLA or Superfund Sites filed and/or as proposed within the ENRD's Case Management System (CMS); and applicable ENRD's Environmental Defense Section (EDS) CERCLA Cases with "Consent" in History Note. CMS may not reflect the latest developments in a case, nor can the agency guarantee the accuracy of the data. ENRD Disclaimer: Congress excluded three discrete categories of law enforcement and national security records from the requirements of the FOIA; response is limited to those records that are subject to the requirements of the FOIA; however, this should not be taken as an indication that excluded records do, or do not, exist.

Government Publication Date: Jun 26, 2024

Air Facility System: AFS

This EPA retired Air Facility System (AFS) dataset contains emissions, compliance, and enforcement data on stationary sources of air pollution. Regulated sources cover a wide spectrum; from large industrial facilities to relatively small operations such as dry cleaners. AFS does not contain data on facilities that are solely asbestos demolition and/or renovation contractors, or landfills. ECHO Clean Air Act data from AFS are frozen and reflect data as of October 17, 2014; the EPA retired this system for Clean Air Act stationary sources and transitioned to ICIS-Air.

Government Publication Date: Oct 17, 2014

Registered Pesticide Establishments: SSTS

This national list of active EPA-registered foreign and domestic pesticide and/or device-producing establishments is based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that each producing establishment must place its EPA establishment number on the label or immediate container of each pesticide, active ingredient or device produced. An EPA establishment number on a pesticide product label identifies the EPA registered location where the product was produced. The list of establishments is made available by the U.S. Environmental Protection Agency (EPA).

Government Publication Date: Feb 29, 2024

Polychlorinated Biphenyl (PCB) Transformers: PCBT

Locations of Transformers Containing Polychlorinated Biphenyls (PCBs) registered with the United States Environmental Protection Agency. PCB transformer owners must register their transformer(s) with EPA. Although not required, PCB transformer owners who have removed and properly disposed of a registered PCB transformer may notify EPA to have their PCB transformer de-registered. Data made available by EPA.

Government Publication Date: Oct 15, 2019

Polychlorinated Biphenyl (PCB) Notifiers: PCB

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

Government Publication Date: May 23, 2024

Power Plants: POWER PLANTS

This list of power plants is provided by the U.S. Energy Information Administration (EIA). The listing includes operable electric generating plants in the United States by energy source, originating from the EIA-860, Annual Electric Generator Report; EIA-860M, Monthly Update to the Annual Electric Generator Report; and EIA-923, Power Plant Operations Report. It includes all operable plants by energy source with a combined nameplate capacity of 1 megawatt or more that are operating, are on standby, or out of service for short- or long-term.

Government Publication Date: Apr 15, 2024

Historical Business Activity Risk: HIST RISK

Proprietary list of sites identified as potentially having engaged in business activity that poses a higher-than-normal risk of contamination. Records originate from historical city directories, and are included in this list based on broad business categories Potentially Hazardous Chemical Users and Fuel and Automotive, including but not limited to Dry Cleaners and Fuel Stations, Garages, etc. Inclusion in this listing does not indicate that there is or ever has been contamination; rather, sites are included in this list due to their potential for having engaged in a business activity presenting an elevated risk of contamination. The list was compiled from various city directories including Polks, Millers, Mullin Kille, Interstate Directory, and State Directory Co; spanning roughly 1920s through 1960 depending on information available by city.

Government Publication Date: Jan 1, 1960

State

Hazardous Material Incident database: SPILLS

A listing of reported spill incidents from the New Jersey Department of Environmental Protection's (NJDEP) Hazardous Material Incident database. This database includes incidents reported to the NJDEP's Environmental Action Line.

Government Publication Date: Apr 4, 2025

Historic Incidents: HIS SPILL

Pre-2003 Spill incident records. This is no longer maintained or updated by the New Jersey Department of Environmental Protection (DEP).

Government Publication Date: Dec 1, 2002

Data Miner Sites: ALL SITES

A list of facilities and sites of environmental interest included in the New Jersey Department of Environmental Protection (NJDEP) Data Miner database. NJ Data Miner is compilation of data from various programs, and includes Air Quality Permitting and Reporting, Compliance and Enforcement, Hazardous Waste Manifest, Incidents and Complaints, Radon, and others.

Government Publication Date: Mar 17, 2025

Chromate Waste Sites: CHROMATE

List of sites within New Jersey where chromate contamination of soil or ground water has been identified. This list of chromate waste sites includes sites where remediation is either currently under way, required but not yet initiated or has been completed. The information is obtained from data submissions produced by the various remedial programs within NJDEP using information supplied by the party responsible for the site

Government Publication Date: Jun 2013

Dry Cleaning Facilities: DRYCLEANERS

A list of registered drycleaners. This list is made available by the Department of Environmental Protection.

Government Publication Date: Mar 6, 2025

Delisted Drycleaning Facility List: DELISTED DRYCLEANERS

A list of sites which were once dry cleaning facilities registered with New Jersey Department of Environmental Protection but are no longer used as dry cleaning facilities.

Government Publication Date: Mar 6, 2025

Per- and Polyfluoroalkyl Substances (PFAS): PFAS

A list of incidents reported to the New Jersey Department of Environmental Protection (NJDEP) Environmental Action Line, where one or more of the substances are in the PFAS Structure List and/or PFAS Chemicals Without Explicit Structure List made available by the United States Environmental Protection Agency (US EPA).

Government Publication Date: Apr 4, 2025

Industrial Site Recovery Act Database: ISRA

A list of Industrial Site Recovery Act (ISRA) cases made available by the New Jersey Department of Environmental Protection. The Industrial Site Recovery Act (ISRA) requires owners of facilities with specific industrial classifications to investigate and remediate prior to property transfers when the business ceases operations or is sold.

Government Publication Date: Jun 3, 2025

Pollutant Discharge Elimination System: PDES

List of New Jersey Pollutant Discharge Elimination System (NJPDES) facilities provided by the New Jersey Department of Environmental Protection (NJDEP). Includes approximate locations of permitted NJPDES facilities regulated by the NJDEP Bureau of Nonpoint Pollution Control (BNPC) and facilities with active NJPDES permits from the NJDEP Data Miner.

Government Publication Date: Mar 24, 2025

New Jersey Environmental Management System (NJEMS) Sites: NJEMS

New Jersey Environmental Management System (NJEMS) Sites are regulated by NJ Department of Environmental Protection (NJDEP) under one or more regulatory permitting or enforcement programs, or sites that are otherwise of some interest to the NJDEP program. This database is published by NJDEP.

Government Publication Date: Jun 26, 2025

PFAS Monitoring for Discharge to Ground Water Permits: PFAS DGW

List of New Jersey Pollutant Discharge Elimination System (NJPDES) Discharge to Groundwater (DGW) Permittees who have been issued permit modifications to include Per- and Polyfluoroalkyl Substances (PFAS) monitoring and reporting requirements. The New Jersey Department of Environmental Protection (NJDEP) Division of Water Quality's (DWQ) Ground Water Permitting Unit issued an initial round of permit modifications in January 2020. Disclaimer: This map layer was developed using NJDEP Geographic Information System digital data, but this secondary product has not been verified by NJDEP and is not state-authorized or endorsed. NJDEP makes no warranty that digital data are free of Copyright or Trademark claims or other restrictions or limitations on free use or display.

Government Publication Date: May 11, 2022

PFAS Survey for Discharge to Surface Water Permittees: PFAS DSW

List of New Jersey Pollutant Discharge Elimination System (NJPDES) Discharge to Surface Water (DSW) Permittees that participated in the New Jersey Department of Environmental Protection (NJDEP) Division of Water Quality's (DWQ) PFAS Source Evaluation and Reduction Requirements Survey. On March 17, 2021, the DWQ sent a Request for Information letter to Category B Permittees (Industrial Wastewater) and Category L Permittees (Significant Indirect Users). These permittees are industrial users that discharge directly or indirectly to a surface water body. The survey was used to collect and evaluate site-specific information such as on-site use of Aqueous Film Forming Foam (AFFF), use of process materials or aids that may contain Per- and Polyfluoroalkyl Substances (PFAS), and industrial operations and processes. Disclaimer: This map layer was developed using NJDEP Geographic Information System digital data, but this secondary product has not been verified by NJDEP and is not state-authorized or endorsed. NJDEP makes no warranty that digital data are free of Copyright or Trademark claims or other restrictions or limitations on free use or display.

Government Publication Date: May 11, 2022

Tribal

No Tribal additional environmental record sources available for this State.

County

No County additional environmental record sources available for this State.

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

HISTORICAL AERIALS

Project Property: PRKSD25001 - Area 2
1500 Baird Blvd
Camden NJ 08103

The ERIS ***Physical Setting Report - PSR*** provides comprehensive information about the physical setting around a site and includes a complete overview of topography and surface topology, in addition to hydrologic, geologic and soil characteristics. The location and detailed attributes of oil and gas wells, water wells, public water systems and radon are also included for review.

The compilation of both physical characteristics of a site and additional attribute data is useful in assessing the impact of migration of contaminants and subsequent impact on soils and groundwater.

Disclaimer

This Report does not provide a full environmental evaluation for the site or adjacent properties. Please see the terms and disclaimer at the end of the Report for greater detail.

0 0.125 0.25 Miles

ERIS

Geologic Information

The previous page shows USGS geology information. Detailed information about each unit is provided below.

Geologic Unit Kmg

Unit Name:	Magothy Formation
Unit Age:	Upper Cretaceous, middle and lower Santonian
Primary Rock Type:	Sand
Secondary Rock Type:	

Geologic Unit Kp

Unit Name:	Potomac Formation, unit 3
Unit Age:	Upper Cretaceous, lower Cenomanian
Primary Rock Type:	Sand
Secondary Rock Type:	Clay
Unit Description:	Sand, fine- to coarse-grained, locally gravelly, crossbedded, light-colored, interbedded with white or variegated red and yellow, massive clay, and rarely dark-gray, woody clay. The Potomac Formation crops out only in the Delaware River valley where the river and its tributaries have eroded away the overlying formations. The Potomac has been mapped in a broad belt parallel to the inner edge of the Coastal Plain. Although mapped in a broad belt, the Potomac is very poorly exposed because of the widespread cover of surficial sediments. The best exposures occur where surficial material is mined away in the Camden area. Unit is about 45 m (148 ft) thick. Contact with the overlying Magothy Formation is difficult to pick where the basal Magothy also contains variegated clays. Most of the basal Magothy has more dark-colored clay, and the contact was drawn by using this criterion. The basal contact of the Potomac with the underlying crystalline rock is not exposed in New Jersey. Biostratigraphically, the Potomac has been separated into pollen zones I, II, and III (Doyle, 1969; Doyle and Robbins, 1977). Samples from the Potomac Formation in the Camden area and along the Delaware River nearby contain pollen assemblages of early Cenomanian age (Zone III) (Les Sirkin, written commun., 1988).

Soil Information

SSURGO Soils

N

0 0.125 0.25 Miles

This maps shows SSURGO soil units around the target property. Please refer to the report for detailed soil descriptions.

ERIS

Soil Information

The previous page shows a soil map using SSURGO data from USDA Natural Resources Conservation Service. Detailed information about each unit is provided below.

Map Unit UR (81.74%)

Map Unit Name:	Urban land
Bedrock Depth - Min:	null
Watertable Depth - Annual Min:	null
Drainage Class - Dominant:	null
Hydrologic Group - Dominant:	null

Major components are printed below

Component Description:

Minor map unit components are excluded from this report.

Map Unit: UR - Urban land

Component: Urban land (95%)
Generated brief soil descriptions are created for major soil components. The Urban land is a miscellaneous area.

Component: Udorthents (5%)
Generated brief soil descriptions are created for major components. The Udorthents soil is a minor component.

Map Unit WATER (18.26%)

Map Unit Name:	Water

No more attributes available for this map unit

Component Description:

Minor map unit components are excluded from this report.

Map Unit: WATER - Water

Component: Water (100%)
Generated brief soil descriptions are created for major soil components. The Water is a miscellaneous area.

Radon Information

This section lists any relevant radon information found for the target property.

Federal EPA Radon Zone for *CAMDEN* County: **2**

Zone 1: Counties with predicted average indoor radon screening levels greater than 4 pCi/L
Zone 2: Counties with predicted average indoor radon screening levels from 2 to 4 pCi/L
Zone 3: Counties with predicted average indoor radon screening levels less than 2 pCi/L

Federal Area Radon Information for *CAMDEN* County

No Measures/Homes:	4029
Arithmetic Mean:	2.6
% >4 pCi/L:	15
Notes on Data Table:	TABLE 1. Screening indoor radon data for New Jersey compiled by the New Jersey Department of Environmental Protection and Energy. Data are compiled from vendor reports collected by NJDEP from 1986 through 1992 and represent primarily 2-7 day charcoal canister measurements, although some alpha-track and e-perm detector data are also included.

Appendix

Federal Sources

FEMA National Flood Hazard Layer — **FEMA FLOOD**

The National Flood Hazard Layer (NFHL) data incorporates Flood Insurance Rate Map (FIRM) databases published by the Federal Emergency Management Agency (FEMA), and any Letters Of Map Revision (LOMRs) that have been issued against those databases since their publication date. The FIRM Database is the digital, geospatial version of the flood hazard information shown on the published paper FIRMs. The FIRM Database depicts flood risk information and supporting data used to develop the risk data. The FIRM Database is derived from Flood Insurance Studies (FISs), previously published FIRMs, flood hazard analyses performed in support of the FISs and FIRMs, and new mapping data, where available.

Indoor Radon Data — **INDOOR RADON**

Indoor radon measurements tracked by the Environmental Protection Agency(EPA) and the State Residential Radon Survey.

Public Water Systems Violations and Enforcement Data — **PWSV**

This list of drinking water violations and enforcement actions is sourced from the U.S Environmental Protection Agency's (EPA) Enforcement and Compliance History Online (ECHO) system that incorporates Public Water Systems data from EPA's Safe Drinking Water Information System (SDWIS) database, as part of the national download of Safe Drinking Water Act (SDWA) data. SDWIS contains information on public water systems from the Public Water System Supervision (PWSS) Program, including monitoring, enforcement, and violation data related to requirements established by the SWDA. Address information provided in SWDIS may correspond either with the physical location of the water system, or with a contact address.

Radon Zone Level — **RADON ZONE**

Areas showing the level of Radon Zones (level 1, 2 or 3) by county. This data is maintained by the Environmental Protection Agency (EPA).

Safe Drinking Water Information System (SDWIS) — **SDWIS**

This national download of Safe Drinking Water Act (SDWA) data is sourced from the U.S Environmental Protection Agency's (EPA) Enforcement and Compliance History Online (ECHO) system that incorporates Public Water Systems data from EPA's Safe Drinking Water Information System (SDWIS) database. SDWIS contains information on public water systems from the Public Water System Supervision (PWSS) Program related to requirements established by the Safe Drinking Water Act (SDWA). Address information provided in SWDIS may correspond either with the physical location of the water system, or with a contact address.

Soil Survey Geographic database — **SSURGO**

The Soil Survey Geographic database (SSURGO) contains information about soil as collected by the National Cooperative Soil Survey at the Natural Resources Conservation Service (NRCS). Soil maps outline areas called map units. The map units are linked to soil properties in a database. Each map unit may contain one to three major components and some minor components.

U.S. Fish & Wildlife Service Wetland Data — **US WETLAND**

The U.S. Fish & Wildlife Service Wetland layer represents the approximate location and type of wetlands and deepwater habitats in the United States.

USGS Current Topo — **US TOPO**

US Topo topographic maps are produced by the National Geospatial Program of the U.S. Geological Survey (USGS). The project was launched in late 2009, and the term "US Topo" refers specifically to quadrangle topographic maps published in 2009 and later.

USGS Geology — **US GEOLOGY**

Seamless maps depicting geological information provided by the United States Geological Survey (USGS).

USGS National Water Information System — **FED USGS**

The U.S. Geological Survey's (USGS) National Water Information System (NWIS) is the nation's principal repository of water resources data. The data includes comprehensive information of well-construction details, time-series data for gage height, streamflow, groundwater level, and precipitation and water use data. This NWIS database information is obtained through the Water Quality Data Portal (WQP). The WQP

is a cooperative service sponsored by the USGS, the Environmental Protection Agency (EPA), and the National Water Quality Monitoring Council (NWQMC).

State Sources

Oil and Gas Wells **OGW**

As of NJ state regulatory agencies, FracTracker Alliance - state of New Jersey confirmed not to have any active (drilled but not plugged) oil and gas wells.

Public Community Water Supply Well Head Protection Areas **PCWS**

Locations of Well Head Protection Areas (WHPA) for Public Community Water Supply (PCWS) wells, created in compliance to the Safe Drinking Water Act Amendments of 1986 and 1996 as part of the Source Water Area Protection Program (SWAP). Well Head Protection Areas delineate the horizontal extent of ground water captured by a well. Data made available by New Jersey Department of Environmental Protection's (NJ DEP) Bureau of Safe Drinking Water. Point locations represent the centroids of the Well Head Protection Areas.

Well Permits **WATER WELLS**

Locations of water wells from the Well Permit Report made available by the State of New Jersey, Department of Environmental Protection. Includes approved/accepted well documents for Category 1 Potable and Category 2 Non-Potable Water Supply Wells.

Liability Notice

Reliance on information in Report: The Physical Setting Report (PSR) DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a review of environmental databases and physical characteristics for the site or adjacent properties.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS Information Inc. disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. RE: CITY DIRECTORY RESEARCH
1500 Baird Blvd
Camden,NJ 08103

Thank you for contacting ERIS for an City Directory Search for the site described above. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. We have provided the nearest addresses(s) when adjacent addresses are not listed. If we have searched a range of addresses, all addresses in that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on more highly developed areas. Newly developed areas may be covered in the more recent years, but the older directories will tend to cover only the "central" parts of the city. To complete the search, we have either utilized the ACPL, Library of Congress, State Archives, and/or a regional library or history center as well as multiple digitized directories. These do not claim to be a complete collection of all reverse listing city directories produced.

ERIS has made every effort to provide accurate and complete information but shall not be held liable for missing, incomplete or inaccurate information. To complete this search we used the general range(s) below to search for relevant findings. If you believe there are additional addresses or streets that require searching please contact us at 866-517-5204.

Search Criteria:
BEG-2200 of Baird Blvd
Search Notes:
Baird Blvd is also known as ALL Baird Ave in Camden.
